

January 31, 2026

STAFF REPORT

Treasurer's Report
For the Period Ended December 31, 2025

SUMMARY

Section 18.0 of the Orange County Sanitation District's (OC San) Investment Policy includes quarterly reporting requirements for OC San's two investment portfolios. These two funds, the "Liquid Operating Monies," and the "Long-Term Operating Monies" are managed by Insight Investment (Insight), OC San's external money manager.

The ongoing monitoring of OC San's investment program by staff and Callan LLC (Callan), OC San's independent investment advisor, indicates that OC San's investments are in compliance with OC San's adopted Investment Policy and the California Government Code, and that overall performance has tracked with benchmark indices. In addition, sufficient liquidity and anticipated revenues are available for OC San to meet budgeted expenditures for the next six months. OC San's portfolios do not include any reverse repurchase agreements or derivative securities.

ADDITIONAL INFORMATION

Performance Reports

The Quarterly Investment Report, prepared by Insight, and the Investment Measurement Service Quarterly Review, prepared by Callan, as of December 31, 2025, are attached for reference. The Liquid Operating portfolio, with an average maturity of 54 days, consists entirely of high quality fixed income investments consistent with OC San's investment policy. Also included within the attachments are:

- Performance results in comparison with the ICE BAML 3-month treasury bill index for the liquid operating portfolio; and the ICE BAML Corp./Govt. 1-5 Year Bond index for the long-term portfolio as identified in the investment policy.
- A listing of individual securities held at the end of each reporting period.

- Cost and market values of the portfolios:

	<u>Liquid Operating</u>	<u>Long-Term</u>
Cost	\$122.3 M	\$630.6 M
Market Value	\$122.5 M	\$641.7 M

- Modified duration of the portfolio compared to the Benchmark.

	<u>Liquid Operating</u>	<u>Long-Term</u>
OC San Policy	< 0.50	< 5.00
Benchmark	0.15	2.50
Portfolio	0.11	2.54

- The percent of the Liquid Operating Monies portfolio maturing within 90 days:
74.9%

- Average portfolio credit quality:

Liquid Operating – AA

Long-Term – AA

- Percent of portfolio with credit ratings below “A” by any rating agency and a description of such securities:

Liquid Operating – Percent of portfolio – 0.00%

Long-Term – Percent of portfolio – 0.00%

- All investments are in compliance with the investment policy and the California Government Code, except for the following Lehman Brother holdings that OC San is pursuing collection through the bankruptcy court:

Lehman Brothers Note-Defaulted \$600,000 par value purchased 9/19/2008

Lehman Brothers Note-Defaulted \$2,000,000 par value purchased 9/18/2008

Portfolio Market Values

	3/31/2025	6/30/2025	9/30/2025	12/31/2025
Long-Term (\$)	632,610,453.12	640,894,886.64	635,116,746.23	641,686,524.98

DECEMBER 2025

ORANGE COUNTY SANITATION DISTRICT (OC SAN) QUARTERLY REVIEW

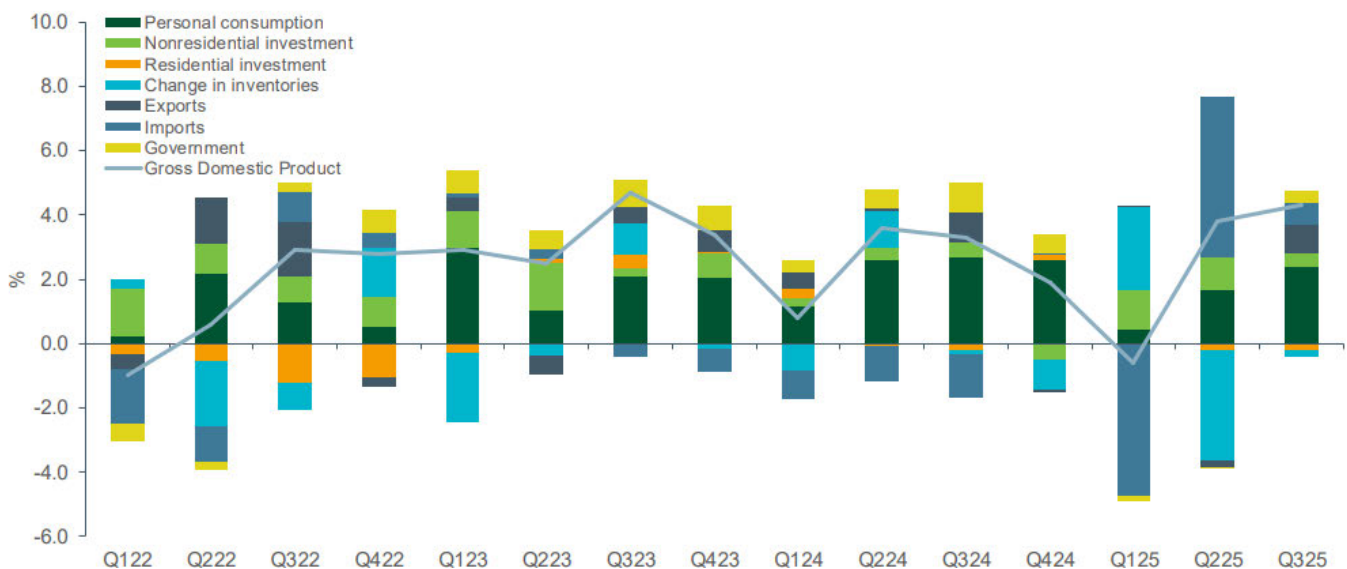

ECONOMIC REVIEW & OUTLOOK

Global economic conditions in the fourth quarter revealed broad-based below-trend expansion. Central banks generally kept policies accommodative. The Federal Reserve cut rates twice, while both the Bank of Canada and Bank of England reduced rates. The Reserve Bank of New Zealand surprised markets by implementing a 50 basis point cut, while the Bank of Japan raised rates to 0.75%, the highest in over three decades. Globally, inflation was well contained, and there were no significant upward surprises.

