EXECUTIVE SUMMARY

Background

In March 2022, Koff & Associates (“K&A”) conducted a comprehensive Total Compensation Study for Orange County Sanitation District (“OC San”). All market compensation findings are presented in this report.

This compensation review process was precipitated by the Board of Directors and management to:

- Ensure employees are recognized for the level and scope of work performed and that they are paid on a fair and competitive basis that allows OC San to recruit and retain a high-quality staff;
- Have a compensation plan that can meet the needs of OC San; and
- Ensure that internal relationships of salaries are based upon objective, non-quantitative evaluation factors, resulting in equity across OC San.

The goals of the compensation study are to assist OC San in developing a competitive pay and benefit plan, which is based upon market data, and to ensure that the plan is fiscally responsible and meets the needs of OC San with regards to recruitment and retention of qualified staff.

Summary of Findings

This report summarizes the study methodology, analytical tools, and the total compensation (salary and benefits) survey findings. The results of the total compensation study by employee group are shown in Table 1.

The Classic Plan – Closed (Plan H, 2.5%@55) is the Orange County Employees Retirement System (OCERS) plan. This plan is closed to all new hires.

The Classic Plan, Open (Plan B, 1.667%@57.5 also known as 2.43%@65) is the OCERS plan offered to employees hired on or after 10/01/10 (Professional and Supervisor, Management, Executives, and Confidential Exempt), 07/01/11 (Local 501), or 08/01/11 (OCEA and Confidential Non-Exempt) and before 01/01/13. New hire employees with reciprocity may be eligible for this plan.

The PEPRA Plan (Plan U, 2.5%@67 with reciprocity 2.43%@65) is the OCERS plan offered to employees hired on or after 01/01/13. This plan has the highest enrollment.

The market data shows that OC San’s benefits package with Plan H keeps OC San in a competitive position in the market compared to base salaries; whereas OC San’s benefits package with Plan B or Plan U puts OC San in a less competitive position compared to base salaries.

STUDY PROCESS

Benchmark Classifications

The study included 130 classifications, and of those 76 classifications were selected in order to collect salary and benefits data within the defined labor market. Classifications that we would expect to provide a sufficient sample for analysis were selected as “benchmarks” to use as the basis to build the compensation plan. Benchmark classifications are those classifications that are compared to the market, and these classifications are used as a means of anchoring OC San’s overall compensation plan to the market. Other classifications not surveyed will be included in the compensation plan and aligned to the benchmark classifications using internal equity principles.

** These classifications were recommended for a title change as part of the Classification Study to reflect the level and scope of work performed more clearly, to consolidate work into broader*

categories that could be used OC San-wide, as well as establish consistency with the labor market and industry standards. Any compensation recommendations are not dependent upon a new title, but upon the market value as defined by job scope, level and responsibilities, and the qualifications required for successful job performance.

Comparator Agencies

Another important step in conducting a market salary study is the determination of appropriate agencies for comparison. The study included the 17 Board-approved comparator agencies.

When selecting comparator agencies, the following are taken into consideration:

- 1. Organizational type and structure:** K&A generally recommends that agencies of a similar size and structure providing similar core services to that of OC San be used as comparators.

When it comes to organizational size, technical job classifications perform similar work across agencies so organizational size is not critical. The difference in size of an organization becomes more important when comparing management classes. Factors such as management of a large staff, consequence of error, the political nature of the job and its visibility all increase with organizational size. When it is difficult to find agencies that are similar in size, a good balance of smaller and larger agencies is used instead.

- 2. Staff, operational budgets, and scope of services and population:** Staff and operational budget size determine the amount of resources available for the agencies to provide services, and population size accounts for the ratio of resources to constituents served. Organizations providing the same services are ideal for comparison; therefore, most comparator agencies included provide similar services to OC San.

- 3. Geographic location and labor market:** Today's labor market reality is that many agencies are in competition for the same pool of qualified employees because large portions of the workforce do not live in the communities they serve, are accustomed to lengthy commutes, and are more likely to consider changing jobs in a larger geographic area than in the past. Therefore, the geographic labor market area where OC San may be recruiting from or losing employees to, is taken into consideration when selecting comparator organizations.

OC San's Board-approved labor market includes the 17 agencies presented in Table 3.

Salary and Benefits Data

The last element requiring discussion prior to beginning a market survey is the specific benefit data that will be collected and analyzed. The following salary and benefits data was collected for each benchmark classification (the cost of these benefits to each agency was converted into dollar amounts and can be found in the appendices II, III, and IV [see Benefits Detail spreadsheets] of this report; these amounts were added to base salaries for total compensation purposes).

