STAFF REPORT

Treasurer's Report For the Period Ended September 30, 2025

SUMMARY

Section 18.0 of the Orange County Sanitation District's (OC San) Investment Policy includes quarterly reporting requirements for OC San's two investment portfolios. These two funds, the "Liquid Operating Monies," and the "Long-Term Operating Monies" are managed by Insight Investment (Insight), OC San's external money manager.

The ongoing monitoring of OC San's investment program by staff and Callan LLC (Callan), OC San's independent investment advisor, indicates that OC San's investments are in compliance with OC San's adopted Investment Policy and the California Government Code, and that overall performance has tracked with benchmark indices. In addition, sufficient liquidity and anticipated revenues are available for OC San to meet budgeted expenditures for the next six months. OC San's portfolios do not include any reverse repurchase agreements or derivative securities.

ADDITIONAL INFORMATION

Performance Reports

The Quarterly Investment Report, prepared by Insight, and the Investment Measurement Service Quarterly Review, prepared by Callan, as of September 30, 2025, are attached for reference. The Liquid Operating portfolio, with an average maturity of 116 days, consists entirely of high quality fixed income investments consistent with OC San's investment policy. Also included within the attachments are:

- Performance results in comparison with the ICE BAML 3-month treasury bill index for the liquid operating portfolio; and the ICE BAML Corp./Govt. 1-5 Year Bond index for the long-term portfolio as identified in the investment policy.
- A listing of individual securities held at the end of each reporting period.

Cost and market values of the portfolios:

	<u>Liquid Operating</u>	<u>Long-Term</u>
Cost	\$65.2 M	\$625.5 M
Market Value	\$65.4 M	\$635.1 M

Modified duration of the portfolio compared to the Benchmark.

	Liquid Operating	Long-Term
OC San Policy	< 0.50	< 5.00
Benchmark	0.16	2.50
Portfolio	0.23	2.66

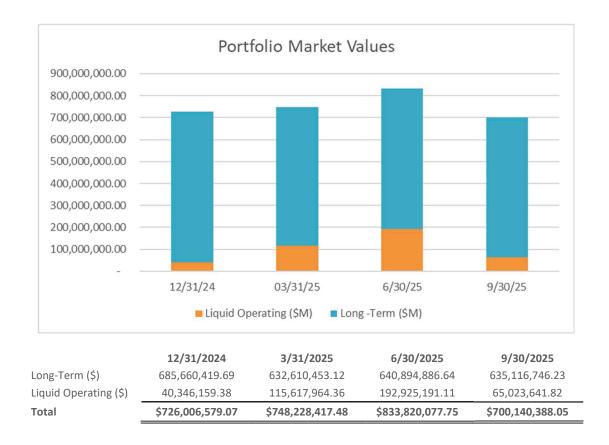

- The percent of the Liquid Operating Monies portfolio maturing within 90 days: 43.5%
- Average portfolio credit quality:
 Liquid Operating AA
 Long-Term AA
- Percent of portfolio with credit ratings below "A" by any rating agency and a description of such securities:

Liquid Operating – Percent of portfolio – 0.00% Long-Term – Percent of portfolio – 0.00%

 All investments are in compliance with the investment policy and the California Government Code, except for the following Lehman Brother holdings that OC San is pursuing collection through the bankruptcy court:

Lehman Brothers Note-Defaulted \$600,000 par value purchased 9/19/2008 Lehman Brothers Note-Defaulted \$2,000,000 par value purchased 9/18/2008

SEPTEMBER 2025

ORANGE COUNTY SANITATION DISTRICT (OC SAN)

QUARTERLY REVIEW

ECONOMIC REVIEW & OUTLOOK

The economic environment in the third quarter was marked by a combination of ongoing resilience and emerging signs of weakness. The Federal Reserve took center stage with a widely expected 25 basis point rate cut, bringing the federal funds rate to a target range of 4.00% to 4.25% in September—its first rate reduction of the year. This move came amid persistent inflationary pressures, as headline inflation climbed to 2.9% year-on-year in August from 2.4% in May. Rising energy prices and increases in core goods—some reflecting the impact of new tariffs—contributed to the uptick. Core inflation stayed above the Fed's 2% target, driven by stubbornly high shelter costs and higher prices in categories like airline fares.