On the political front, negotiations between the United States and China led to agreements on easing tariffs, resuming agricultural purchases, and suspending rare-earth export restrictions, as well as commitments to cooperate on resolving the war in Ukraine. Despite increased diplomatic efforts, little tangible progress was made toward peace in Ukraine. Toward the end of the quarter, geopolitical tensions rose as the US seized a Venezuelan oil tanker and eventually removed President Nicolás Maduro in early January.

Returning to the US economy, the Federal Reserve enacted two additional 25 basis point rate cuts, bringing the federal funds target range down to 3.50%–3.75%. This move was aimed at addressing cooling inflation and a slowing US labor market. Headline inflation moderated to 2.7%, while core inflation registered at 2.6%. Consumer inflation expectations stabilized at 3.4%, below the year’s peak. A lengthy 43-day federal government shutdown disrupted the release of key economic data, but once available, reports presented a mixed picture. Third-quarter GDP growth accelerated to an annualized 4.3%, powered by resilient consumer spending. However, the manufacturing sector continued to struggle, as indicated by the ISM Manufacturing Purchasing Managers Index (PMI), which remained in contraction territory at 47.9. Positively, the ISM Services PMI climbed to 54.4.

Figure 1: Real GDP growth and its components¹

¹ Bureau of Economic Analysis, as of December 23, 2025.

We expect global economic growth to be relatively steady, although activity in developed economies is likely to remain below long-term averages. Emerging markets are projected to grow more rapidly. Inflation continues to run above central bank targets in several regions, but we do not foresee a significant increase. Our base case is for inflation to gradually return to target levels, with the eurozone already meeting this goal. It appears we are moving out of a mid-cycle slowdown, with the most probable path being a future pickup in growth, though this may take time to show up in economic data. Geopolitical tensions, particularly the ongoing Russia-Ukraine conflict, continue to pose significant risks. We expect US growth to remain steady in 2026, with a weakening labor market affecting consumer spending. Tariffs are likely to support growth by reducing imports more than exports. While manufacturing shows little signs of recovery, increased AI infrastructure investment is a key positive.

MARKET REVIEW & OUTLOOK

Governments

Inflation is projected to stay stable, ending 2026 just below 3%, and the Federal Reserve is expected to lower rates to 3.25%. We also expect 10-year and 30-year Treasury yields to stay close to their current levels over the next year, at approximately 4.10% and 4.80% respectively. Short term yields are projected to decline further, which is expected to bring a steepening of the yield curve. Volatility could increase especially as the midterm elections draw near.

Figure 4: Comparative historical US Treasury yield curves⁴

Investment Grade Corporate Credit

Strong corporate earnings continue to highlight solid fundamentals, but higher capital spending is driving increased borrowing and new issuance, especially related to AI investments. Yield spreads may widen as US companies return to the market in force. New issues often offer yields above current levels, benefiting client portfolios that participate in this process. The trend of issuing euro-denominated debt is noteworthy but less relevant for US-focused investors. Overall, we anticipate continued demand for investment grade credit in 2026, given its yield advantage over cash and attractive relative value compared to default risks.

Structured Credit / Secured Finance

ABS delivered income-driven returns in 2025 and we expect a similar outcome in 2026. A gradual reduction in interest rates should provide support for consumer loans backing the investment in those markets. Our approach remains active in primary markets, taking advantage of new-issue premiums while seeking relative value opportunities that offer compelling risk-reward profiles. We continue to focus on investments with the highest credit rating and robust deal features that redirect cash flow in the event of underperformance in the underlying asset pool. Strong underwriting and servicing standards should further help insulate investors should economic conditions weaken unexpectedly.

Municipal Bonds

We expect a positive environment for municipal bonds in 2026, with taxable yields offering attractive value compared to similarly rated corporate credits. Credit fundamentals remain strong, backed by solid reserves and cash balances. As economic growth slows, we prefer defensive sectors like public power and water/sewer utilities for their reliability. We remain cautious on healthcare obligors given rising costs. After recent curve steepening, we find the long end appealing and favor barbell strategies—combining short maturities to benefit from Fed easing and long maturities for higher yields. Though spreads are historically tight, strong credit fundamentals and steady demand provide support.

⁴ Source: Bloomberg, as of December 31, 2025.

LONG TERM PORTFOLIO

The Long Term portfolio maintained a longer duration and maturity than its benchmark for most of 2025. As the year ends, it is becoming less clear how much more value this strategy will add versus the passive benchmark. At issue is that the Federal Reserve has delivered on our expected policy adjustments. Future policy adjustments for 2026 are less certain, in our view. The market is pricing another three interest rate reductions for 2026 whereas the Insight base case is for only two policy adjustments. This dynamic leads to a neutral duration exposure versus the benchmark to close the year.

Corporate and credit-related fixed income closed the quarter and the year on a positive note. Valuations remain expensive, in our view, which has been the case for the majority of 2025. Our valuation thesis for credit remains unchanged. Alternatively, we prefer US Agency investments (such as MBS and callable securities) that offer similar yields to high-quality corporate securities. We continue to maintain flexibility to add to credit-related fixed income should valuations change.

The Long Term portfolio did not have any subscription or redemption activity during the quarter. Projections for 2026 may require a redemption from the Long Term portfolio to fund capital expenditures, although the seasonal inflows appear to keep this redemption risk to potentially June. The portfolio maintains ample liquidity to meet potential redemptions.

Total Market Value (\$, excludes accrued interest)	642,204,950	635,407,732

⁵ Performance inception date: February 29, 2024.

LIQUID OPERATING PORTFOLIO

OC San contributed a net \$57 million to the Liquid Operating portfolio during the quarter, comprising of two withdrawals during October and November and one contribution during December. First quarter projections expect a net outflow of \$80 million. Should this occur, the Liquid Operating portfolio may be back to the \$40 million minimum balance. Additional liquidity would be sourced from the Long Term portfolio.

Portfolio strategy continues to emphasize cash-matching investments to align with expected withdrawal dates. On the margin, we prefer being neutral portfolio duration versus the benchmark. This is due to our view of market pricing versus our expected Fed policy path. The short part of the curve also remains inverted. This implies that the Fed will have to deliver more policy reductions than what is currently priced, which we view to be less likely.

Cash markets continue to function normally. The Federal Reserve ceased reducing the size of their portfolio holdings and committed to buying \$40 billion in Treasury Bills per month at least through April. This action significantly reduced pressure in the repo markets into year end. We expect the cash markets and Treasury Bills to remain well-supported and highly liquid through 2026.