1. Monthly Base Salary

The top of the salary range and/or control point. All figures are presented on a monthly basis.

2. Employee Retirement

The retirement reflects the following benefits offered to employees.

- **Retirement Formula:** The service retirement formula for each tier based on employment (i.e., hire) date was collected and reported. The tiers are based on OC San's retirement plans including:
 - **Plan H Summary Description:** Employees hired on or after 09/21/79 and before 10/01/10 (Professional & Supervisor, Management, Executive, and Confidential Exempt), 07/01/11 (Local 501), or 08/01/11 (OCEA and Confidential Non-Exempt) receive the 2.5%@55 benefit with OC San paying 3.5% of an eligible employee's base salary towards the employee's contribution to OCERS. This plan is closed to new employees.
 - **Plan B Summary Description:** Employees hired on or after 10/01/10 (Professional & Supervisor, Management, Executive, and Confidential Exempt), 07/01/11 (Local 501), or 08/01/11 (OCEA and Confidential Non-Exempt) and before 01/01/13 receive the 1.667%@57.5 (also known as 2.43%@65) benefit with OC San paying 0% of an eligible employee's base salary towards the employee's contribution to OCERS. Employees hired on or after 01/01/13 with reciprocity at other agencies may be eligible for this plan.
 - **Plan U Summary Description:** Employees hired on or after 01/01/13 (except those employees with reciprocity and are eligible for Plan B) receive the 2.5%@67 benefit with OC San paying 0% of an eligible employee's base salary towards the employee's contribution to OCERS. This plan has the highest enrollment.
- **Enhanced Formula Cost and 12 Months of Highest Salary:**
 - **Enhanced Formula Cost:** The baseline formula is 2%@62 for miscellaneous employees (in accordance with the Public Employees' Retirement System [PERS]). There is typically a cost to the employer for offering a formula with a higher benefit than the baseline formula. For each enhanced formula, the cost to the employer is based on a state-wide actuarial percentage calculated by PERS.
 - **12 Months of Highest Salary:** The base period for determining the average monthly pay rate when calculating retirement benefits is 36 highest paid consecutive months. When final compensation is based on a shorter period of time, such as 12 months' highest paid consecutive months, there is a cost to the employer. Similar to the enhanced formula, the cost to the employer is based on a state-wide actuarial percentage calculated by PERS.

Total Compensation Study – Final Report Orange County Sanitation District

The costs applied are presented below.

Formula	Enhanced Formula % Cost	12 Months Highest Salary % Cost
2%@60	1.3%	0.5%
2%@55	3.0%	0.5%
2.5%@55	5.3%	0.6%
2.7%@55	7.1%	0.7%
3%@60	8.1%	0.7%

- **Employer Paid Member Contribution:** The amount of the employee’s contribution to the retirement agency that is paid by the employer (Employer Paid Member Contribution).
- **Employer Paid Member Contribution Reported as Special Compensation:** The amount of the employer paid member contribution reported to the retirement agency as special compensation.
- **Employee Paid Employer Contribution:** The amount of the employer’s contribution to the retirement agency that is paid by the employee (reported as a deduction to total compensation).
- **Social Security:** If an employer participates in Social Security, then the employer contribution of 6.2% of the base salary up to the federally-determined maximum contribution of \$759.50 per month was reported.
- **Deferred Compensation:** Contributions provided to all employees of a classification with or without requiring the employee to make a contribution is reported.
- **Other:** Any other retirement contributions made by the employer.

3. Insurances

The employer paid premiums for an employee with family coverage were reported. The employer paid insurances included:

- Cafeteria/Flexible Benefit Plan
- Medical
- Dental
- Vision
- Other

4. Leaves

Other than sick leave, which is usage-based, the number of hours off for which the employer is obligated. All hours have been translated into direct salary costs.

- **Vacation:** The number of paid time off (or vacation) hours available to all employees who have completed five years of employment.
- **Holidays:** The number of holiday hours (including floating hours) available to employees.
- **Administrative:** Administrative (or management) leave is normally the number of paid leave hours available to Fair Labor Standards Act (“FLSA”) Exempt and/or management to reward for extraordinary effort (in lieu of overtime). This leave category may also include personal leave which may be available to augment vacation or other time off.

5. Technology Allowance

This category includes the provision of a technology allowance for the purchase of computers, cellular phones, and related technologies.

6. Auto Allowance

This category includes either the provision of an auto allowance or the provision of an auto for personal use only. If a vehicle is provided to any classification for commuting and other personal use, the average monthly rate is estimated at \$450. Mileage reimbursement is not included.

7. Other

This category includes any additional other benefits not captured above available to all in the class.