The labor market showed clear signs of cooling. In August, the economy added only 22,000 new jobs, and the unemployment rate ticked up to 4.3%. There were notable downward revisions to prior payroll data, and manufacturing employment fell by over 30,000 during the quarter. Wage growth continued its gradual slowdown, with average hourly earnings increasing by 3.7% year-on-year, maintaining a downward trend that began in early 2022.

Trade policy developments added to the uncertain backdrop. The US reinstated tariff hikes following the expiration of a 90-day pause, imposing new duties on imports from China, Canada, Mexico, and Switzerland, and threatening India over Russian oil imports. These actions injected further volatility into trade flows and contributed to the sense of unpredictability in the business environment.

U.S. Bureau of Labor Statistics (BLS), Federal Reserve Bank of Dallas, Federal Reserve Bank of Atlanta, as of October 13, 2025.

Despite these headwinds, the US economy demonstrated underlying strength. Second quarter GDP growth was revised upward to an annualized rate of 3.8%, supported by robust consumer spending and strong investment, especially in artificial intelligence infrastructure, software, and research and development.

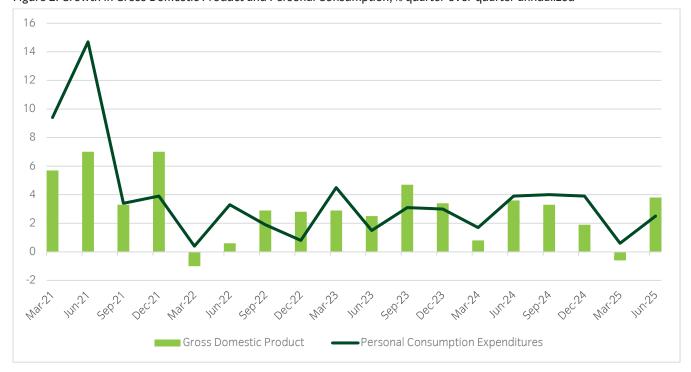

Figure 2: Growth in Gross Domestic Product and Personal Consumption, % quarter-over-quarter annualized²

The outlook for U.S. economic growth remains subdued, with expansion rates predicted to be in the 1% to 2% range—well below the historical average for the economy. Inflation is expected to stay persistently above the Federal Reserve's target in some areas, and further rate cuts will likely hinge on both inflation expectations and the health of the labor market. The impact of U.S. trade tariffs presents a significant variable for both growth and inflation going forward. We anticipate that the Federal Reserve will ease monetary policy further before reaching a neutral stance, with additional uncertainty looming in 2026 as the appointment of a new Fed Chair approaches.

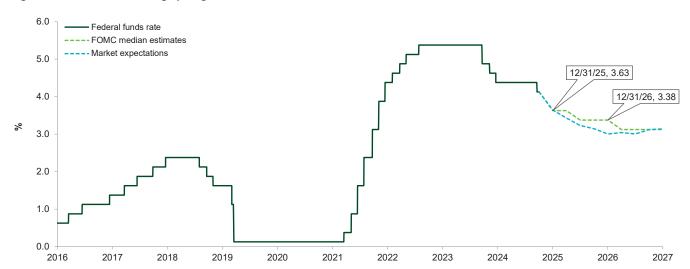

Figure 3: Fed resumes cutting cycle given risks to labor market³

³ Source: Bloomberg, as of October 2, 2025.

MARKET REVIEW & OUTLOOK

Governments

Following the resumption of its rate-cutting cycle after a nine-month pause, the Fed is now focusing attention on both labor market conditions and the effects of tariffs. We expect further rate cuts through 2025 and possibly into 2026, bringing the Fed funds rate down to a range of 3.00% to 3.25%. Treasury yields are likely to decline, with the 5-year yield expected to fall below 3.5% over the next 12 months. The combination of political pressures on the Fed and expansive fiscal policies continues to create the potential for increased volatility in the bond market.