IMPORTANT INFORMATION

IMPORTANT DISCLOSURES

This document has been prepared by Insight North America LLC (INA), a registered investment adviser under the Investment Advisers Act of 1940 and regulated by the US Securities and Exchange Commission. INA is part of 'Insight' or 'Insight Investment', the corporate brand for certain asset management companies operated by Insight Investment Management Limited including, among others, Insight Investment Management (Global) Limited, Insight Investment International Limited and Insight Investment Management (Europe) Limited (IIMEL).

Opinions expressed herein are current opinions of Insight, and are subject to change without notice. Insight assumes no responsibility to update such information or to notify a client of any changes. Any outlooks, forecasts or portfolio weightings presented herein are as of the date appearing on this material only and are also subject to change without notice. Insight disclaims any responsibility to update such views. No forecasts can be guaranteed.

Nothing in this document is intended to constitute an offer or solicitation to sell or a solicitation of an offer to buy any product or service (nor shall any product or service be offered or sold to any person) in any jurisdiction in which either (a) INA is not licensed to conduct business, and/or (b) an offer, solicitation, purchase or sale would be unavailable or unlawful.

This document should not be duplicated, amended, or forwarded to a third party without consent from INA. This is a marketing document intended for institutional investors only and should not be made available to or relied upon by retail investors. This material is provided for general information only and should not be construed as investment advice or a recommendation. You should consult with your adviser to determine whether any particular investment strategy is appropriate.

Assets under management (AUM) represented by the value of the client's assets or liabilities Insight is asked to manage. These will primarily be the mark-to-market value of securities managed on behalf of clients, including collateral if applicable. Where a client mandate requires Insight to manage some or all of a client's liabilities (e.g. LDI strategies), AUM will be equal to the value of the client specific liability benchmark and/or the notional value of other risk exposure through the use of derivatives. Regulatory assets under management without exposures can be provided upon request. Unless otherwise specified, the performance shown herein is that of Insight Investment (for Global Investment Performance Standards (GIPS), the 'firm') and not specifically of Insight North America. A copy of the GIPS composite disclosure page is available upon request.

Past performance is not a guide to future performance, which will vary. The value of investments and any income from them will fluctuate and is not guaranteed (this may partly be due to exchange rate changes). Future returns are not guaranteed and a loss of principal may occur.

Targeted returns intend to demonstrate that the strategy is managed in such a manner as to seek to achieve the target return over a normal market cycle based on what Insight has observed in the market, generally, over the course of an investment cycle. In no circumstances should the targeted returns be regarded as a representation, warranty or prediction that the specific deal will reflect any particular performance or that it will achieve or is likely to achieve any particular result or that investors will be able to avoid losses, including total losses of their investment.

The information shown is derived from a representative account deemed to appropriately represent the management styles herein. Each investor's portfolio is individually managed and may vary from the information shown. The mention of a specific security is not a recommendation to buy or sell such security. The specific securities identified are not representative of all the securities purchased, sold or recommended for advisory clients. It should not be assumed that an investment in the securities identified will be profitable. Actual holdings will vary for each client and there is no guarantee that a particular client's account will hold any or all of the securities listed.

The quoted benchmarks within this document do not reflect deductions for fees, expenses or taxes. These benchmarks are unmanaged and cannot be purchased directly by investors. Benchmark performance is shown for illustrative purposes only and does not predict or depict the performance of any investment. There may be material factors relevant to any such comparison such as differences in volatility, and regulatory and legal restrictions between the indices shown and the strategy.

Transactions in foreign securities may be executed and settled in local markets. Performance comparisons will be affected by changes in interest rates. Investment returns fluctuate due to changes in market conditions. Investment involves risk, including the possible loss of principal. No assurance can be given that the performance objectives of a given strategy will be achieved.

Insight does not provide tax or legal advice to its clients and all investors are strongly urged to consult their tax and legal advisors regarding any potential strategy or investment.

Information herein may contain, include or is based upon forward-looking statements within the meaning of the federal securities laws, specifically Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include all statements, other than statements of historical fact, that address future activities, events or developments, including without limitation, business or investment strategy or measures to implement strategy, competitive strengths, goals expansion and growth of our business, plans, prospects and references to future or success. You can identify these statements by the fact that they do not relate strictly to historical or current facts. Words such as 'anticipate', 'estimate', 'expect', 'project', 'intend', 'plan', 'believe', and other similar words are intended to identify these forward-looking statements. Forward-looking statements can be affected by inaccurate assumptions or by known or unknown risks and uncertainties. Many such factors will be important in determining our actual future results or outcomes.

Consequently, no forward-looking statement can be guaranteed. Our actual results or outcomes may vary materially. Given these uncertainties, you should not place undue reliance on these forward-looking statements.

Insight and BNY Mellon Securities Corporation (BNYMSC) are subsidiaries of BNY Mellon. BNYMSC is a registered broker and FINRA member. BNY Mellon is the corporate brand of the Bank of New York Mellon Corporation and may also be used as a generic term to reference the Corporation as a whole or its various subsidiaries generally. Products and services may be provided under various brand names and in various countries by subsidiaries, affiliates and joint ventures of the Bank of New York Mellon Corporation where authorized and regulated as required within each jurisdiction. Economic review and outlook

Key takeaways

- The economy has momentum going into the new year with an ongoing AI boom, expansionary fiscal policy, less restrictive monetary policy and strong stock market as tailwinds
- However, the sluggish labor market conditions pose challenges to the outlook with unemployment on the rise and job growth concentrated in a handful of industries
- We anticipate the Fed will cut the federal funds rate two more times by mid-2026 and we view upside and downside risks to our baseline outlook as evenly balanced

Economic data projections¹

Disclosures

Past performance is not indicative of future results. Investment in any strategy involves a risk of loss which may partly be due to exchange rate fluctuations.

The performance results shown, whether net or gross of investment management fees, reflect the reinvestment of dividends and/or income and other earnings. Any gross of fees performance does not include fees and charges and these can have a material detrimental effect on the performance of an investment. The performance shown is for the stated time period(s) only.