All of the benefit elements are negotiated benefits provided to all employees in the classification. As such, they represent an ongoing cost for which an agency must budget. Other benefit costs, such as sick leave, tuition reimbursement, and reimbursable mileage are usage-based and cannot be quantified on an individual employee basis.

Data Collection

Data was collected during the months of February and March 2022, through comparator agency websites, conversations with human resources, accounting, and/or finance personnel, and careful review of agency documentation such as classification descriptions, memoranda of understanding, organization charts, and other documents.

Matching Methodology

K&A believes that the data collection step is the most critical for maintaining the overall credibility of any study and relied on the classification descriptions revised as part of the classification study as the foundation for comparison.

When K&A researches and collects data from the comparator agencies to identify possible matches for each of the benchmark classifications, there is an assumption that comparable matches may not be made that are 100% equivalent to the classifications at OC San. Therefore, K&A does not match based upon job titles, which can often be misleading, but rather analyzes class descriptions before a comparable match is determined.

K&A's methodology is to analyze each class description and the whole position by evaluating factors such as:

- Definition and typical job functions;
- Distinguishing characteristics;
- Level within a class series (i.e., entry, experienced, journey, specialist, lead, etc.);
- Reporting relationship structure (for example, manages through lower-level staff);
- Education and experience requirements;
- Knowledge, abilities, and skills required to perform the work;
- The scope and complexity of the work;
- Independence of action/responsibility;
- The authority delegated to make decisions and take action;
- The responsibility for the work of others, program administration, and for budget dollars;
- Problem solving/ingenuity;
- Contacts with others (both inside and outside of the organization);
- Consequences of action and decisions; and
- Working conditions.

In order for a match to be included, K&A requires that a classification's "likeness" be at approximately 70% of the matched classification.

When an appropriate match is not identified for one classification, K&A often uses "hybrids" which can be functional or represent a span in scope of responsibility. A functional hybrid means that the job of one classification at OC San is performed by two or more classifications at a comparator agency. A "hybrid" representing a span in scope means that the comparator agency has one class that is "bigger" in scope and responsibility and one class that is "smaller," where OC San's class falls in the middle.

If an appropriate match could not be found, then no match was reported as a non-comparable (N/C).

Data Spreadsheets

For each benchmark classification, there are three information pages:

1. Top Monthly Base Salary
2. Benefits Detail
3. Total Compensation Data (base salary + benefits)

The average (mean), median (midpoint or 50th percentile), and 75th percentile of the comparator agencies are reported on the top monthly salary and total compensation data spreadsheets. The % above or below that OC San is compared to these market calculations is also reported.

The mean is the sum of the comparator agencies' salaries/total compensation divided by the number of matches. The median is the 50th percentile of all data with 50% of data points below and 50% of data points above. The 75th percentile is the point in the data array with 75% of data points below and 25% of data points above.

Finally, K&A reported and presented the percentile that OC San falls within the data array.

In order to calculate the market calculations, K&A requires that there be a minimum of four comparator agencies with matching classifications to the benchmark classification. The reason for requiring a minimum of four matches is so that no one classification has undue influence on the calculations. Sufficient data was collected from the comparator agencies for 74 of the 76 benchmark classifications.

When using survey data to make salary range recommendations and adjustments, K&A usually recommends using the median, rather than the mean, because the median is not skewed by extremely high or low salary values. OC San has a history of targeting an aggregate market position of the 75th percentile since 1995 to attract and retain highly qualified employees.

MARKET COMPENSATION FINDINGS

The following table represents a summary of the market top monthly (base) salary and total compensation (base salary plus benefits [retirement, insurance, leaves, and allowances]) findings. For each benchmark classification, the number of matches (agencies with a comparable position), employee group, and percent above or below the top monthly salary 75th percentile, sorted alphabetically is presented in Table 4.

Generally, a classification falling within 5% (either above or below) of the 75th percentile is considered to be competitive in the labor market for salary survey purposes because of the differences in compensation policy, actual scope of work, and position requirements. However, OC San can adopt a different standard.

Overall, the differences between market base salaries and total compensation indicate that OC San’s benefits package with Plans B (Classic – Open) and Plan U (PEPRA), puts OC San at a less competitive advantage. Further analysis indicates that, on average, classifications are 1.0% above the market 75th percentile for base salaries, while that figure changes to 1.1% above the market 75th percentile for total compensation with Plan H (Classic – Closed), 3.7 below the market 75th percentile for total compensation with Plan B (Classic – Open), and 2.2% below the market 75th percentile for total compensation with Plan U (PEPRA).