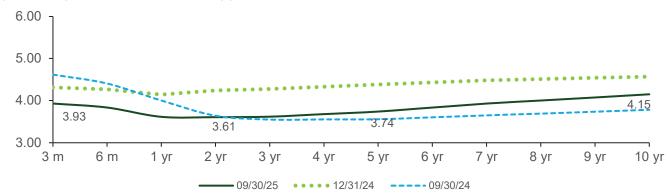

Figure 4: Comparative historical US Treasury yield curves4

Investment Grade Corporate Credit

Issuance of corporate bonds has risen, but robust investor demand continues to outweigh supply, contributing to a steady tightening of credit spreads. These spreads remain close to the lower end of historical ranges, and strong demand suggests this trend could persist for some time. Historically, such conditions were seen in the 1990s, when credit spreads narrowed even further after the Federal Reserve initiated rate cuts.

Absolute yield levels continue to be a major driver of investor interest, and this dynamic is likely to remain in place, especially as the U.S. economy is expected to avoid recession. Increased business investment fueled by advances in artificial intelligence is helping to counterbalance a softening labor market, while the Federal Reserve is widely anticipated to cut rates further over the coming quarters. With these factors in mind, we maintain a cautiously constructive outlook for corporate bonds.

Structured credit / Secured finance

Asset-backed markets have delivered mostly carry-driven returns over the summer, underpinned by limited new supply and strong investor demand, which has contributed to a gradual tightening of spreads. Notably, specialized deals—especially those tied to data center financing and investments in artificial intelligence—are drawing increasing interest from investors. We expect issuance to remain active into the early part of the fourth quarter, which could lead to modest spread widening if overall risk appetite starts to weaken.

From a collateral standpoint, steady economic growth is helping support consumers, even as some areas like the labor market are showing signs of gradual softening. Anticipated easing by the Federal Reserve should further aid consumer resilience. Our preference is for asset-backed securities with senior positions in the capital structure and strong structural protections that can redirect cashflow if the underlying assets underperform.

Municipal bonds

Given the current environment of heightened policy uncertainty and expectations for slower economic growth, we continue to favor defensive sectors within the municipal bond market, particularly public power and water/sewer utilities. These areas are distinguished by their essential role in daily life, stable operations, and reliable cash flows. In contrast, we remain generally underweight in state and local general obligation bonds, which offer less premium than historical averages compared to Treasuries. We are also cautious about healthcare-related bonds, as rising labor and equipment costs present ongoing challenges for the sector.

⁴ Source: Bloomberg, as of September 30, 2025.

LONG TERM PORTFOLIO

The Long Term portfolio maintained a longer duration and maturity than its benchmark. In August, the employment report showed lower job growth, prompting the Federal Reserve to cut rates by 25bps. Treasury yields dropped, leading to positive returns and outperformance versus the benchmark. This position should continue to benefit the portfolio as yields fall, although much of the Fed's expected action is already reflected in prices.

Corporate and credit fixed income remained strong, with corporate yield spreads hitting cycle lows after April's volatility. Lower spreads and Treasury yields resulted in positive returns for credit. The Bloomberg US Corporate index spread is now as tight as before the 2009 crisis. While credit conditions remain favorable, US Agency investments (such as MBS and callable securities) offer similar yields to high-quality corporates. Following tactical corporate purchases during the second quarter, the portfolio is now shifting towards more government agency exposure.

OC San withdrew \$15 million from the Long Term portfolio to help fund capital expenses in July. Additional withdrawals may be needed in 2026, but the portfolio is prepared, with \$235 million in Treasuries available. Other liquid assets can be sold if needed.

⁵ Performance inception date: February 29, 2024.

LIQUID OPERATING PORTFOLIO

OC San withdrew \$130 million from the Liquid Operating portfolio during the quarter. With additional withdrawals anticipated, the portfolio is projected to reach its \$40 million minimum balance by February 2026. To address these upcoming cash needs, the portfolio strategy has emphasized cash-matching investments to align with expected withdrawal dates while also maintaining sufficient contingent liquidity in case cash requirements exceed current estimates. This cash flow activity has resulted in a longer portfolio duration, bringing it more in line with the Treasury Bill benchmark.