Any target performance aims are not a guarantee, may not be achieved and a capital loss may occur. Funds which have a higher performance aim generally take more risk to achieve this and so have a greater potential for the returns to be significantly different than expected. Investments are subject to risks, including loss of principal. There can be no guarantee that any investment strategy will meet the liability funding needs of a particular client.

Performance information for certain accounts may reflect performance achieved while the account was managed at a prior firm. In addition, the performance and customized benchmark information for these periods are based on Information from 3rd parties that Insight believes to be accurate, but Insight has not independently verified such information and no representation is made regarding its accuracy or completeness.

The quoted benchmarks do not reflect deductions for fees, expenses or taxes. These benchmarks are unmanaged and cannot be purchased directly by investors. Benchmark performance is shown for illustrative purposes only and does not predict or depict the performance of any investment. There may be material factors relevant to any such comparison such as differences in volatility, and regulatory and legal restrictions between the indices shown and the strategy.

Any currency conversions performed for this presentation, use FX rates as per WM Reuters 4pm spot rates, unless noted otherwise.

Funds and portfolios with an ESG objective follow a sustainable or ESG related investment approach, which may cause them to perform differently than funds that are not required to integrate sustainable investment criteria when selecting securities. Funds and portfolios with no ESG objective are not required to integrate sustainable investment criteria when selecting securities so any ESG approach shown is only indicative and there is no guarantee that the specific approach will be applied across the whole portfolio.

This is a client report intended for professional clients only. This material is for professional clients only and is not intended for distribution to retail clients. This document must not be used for the purpose of an offer or solicitation in any jurisdiction or in any circumstances in which such offer or solicitation is unlawful or otherwise not permitted. This document is intended only for the parties to whom it was delivered or its authorised agents and should not be copied or passed to any other person. Please contact the Client Services Team if there has been any change in your financial circumstances or risk tolerance since the previous valuation that could affect the investment objective of your portfolio. Insight obtains market data and prices from an independent pricing source for all of our currency positions on a daily basis. For trading activity the Clearing broker will be reflected. In certain cases the Clearing broker will differ from the Executing broker.

Some information contained in this client report comes from external sources which Insight believes to be reliable. A list of sources is available on request. All statistics represent month end figures unless otherwise noted. It should not be assumed that any of the security transactions or holdings referenced herein have been or will prove to be profitable or that future investment decisions will be profitable or will equal or exceed the past investment performance of the securities listed. Tax treatment depends on the individual circumstances of each investor and may be subject to change in the future. Insight does not provide tax or legal advice to its clients and all investors are strongly urged to seek professional advice regarding any potential strategy or investment. Material in this publication is for general information only and is not advice, investment advice, or the recommendation of any purchase or sale of any security.

Insight Investment is the corporate brand for certain companies operated by Insight Investment Management Limited (IIML). Insight includes, among others, Insight Investment Management (Global) Limited (IIMG), Insight Investment International Limited (IIIL) and Insight North America LLC (INA), each of which provides asset management services. This group of companies may be referred to as 'Insight' or 'Insight Investment'.

Please compare the information provided in this statement to the information provided in the statement received from your Custodian. This report is not intended to replace your custodial statement which is your official record for all pertinent account information. Please notify us promptly if you do not receive from your custodian on at least a quarterly basis account statements that contain the amount of funds and each security in the account at the end of the period and all transactions in the account during that period.

Disclosures (continued)

For clients based in North America:

This material is for professional clients only and is not intended for distribution to retail clients.

Investment advisory services in North America are provided through two different investment advisers registered with the Securities and Exchange Commission (SEC), using the brand Insight Investment: Insight North America LLC (INA) and Insight Investment International Limited (IILL). The North American investment advisers are associated with other global investment managers that also (individually and collectively) use the corporate brand Insight Investment and may be referred to as 'Insight' or 'Insight Investment'. INA is registered with the CFTC as a Commodity Trading Advisor and a Commodity Pool Operator and are members of the NFA.

Information about the indices shown here is provided to allow for comparison of the performance of the strategy to that of certain well-known and widely recognized indices. There is no representation that such index is an appropriate benchmark for such comparison. You cannot invest directly in an index and the indices represented do not take into account trading commissions and/or other brokerage or custodial costs. The volatility of the indices may be materially different from that of the strategy. In addition, the strategy's holdings may differ substantially from the securities that comprise the indices shown.

The ICE BofA 3 Month US T-Bill index is an unmanaged market index of U.S. Treasury securities maturing in 90 days that assumes reinvestment of all income.

The ICE BofA 6 Month US T-Bill index measures the performance of Treasury bills with time to maturity of less than 6 months.

The ICE BofA 1-Year US Treasury Index is a one-security index comprised of the most recently issued 1-year US Treasury note. The index is rebalanced monthly. In order to qualify for inclusion, a 1-year note must be auctioned on or before the third business day before the last business day of the month.

The ICE BofA 3-Year US Treasury Index is a one-security index comprised of the most recently issued 3-year US Treasury note. The index is rebalanced monthly. In order to qualify for inclusion, a 3-year note must be auctioned on or before the third business day before the last business day of the month.

The ICE BofA 5-Year US Treasury Index is a one-security index comprised of the most recently issued 5-year US Treasury note. The index is rebalanced monthly. In order to qualify for inclusion, a 5-year note must be auctioned on or before the third business day before the last business day of the month.

The ICE BofA 1-3 US Year Treasury Index is an unmanaged index that tracks the performance of the direct sovereign debt of the U.S. Government having a maturity of at least one year and less than three years.

The ICE BofA 1-5 US Year Treasury Index is an unmanaged index that tracks the performance of the direct sovereign debt of the U.S. Government having a maturity of at least one year and less than five years.

Recent Developments

- Effective March 1, 2024 Insight Investment Management became the investment manager for the District's Long-Term Operating Fund and the Liquid Operating Monies, replacing Chandler Asset Management.
- During the quarter, \$57 million was contributed to the Liquid Operating Monies.