Benefits

The market benefits data reveals the major contributing factor that puts OC San in a less competitive advantage compared to the market is OC San’s retirement benefits.

Plan B (Classic – Open): Of the 17 comparator agencies, 15 offer a defined benefit plan, such as Orange County Employees Retirement System (OCERS) or Public Employees Retirement System (PERS); and of the 15 agencies, 11 agencies offer a retirement formula with richer benefits compared to OC San’s Plan B (Classic – Open) retirement benefit. Furthermore, 8 of those agencies also provide the enhanced retirement benefit of calculating final compensation based on 12 months highest salary. In addition, 11 of the comparator agencies provide a matching or direct contribution to deferred compensation.

Plan U (PEPRA): After the implementation of PEPRA effective January 1, 2013, most retirement systems implemented retirement benefits comparable across all systems. The factors that put OC San in a less competitive position to the market compared to base salaries are a combination of participation in Social Security, contributions to deferred compensation, and contributions to “other” retirement benefits. OC San offers Professional, Supervisor, Management, and Executive classifications an Investment Incentive Salary benefit; and contributions range from 4-6% plus an additional \$1,250 per year. Whereas, at the comparator agencies, 10 of the agencies provide a larger dollar amount contribution per month in terms of the contribution to Social Security, contributions to deferred compensation, and/or contributions to “other” retirement benefits.

INTERNAL SALARY RELATIONSHIPS

Building from the salary levels established for identified benchmark classes, internal salary relationships can be developed and consistently applied in order to develop specific salary recommendations for all non-benchmarked classifications.

In the future, OC San may need to utilize internal alignment practices if the number of staff grows and additional classifications are added or classifications change. While analyzing internal relationships, the same whole position factors analyzed when comparing OC San’s classifications to the labor market should be used when making internal salary alignment recommendations (see whole position factors are listed under Matching Methodology).

In addition, the following are standard human resources practices that are commonly applied when making salary recommendations based upon internal relationships:

- A salary within 5% of the organization’s targeted market position (above or below), which for OC San is the 75th percentile, is considered to be competitive in the labor market for salary survey purposes because of the differences in compensation policy and actual scope of the position and its requirements. However, OC San can adopt a closer standard.
- Certain internal percentages are often applied. Those that are the most common are:
 - The differential between a trainee and experienced (or journey) class in a series (I/II or Trainee/Experienced) is generally 10% to 15%.
 - A lead or advanced journey-level (III or Senior-level) class is generally placed 10% to 15% above the journey-level.
 - A full supervisory class is normally placed at least 10% to 25% above the highest level supervised, depending upon the breadth and scope of supervision.
- When a market or internal equity adjustment is granted to one class in a series, the other classes in the series are also adjusted accordingly to maintain internal equity.

Internal equity between certain levels of classifications is a fundamental factor to be considered when making salary decisions. When conducting a market compensation survey, results can often show that certain classifications that are aligned with each other are not the same in the outside labor market. However, as an organization, careful consideration should be given to these alignments because they represent internal value of classifications within job families, as well as across the organization.

For the non-benchmarked classifications, internal alignments with other classifications will need to be considered, either in the same class series or those classifications that have similar scope of work, level of responsibility, and “worth” to OC San. Where it is difficult to ascertain internal relationships due to unique qualifications and responsibilities, reliance can be placed on past internal relationships. It is important for OC San’s management to carefully review these internal relationships and determine if they are still appropriate given the current market data.

It is also important to analyze market data and internal relationships within class series as well as across the organization, and make adjustments to salary range placements, as necessary, based on the needs of the organization.

OC San may want to make internal equity adjustments or alignments, as it implements the compensation strategy. This market survey is only a tool to be used by OC San to determine market indexing and salary determination.

Pay Philosophy

OC San has many options regarding what type of compensation plan it wants to implement. This decision will be based on what OC San’s pay philosophy is, at which level it desires to pay its employees compared to the market, whether it is going to consider additional alternative compensation programs, and how great the competition is with other agencies over recruitment of a highly-qualified workforce.

As noted, OC San has a history of targeting an aggregate market position of the 75th percentile since 1995 to attract and retain highly qualified employees.

USING THE MARKET DATA AS A TOOL

K&A would like to reiterate that this report and the findings are meant to be a tool for OC San to create and implement an equitable compensation plan. Compensation strategies are designed to attract and retain excellent staff; however, financial realities and OC San's expectations may also come into play when determining appropriate compensation philosophies and strategies. The collected data presented herein represents a market survey that will give OC San an instrument to make future compensation decisions.

It has been a pleasure working with the Orange County Sanitation District on this critical project. Please do not hesitate to contact us if we can provide any additional information or clarification regarding this report.