Cash markets continue to function normally. The Federal Reserve remains committed to balance sheet normalization, reducing its holdings by \$5 billion in Treasuries each month. Fed officials continue to describe system reserves as sufficiently abundant. Meanwhile, Treasury Bill issuance is expected to increase as the Treasury works to shorten the duration profile of outstanding debt.

IMPORTANT INFORMATION

IMPORTANT DISCLOSURES

This document has been prepared by Insight North America LLC (INA), a registered investment adviser under the Investment Advisers Act of 1940 and regulated by the US Securities and Exchange Commission. INA is part of 'Insight' or 'Insight Investment', the corporate brand for certain asset management companies operated by Insight Investment Management Limited including, among others, Insight Investment Management (Global) Limited, Insight Investment International Limited and Insight Investment Management (Europe) Limited (IIMEL).

Opinions expressed herein are current opinions of Insight, and are subject to change without notice. Insight assumes no responsibility to update such information or to notify a client of any changes. Any outlooks, forecasts or portfolio weightings presented herein are as of the date appearing on this material only and are also subject to change without notice. Insight disclaims any responsibility to update such views. No forecasts can be guaranteed.

Nothing in this document is intended to constitute an offer or solicitation to sell or a solicitation of an offer to buy any product or service (nor shall any product or service be offered or sold to any person) in any jurisdiction in which either (a) INA is not licensed to conduct business, and/or (b) an offer, solicitation, purchase or sale would be unavailable or unlawful.

This document should not be duplicated, amended, or forwarded to a third party without consent from INA. This is a marketing document intended for institutional investors only and should not be made available to or relied upon by retail investors. This material is provided for general information only and should not be construed as investment advice or a recommendation. You should consult with your adviser to determine whether any particular investment strategy is appropriate.

Assets under management (AUM) represented by the value of the client's assets or liabilities Insight is asked to manage. These will primarily be the mark-to-market value of securities managed on behalf of clients, including collateral if applicable. Where a client mandate requires Insight to manage some or all of a client's liabilities (e.g. LDI strategies), AUM will be equal to the value of the client specific liability benchmark and/or the notional value of other risk exposure through the use of derivatives. Regulatory assets under management without exposures can be provided upon request. Unless otherwise specified, the performance shown herein is that of Insight Investment (for Global Investment Performance Standards (GIPS), the 'firm') and not specifically of Insight North America. A copy of the GIPS composite disclosure page is available upon request.

Past performance is not a guide to future performance, which will vary. The value of investments and any income from them will fluctuate and is not guaranteed (this may partly be due to exchange rate changes). Future returns are not guaranteed and a loss of principal may occur.

Targeted returns intend to demonstrate that the strategy is managed in such a manner as to seek to achieve the target return over a normal market cycle based on what Insight has observed in the market, generally, over the course of an investment cycle. In no circumstances should the targeted returns be regarded as a representation, warranty or prediction that the specific deal will reflect any particular performance or that it will achieve or is likely to achieve any particular result or that investors will be able to avoid losses, including total losses of their investment.

The information shown is derived from a representative account deemed to appropriately represent the management styles herein. Each investor's portfolio is individually managed and may vary from the information shown. The mention of a specific security is not a recommendation to buy or sell such security. The specific securities identified are not representative of all the securities purchased, sold or recommended for advisory clients. It should not be assumed that an investment in the securities identified will be profitable. Actual holdings will vary for each client and there is no guarantee that a particular client's account will hold any or all of the securities listed.

The quoted benchmarks within this document do not reflect deductions for fees, expenses or taxes. These benchmarks are unmanaged and cannot be purchased directly by investors. Benchmark performance is shown for illustrative purposes only and does not predict or depict the performance of any investment. There may be material factors relevant to any such comparison such as differences in volatility, and regulatory and legal restrictions between the indices shown and the strategy.