Organizational Issues

- N/A

Fixed Income Market Snapshot

- Fixed income markets posted positive but more subdued returns in the fourth quarter, as Treasury yields were broadly stable and volatility declined. The Bloomberg US Aggregate Bond Index gained 1.1% for the quarter, bringing full-year returns to 7.3%. The yield curve ended the quarter slightly steeper with front-end yields declining and longer maturities rising, following two 25 bps Federal Reserve rate cuts during the quarter. Inflation expectations edged marginally lower, with the 10-year breakeven rate declining modestly.
- Credit sectors continued to benefit from supportive technicals and steady demand. Investment-grade corporates were up 80 bps in the fourth quarter, underperforming Treasuries, while MBS

(+1.7%), ABS (+1.3%), and CMBS (+1.3%) outperformed. High yield corporates advanced 1.3% (+8.6% YTD), with lower-quality segments lagging late in the quarter. Leveraged loans gained 1.2%, supported by stable short-term rates and continued CLO issuance. Municipal bonds continued their rebound following a challenging first half of the year, with the Bloomberg Municipal Index up 1.6% in the fourth quarter and 4.3% for 2025. Despite historically heavy issuance, demand remained supportive, allowing municipals to finish the year in positive territory after a volatile start.

Investment Manager Performance

- The Long-Term Operating Fund returned 1.2% in the fourth quarter, outperforming the ICE Corporate/Government 1–5 Year Index by 5 bps and performing in line with, though slightly ahead of, the Bloomberg Government/Credit 1–5 Year Index by 1 bp. The Fund ranked 74th percentile in the Callan Short Term Fixed Income peer group. Over the last year, the portfolio returned 6.3%, outperforming the ICE benchmark by 25 bps and the Bloomberg benchmark by 20 bps. The Fund ranked 20th percentile.
- The Liquid Operating Money rose 1.6% (net) over the quarter, outperforming the Citigroup 3-Month Treasury Bill Index return by 60 bps, and ranking 1st percentile in the Callan Money Market Funds peer group. Over the last year, the portfolio returned 4.88% (net), outperforming the benchmark by 40 bps, and ranking in the 17th percentile.

U.S. EQUITIES

S&P 500 hits all-time highs as investors turn cautious

- The S&P 500 Index rose 2.7% in 4Q25, supported by a strong earnings season and continued enthusiasm around artificial intelligence.
- All S&P sectors posted gains except Real Estate and Utilities. Health Care (+11.7%) and Communication Services (+7.3%) were the top-performing sectors. Notably, the Technology sector underperformed the broad market amid rising concerns about the durability/trajectory of growth from some of the mega-cap stocks.
- Large cap indices outperformed small cap indices slightly. Value outperformed growth across the market-cap spectrum for the quarter.
- Concentration risk remains elevated, with the top 10 companies in the S&P 500 Index representing over 40% of the index's total market capitalization.
- Market leadership has begun to broaden beyond the hyper-scalers; for example, only two of the Magnificent Seven stocks outperformed the S&P 500 Index in 2025.
- Earnings growth outside the Magnificent Seven has increased as a share of total S&P 500 Index EPS growth, which may position active managers that employ a more diversified approach in both holdings and alpha generation more favorably.
- Lower-quality stocks, including unprofitable companies, those with low return on equity, high short interest, and negative free cash flow, outperformed in 2025.
- Most small-cap active managers were underweight non-earners, resulting in significant relative underperformance.
- Small-cap earnings appear to be at an inflection point, based on analyst consensus estimates.
- The prospect of additional Fed rate cuts in 2026, combined with attractive relative valuations, suggests a possibly compelling entry point for small caps.

GLOBAL EQUITIES

Outpaced the U.S. over the full year

Broad market

- Global ex-U.S. equities outpaced the U.S. in 4Q25 and for the full calendar year as well.
- MSCI EAFE index delivered its best annual return since 2009.
- The U.K. was the strongest region for the quarter, assisted by a second rate cut in December and a heavy weighting in mining and resource companies that benefit from a continued metals rally.
- In 4Q25, global ex-U.S. small caps trailed large caps, but were assisted by Canadian small caps and their large weight in mining companies.
- China reversed course following a strong 3Q. Investors were disappointed by below-expectation government stimulus, property-sector issues, and deflation fears.

Growth vs. value

- EAFE Value’s 2025 returns were its highest since 2003 and beat EAFE Growth by the most since the index’s inception.

U.S. dollar

- The U.S. dollar stabilized in 4Q following a sharp decline in the first half of the year (-10%). For the full year, the dollar provided a substantial boost, accounting for around 11.5% of the EAFE Index’s 31.2% gains, though its impact in the second half was negligible.
- Value dominated outside the U.S. in 4Q25 and for the full calendar year. But growth managers had better success versus their respective benchmark given the concentration in the value index.
- 96% of growth managers underperformed the core benchmark, while 57% underperformed the growth benchmark.
- 15% of value managers underperformed the core benchmark, while 67% underperformed the value benchmark.
- The top three names within emerging markets—Taiwan Semiconductor Manufacturing Co., Samsung Electronics Co., and SK Hynix Inc.—contributed 4% in 4Q and more than 11% for the full calendar year.
- The MSCI Emerging Markets Index is at a 40-year performance low vs. the MSCI USA Index.
- EM equity net flows, according to EPRF Global & J.P. Morgan, turned positive in May 2025 and moderately accelerated through year end 2025.

U.S. FIXED INCOME

Macro environment: Hawkish policy expected

- The Fed cut rates at the December meeting, with long-end rates moving higher for the quarter.
- Sentiment around monetary policy changed toward the end of the year, with markets anticipating more hawkish policy early in 2026.
- The yield curve steepened modestly, with the 2s/10s spread ending at 70 bps, up from 56 bps at the end of 3Q.

Performance and drivers: Falling Treasury yields

- The Bloomberg US Aggregate Bond Index gained over 1%, supported by declining short-term Treasury yields.
- IG corporate returns matched Treasuries due to rate cuts and steady spreads in corporate markets.

Valuations: Yields will drive returns

- Corporate credit spreads stayed relatively consistent versus 3Q but remain at tight levels, with value being in question.
- Overall, yield itself should be the primary driver of fixed income returns moving forward as yield curves have steepened, and the bulk of spread tightening appears to be behind us.
- After the Fed delivered 75 bps of rate cuts in 2025, the markets have repriced the path of monetary policy in 2026.
- The base case for many market participants now anticipates a more measured approach to policy easing as the Fed weighs its dual mandate of inflation and employment. But a new Fed chair combined with midterm elections may present different expectations in the second half the year.
- With AI infrastructure spending set to continue, its impact on the investment-grade credit market is increasingly important. Recent AI-related deals are massive, with issuers like Meta representing a significant share of 2025 IG supply. While leading AI firms generally have strong balance sheets, markets must absorb this large-scale issuance, and leverage should be closely monitored, especially for non-hyperscalers with weaker credit profiles.
- AI's impact also extends to utilities, which must expand capacity to meet rising power demand. This is expected to drive higher issuance in a sector that already makes up a meaningful portion of the IG universe.

MUNICIPAL BONDS

AAA municipal bond yield curve flattened in 4Q25

- Demand for intermediate maturity bonds drove the AAA muni yield curve flatter in 4Q, with yields rising 0-12 bps for shorter maturities and falling up 7-23 bps for 10- to 20-year maturities.

U.S. Fixed Income: Quarterly Returns

U.S. Fixed Income: One-Year Returns

U.S. Treasury Yield Curves

Sources: Bloomberg, Credit Suisse

MUNICIPAL BONDS (cont.)

Historic year for new issuance

- For the 2025 calendar year, \$580 billion of total issuance came to market, a 13% increase over 2024 and the second consecutive record annual volume.
- Record new issuance continued to be met with solid demand as there were strong flows into municipal funds during the quarter.

Muni valuations tightened during the quarter

- Muni-to-Treasury ratios finished the quarter below historical averages, indicating diminished relative value for tax-exempt municipals versus Treasuries.
- Longer maturities remained the cheapest segment as the 30-year Muni/Treasury ratio ended at roughly 88%.

GLOBAL FIXED INCOME

U.S. dollar strengthened as tariff shock settles

Macro environment: ECB holds steady; BOE cuts

- After multiple cuts early in the year, the ECB held rates steady in the second half of 2025. Guidance in December suggested inflation should stabilize near the 2% target over the medium term.
- The BOE cut in December, citing the progress made in easing inflation pointing toward less restrictive monetary policy.

U.S. dollar remains front and center

- For the calendar year, the unhedged index substantially outperformed the hedged version amid a weaker dollar year over year.

Emerging market debt delivers another strong quarter

- A similar dollar-weakness story was on display over the year for emerging market debt, with local currency debt outperforming hard currency.

Market Overview

Active Management vs Index Returns

Market Overview

The charts below illustrate the range of returns across managers in Callan's Separate Account database over the most recent one quarter and one year time periods. The database is broken down by asset class to illustrate the difference in returns across those asset classes. An appropriate index is also shown for each asset class for comparison purposes. As an example, the first bar in the upper chart illustrates the range of returns for domestic equity managers over the last quarter. The triangle represents the S&P 500 return. The number next to the triangle represents the ranking of the S&P 500 in the Large Cap Equity manager database.

Range of Separate Account Manager Returns by Asset Class One Quarter Ended December 31, 2025

Range of Separate Account Manager Returns by Asset Class One Year Ended December 31, 2025

Domestic Fixed Income Active Management Overview

Fixed income markets posted positive but more subdued returns during the quarter as the Bloomberg US Aggregate Bond Index gained 1.1% for the quarter, bringing full-year returns to 7.3%. The yield curve ended the quarter slightly steeper with front-end yields declining and longer maturities rising, following two 25 bps Federal Reserve rate cuts during the quarter. Credit sectors continued to benefit from supportive technicals and steady demand. Investment-grade corporates were up 0.8% in 4Q, underperforming Treasuries, while MBS (+1.7%), ABS (+1.3%), and CMBS (+1.3%) outperformed. High yield corporates advanced 1.3% (+8.6% YTD), with lower-quality segments lagging late in the quarter. Leveraged loans gained 1.2%, supported by stable short-term rates and continued CLO issuance.

Separate Account Style Group Median Returns for Quarter Ended December 31, 2025

Separate Account Style Group Median Returns for One Year Ended December 31, 2025

Investment Manager Asset Allocation

The table below contrasts the distribution of assets across the Fund's investment managers as of December 31, 2025, with the distribution as of September 30, 2025. The change in asset distribution is broken down into the dollar change due to Net New Investment and the dollar change due to Investment Return.

Asset Distribution Across Investment Managers

	December 31, 2025		Net New Inv.	Inv. Return	September 30, 2025

Investment Philosophy

Insight 1-5 Year strategy seeks to capitalize on market inefficiencies, use multiple sources of alpha and make diverse bets in an effort to achieve superior total return versus the Barclays Capital Aggregate Index over a full market cycle on an absolute and risk-adjusted basis. We employ a disciplined team structure that relies on fundamental proprietary analysis and research to identify individual securities with the greatest capital appreciation potential. We customize every portfolio to meet each client's return objectives, liquidity needs, and risk tolerance. We emphasize diversification across sectors, industries, issuers and credit quality. Under most circumstances, we limit our duration exposure to within a range of +/- 15% versus the benchmark. We add value for our clients' portfolios by using a disciplined team structure that relies on fundamental, proprietary research analysis to identify individual securities with the greatest capital appreciation potential. Assets were transferred in kind to Insight on 3/1/2024. Performance from 12/1/2014 to 3/1/2024 represents Chandler. Previous performance reflects PIMCO.

Quarterly Summary and Highlights

- Long Term Operating Fund's portfolio posted a 1.19% return for the quarter placing it in the 74 percentile of the Callan Short Term Fixed Income group for the quarter and in the 20 percentile for the last year.
- Long Term Operating Fund's portfolio outperformed the ICE Corp/Gov 1-5 Yr by 0.05% for the quarter and outperformed the ICE Corp/Gov 1-5 Yr for the year by 0.25%.

Risk/Reward Statistics

The risk statistics used in this report examine performance characteristics of a manager or a portfolio relative to a benchmark (market indicator) which assumes to represent overall movements in the asset class being considered. The main unit of analysis is the excess return, which is the portfolio return minus the return on a risk free asset (3 month T-Bill).