Transactions in foreign securities may be executed and settled in local markets. Performance comparisons will be affected by changes in interest rates. Investment returns fluctuate due to changes in market conditions. Investment involves risk, including the possible loss of principal. No assurance can be given that the performance objectives of a given strategy will be achieved.

Insight does not provide tax or legal advice to its clients and all investors are strongly urged to consult their tax and legal advisors regarding any potential strategy or investment.

Information herein may contain, include or is based upon forward-looking statements within the meaning of the federal securities laws, specifically Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include all statements, other than statements of historical fact, that address future activities, events or developments, including without limitation, business or investment strategy or measures to implement strategy, competitive strengths, goals expansion and growth of our business, plans, prospects and references to future or success. You can identify these statements by the fact that they do not relate strictly to historical or current facts. Words such as 'anticipate', 'estimate', 'expect', 'project', 'intend', 'plan', 'believe', and other similar words are intended to identify these forward-looking statements. Forward-looking statements can be affected by inaccurate assumptions or by known or unknown risks and uncertainties. Many such factors will be important in determining our actual future results or outcomes.

Consequently, no forward-looking statement can be guaranteed. Our actual results or outcomes may vary materially. Given these uncertainties, you should not place undue reliance on these forward-looking statements.

- Portfolio update
- Compliance summary
- Important disclosures

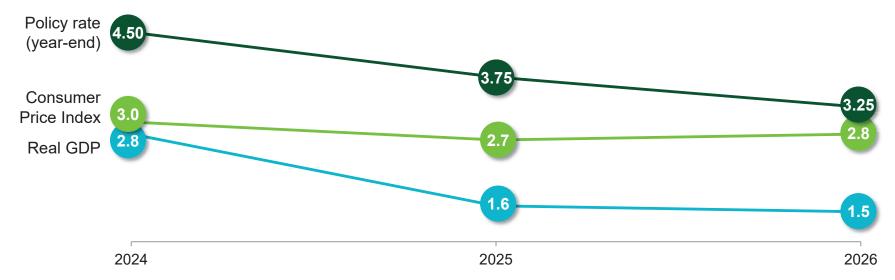

Economic review and outlook

Key takeaways

- The US economy is increasingly vulnerable to downside risks as the effects of tight policy via tariffs and immigration crackdowns continue to reverberate across the economy
- While the Fed may still be concerned with the full inflationary effects of tariffs, the rising labor market stress should be the
 overriding factor in the upcoming rate decisions and may potentially open the door for more aggressive easing
- We expect the Fed easing will help stabilize conditions, and as the drag from policy uncertainty and trade tensions fades, the economy should start reaccelerating in the first half of 2026
- Due to the ongoing government shutdown, updates to certain macroeconomic data used in this report will be delayed until federal government operations resume.

Insight INVESTMENT

Disclosures

Past performance is not indicative of future results. Investment in any strategy involves a risk of loss which may partly be due to exchange rate fluctuations.

The performance results shown, whether net or gross of investment management fees, reflect the reinvestment of dividends and/or income and other earnings. Any gross of fees performance does not include fees and charges and these can have a material detrimental effect on the performance of an investment. The performance shown is for the stated time period(s) only.

Any target performance aims are not a guarantee, may not be achieved and a capital loss may occur. Funds which have a higher performance aim generally take more risk to achieve this and so have a greater potential for the returns to be significantly different than expected. Investments are subject to risks, including loss of principal. There can be no guarantee that any investment strategy will meet the liability funding needs of a particular client.

Performance information for certain accounts may reflect performance achieved while the account was managed at a prior firm. In addition, the performance and customized benchmark information for these periods are based on Information from 3rd parties that Insight believes to be accurate, but Insight has not independently verified such information and no representation is made regarding its accuracy or completeness.

The quoted benchmarks do not reflect deductions for fees, expenses or taxes. These benchmarks are unmanaged and cannot be purchased directly by investors. Benchmark performance is shown for illustrative purposes only and does not predict or depict the performance of any investment. There may be material factors relevant to any such comparison such as differences in volatility, and regulatory and legal restrictions between the indices shown and the strategy.