Alpha measures a portfolio's return in excess of the market return adjusted for risk. It is a measure of the manager's contribution to performance with reference to security selection. A positive alpha indicates that a portfolio was positively rewarded for the residual risk which was taken for that level of market exposure.

Beta measures the sensitivity of rates of portfolio returns to movements in the market index. A portfolio's beta measures the expected change in return per 1% change in the return on the market. If a beta of a portfolio is 1.5, a 1 percent increase in the return on the market will result, on average, in a 1.5 percent increase in the return on the portfolio. The converse would also be true.

Downside Risk stems from the desire to differentiate between "good risk" (upside volatility) and "bad risk" (downside volatility). Whereas standard deviation punishes both upside and downside volatility, downside risk measures only the standard deviation of returns below the target. Returns above the target are assigned a deviation of zero. Both the frequency and magnitude of underperformance affect the amount of downside risk.

Excess Return Ratio is a measure of risk adjusted relative return. This ratio captures the amount of active management performance (value added relative to an index) per unit of active management risk (tracking error against the index.) It is calculated by dividing the manager's annualized cumulative excess return relative to the index by the standard deviation of the individual quarterly excess returns. The Excess Return Ratio can be interpreted as the manager's active risk/reward tradeoff for diverging from the index when the index is mandated to be the "riskless" market position.

Information Ratio measures the manager's market risk-adjusted excess return per unit of residual risk relative to a benchmark. It is computed by dividing alpha by the residual risk over a given time period. Assuming all other factors being equal, managers with lower residual risk achieve higher values in the information ratio. Managers with higher information ratios will add value relative to the benchmark more reliably and consistently.

R-Squared indicates the extent to which the variability of the portfolio returns are explained by market action. It can also be thought of as measuring the diversification relative to the appropriate benchmark. An r-squared value of .75 indicates that 75% of the fluctuation in a portfolio return is explained by market action. An r-squared of 1.0 indicates that a portfolio's returns are entirely related to the market and it is not influenced by other factors. An r-squared of zero indicates that no relationship exists between the portfolio's return and the market.

Relative Standard Deviation is a simple measure of a manager's risk (volatility) relative to a benchmark. It is calculated by dividing the manager's standard deviation of returns by the benchmark's standard deviation of returns. A relative standard deviation of 1.20, for example, means the manager has exhibited 20% more risk than the benchmark over that time period. A ratio of .80 would imply 20% less risk. This ratio is especially useful when analyzing the risk of investment grade fixed-income products where actual historical durations are not available. By using this relative risk measure over rolling time periods one can illustrate the "implied" historical duration patterns of the portfolio versus the benchmark.

Residual Portfolio Risk is the unsystematic risk of a fund, the portion of the total risk unique to the fund (manager) itself and not related to the overall market. This reflects the "bets" which the manager places in that particular asset market. These bets may reflect emphasis in particular sectors, maturities (for bonds), or other issue specific factors which the manager considers a good investment opportunity. Diversification of the portfolio will reduce or eliminate the residual risk of that portfolio.

Risk/Reward Statistics

Rising Declining Periods refer to the sub-asset class cycles vis-a-vis the broader asset class. This is determined by evaluating the cumulative relative sub-asset class index performance to that of the broader asset class index. For example, to determine the Growth Style cycle, the S&P 500 Growth Index (sub-asset class) performance is compared to that of the S&P 500 Index (broader asset class).

Sharpe Ratio is a commonly used measure of risk-adjusted return. It is calculated by subtracting the "risk-free" return (usually 3 Month Treasury Bill) from the portfolio return and dividing the resulting "excess return" by the portfolio's risk level (standard deviation). The result is a measure of return gained per unit of risk taken.

Sortino Ratio is a downside risk-adjusted measure of value-added. It measures excess return over a benchmark divided by downside risk. The natural appeal is that it identifies value-added per unit of truly bad risk. The danger of interpretation, however, lies in these two areas: (1) the statistical significance of the denominator, and (2) its reliance on the persistence of skewness in return distributions.

Standard Deviation is a statistical measure of portfolio risk. It reflects the average deviation of the observations from their sample mean. Standard deviation is used as an estimate of risk since it measures how wide the range of returns typically is. The wider the typical range of returns, the higher the standard deviation of returns, and the higher the portfolio risk. If returns are normally distributed (ie. has a bell shaped curve distribution) then approximately 2/3 of the returns would occur within plus or minus one standard deviation from the sample mean.

Total Portfolio Risk is a measure of the volatility of the quarterly excess returns of an asset. Total risk is composed of two measures of risk: market (non-diversifiable or systematic) risk and residual (diversifiable or unsystematic) risk. The purpose of portfolio diversification is to reduce the residual risk of the portfolio.

Tracking Error is a statistical measure of a portfolio's risk relative to an index. It reflects the standard deviation of a portfolio's individual quarterly or monthly returns from the index's returns. Typically, the lower the Tracking Error, the more "index-like" the portfolio.

Treynor Ratio represents the portfolio's average excess return over a specified period divided by the beta relative to its benchmark over that same period. This measure reflects the reward over the risk-free rate relative to the systematic risk assumed.

Note: Alpha, Total Risk, and Residual Risk are annualized.

Fixed Income Portfolio Characteristics

All Portfolio Characteristics are derived by first calculating the characteristics for each security, and then calculating the market value weighted average of these values for the portfolio.

Allocation by Sector - Sector allocation is one of the tools which managers often use to add value without impacting the duration of the portfolio. The sector weights exhibit can be used to contrast a portfolio's weights with those of the index to identify any significant sector bets.

Average Coupon - The average coupon is the market value weighted average coupon of all securities in the portfolio. The total portfolio coupon payments per year are divided by the total portfolio par value.

Average Moody's Rating for Total Portfolio - A measure of the credit quality as determined by the individual security ratings. The ratings for each security, from Moody's Investor Service, are compiled into a composite rating for the whole portfolio. Quality symbols range from Aaa+ (highest investment quality - lowest credit risk) to C (lowest investment quality - highest credit risk).

Average Option Adjusted (Effective) Convexity - Convexity is a measure of the portfolio's exposure to interest rate risk. It is a measure of how much the duration of the portfolio will change given a change in interest rates. Generally, securities with negative convexities are considered to be risky in that changes in interest rates will result in disadvantageous changes in duration. When a security's duration changes it indicates that the stream of expected future cash-flows has changed, generally having a significant impact on the value of the security. The option adjusted convexity for each security in the portfolio is calculated using models developed by Lehman Brothers and Salomon Brothers which determine the expected stream of cash-flows for the security based on various interest rate scenarios. Expected cash-flows take into account any put or call options embedded in the security, any expected sinking-fund paydowns or any expected mortgage principal prepayments.

Average Option Adjusted (Effective) Duration - Duration is one measure of the portfolio's exposure to interest rate risk. Generally, the higher a portfolio's duration, the more that its value will change in response to interest rate changes. The option adjusted duration for each security in the portfolio is calculated using models developed by Lehman Brothers and Salomon Brothers which determine the expected stream of cash-flows for the security based on various interest rate scenarios. Expected cash-flows take into account any put or call options embedded in the security, any expected sinking-fund paydowns or any expected mortgage principal prepayments.

Average Price - The average price is equal to the portfolio market value divided by the number of securities in the portfolio. Portfolios with an average price above par will tend to generate more current income than those with an average price below par.

Average Years to Expected Maturity - This is a measure of the market-value-weighted average of the years to expected maturity across all of the securities in the portfolio. Expected years to maturity takes into account any put or call options embedded in the security, any expected sinking-fund paydowns or any expected mortgage principal prepayments.

Average Years to Stated Maturity - The average years to stated maturity is the market value weighted average time to stated maturity for all securities in the portfolio. This measure does not take into account imbedded options, sinking fund paydowns, or prepayments.

Current Yield - The current yield is the current annual income generated by the total portfolio market value. It is equal to the total portfolio coupon payments per year divided by the current total portfolio market value.

Fixed Income Portfolio Characteristics

Duration Dispersion - Duration dispersion is the market-value weighted standard deviation of the portfolio's individual security durations around the total portfolio duration. The higher the dispersion, the more variable the security durations relative to the total portfolio duration ("barbellness"), and the smaller the dispersion, the more concentrated the holdings' durations around the overall portfolio's ("bulletness"). The purpose of this statistic is to gauge the "bulletness" or "barbellness" of a portfolio relative to its total duration and to that of its benchmark index.

Effective Yield - The effective yield is the actual total annualized return that would be realized if all securities in the portfolio were held to their expected maturities. Effective yield is calculated as the internal rate of return, using the current market value and all expected future interest and principal cash flows. This measure incorporates sinking fund paydowns, expected mortgage principal prepayments, and the exercise of any "in-the-money" imbedded put or call options.

Weighted Average Life - The weighted average life of a security is the weighted average time to payment of all remaining principal. It is calculated by multiplying each expected future principal payment amount by the time left to the payment. This amount is then divided by the total amount of principal remaining. Weighted average life is commonly used as a measure of the investment life for pass-through security types for comparison to non-pass-through securities.

Important Disclosures

Information contained in this document may include confidential, trade secret and/or proprietary information of Callan and the client. It is incumbent upon the user to maintain such information in strict confidence. Neither this document nor any specific information contained herein is to be used other than by the intended recipient for its intended purpose.

The content of this document is particular to the client and should not be relied upon by any other individual or entity. There can be no assurance that the performance of any account or investment will be comparable to the performance information presented in this document.

Certain information herein has been compiled by Callan from a variety of sources believed to be reliable but for which Callan has not necessarily verified for accuracy or completeness. Information contained herein may not be current. Callan has no obligation to bring current the information contained herein.

Callan's performance, market value, and, if applicable, liability calculations are inherently estimates based on data available at the time each calculation is performed and may later be determined to be incorrect or require subsequent material adjustment due to many variables including, but not limited to, reliance on third party data, differences in calculation methodology, presence of illiquid assets, the timing and magnitude of unrecognized cash flows, and other data/assumptions needed to prepare such estimated calculations. In no event should the performance measurement and reporting services provided by Callan be used in the calculation, deliberation, policy determination, or any other action of the client as it pertains to determining amounts, timing or activity of contribution levels or funding amounts, rebalancing activity, benefit payments, distribution amounts, and/or performance-based fee amounts, unless the client understands and accepts the inherent limitations of Callan's estimated performance, market value, and liability calculations.

Callan's performance measurement service reports estimated returns for a portfolio and compares them against relevant benchmarks and peer groups, as appropriate; such service may also report on historical portfolio holdings, comparing them to holdings of relevant benchmarks and peer groups, as appropriate ("portfolio holdings analysis"). To the extent that Callan's reports include a portfolio holdings analysis, Callan relies entirely on holdings, pricing, characteristics, and risk data provided by third parties including custodian banks, record keepers, pricing services, index providers, and investment managers. Callan reports the performance and holdings data as received and does not attempt to audit or verify the holdings data. Callan is not responsible for the accuracy or completeness of the performance or holdings data received from third parties and such data may not have been verified for accuracy or completeness.

Callan's performance measurement service may report on illiquid asset classes, including, but not limited to, private real estate, private equity, private credit, hedge funds and infrastructure. The final valuation reports, which Callan receives from third parties, for of these types of asset classes may not be available at the time a Callan performance report is issued. As a result, the estimated returns and market values reported for these illiquid asset classes, as well as for any composites including these illiquid asset classes, including any total fund composite prepared, may not reflect final data, and therefore may be subject to revision in future quarters.

The content of this document may consist of statements of opinion, which are made as of the date they are expressed and are not statements of fact. The opinions expressed herein may change based upon changes in economic, market, financial and political conditions and other factors. OC SAN B1	Orange County SD - PEN B1

Investment Objective

Source	
OC SAN A1	Individual account based on Moderate - Strategic Blend. The dual goals of the Moderate Strategy are growth of principal and income. It is expected that dividend and interest income will comprise a significant portion of total return, although growth through capital appreciation is equally important. The portfolio will be allocated between equity and fixed income investments.
OC SAN B1	Individual account based on Balanced - Strategic Blend. The dual goals of the Balanced Strategy are growth of principal and income. While dividend and interest income are an important component of the objective's total return, it is expected that capital appreciation will comprise a larger portion of the total return. The portfolio will be allocated between equity and fixed income investments.

Investment Return