Any currency conversions performed for this presentation, use FX rates as per WM Reuters 4pm spot rates, unless noted otherwise.

Funds and portfolios with an ESG objective follow a sustainable or ESG related investment approach, which may cause them to perform differently than funds that are not required to integrate sustainable investment criteria when selecting securities. Funds and portfolios with no ESG objective are not required to integrate sustainable investment criteria when selecting securities so any ESG approach shown is only indicative and there is no guarantee that the specific approach will be applied across the whole portfolio.

This is a client report intended for professional clients only. This material is for professional clients only and is not intended for distribution to retail clients. This document must not be used for the purpose of an offer or solicitation in any jurisdiction or in any circumstances in which such offer or solicitation is unlawful or otherwise not permitted. This document is intended only for the parties to whom it was delivered or its authorised agents and should not be copied or passed to any other person. Please contact the Client Services Team if there has been any change in your financial circumstances or risk tolerance since the previous valuation that could affect the investment objective of your portfolio. Insight obtains market data and prices from an independent pricing source for all of our currency positions on a daily basis. For trading activity the Clearing broker will be reflected. In certain cases the Clearing broker will differ from the Executing broker.

Some information contained in this client report comes from external sources which Insight believes to be reliable. A list of sources is available on request. All statistics represent month end figures unless otherwise noted. It should not be assumed that any of the security transactions or holdings referenced herein have been or will prove to be profitable or that future investment decisions will be profitable or will equal or exceed the past investment performance of the securities listed. Tax treatment depends on the individual circumstances of each investor and may be subject to change in the future. Insight does not provide tax or legal advice to its clients and all investors are strongly urged to seek professional advice regarding any potential strategy or investment. Material in this publication is for general information only and is not advice, investment advice, or the recommendation of any purchase or sale of any security.

Insight Investment is the corporate brand for certain companies operated by Insight Investment Management Limited (IIML). Insight includes, among others, Insight Investment Management (Global) Limited (IIMG), Insight Investment International Limited (IIIL) and Insight North America LLC (INA), each of which provides asset management services. This group of companies may be referred to as 'Insight' or 'Insight Investment'.

Please compare the information provided in this statement to the information provided in the statement received from your Custodian. This report is not intended to replace your custodial statement which is your official record for all pertinent account information. Please notify us promptly if you do not receive from your custodian on at least a quarterly basis account statements that contain the amount of funds and each security in the account at the end of the period and all transactions in the account during that period.

Insight INVESTMENT

Disclosures (continued)

For clients based in North America:

This material is for professional clients only and is not intended for distribution to retail clients.

Investment advisory services in North America are provided through two different investment advisers registered with the Securities and Exchange Commission (SEC), using the brand Insight Investment: Insight North America LLC (INA) and Insight Investment International Limited (IIIL). The North American investment advisers are associated with other global investment managers that also (individually and collectively) use the corporate brand Insight Investment and may be referred to as 'Insight' or 'Insight Investment'. INA is registered with the CFTC as a Commodity Trading Advisor and a Commodity Pool Operator and are members of the NFA

Information about the indices shown here is provided to allow for comparison of the performance of the strategy to that of certain well-known and widely recognized indices. There is no representation that such index is an appropriate benchmark for such comparison. You cannot invest directly in an index and the indices represented do not take into account trading commissions and/or other brokerage or custodial costs. The volatility of the indices may be materially different from that of the strategy. In addition, the strategy's holdings may differ substantially from the securities that comprise the indices shown.

The ICE BofA 3 Month US T-Bill index is an unmanaged market index of U.S. Treasury securities maturing in 90 days that assumes reinvestment of all income.

The ICE BofA 6 Month US T-Bill index measures the performance of Treasury bills with time to maturity of less than 6 months.

The ICE BofA 1-Year US Treasury Index is a one-security index comprised of the most recently issued 1-year US Treasury note. The index is rebalanced monthly. In order to qualify for inclusion, a 1-year note must be auctioned on or before the third business day before the last business day of the month.

The ICE BofA 3-Year US Treasury Index is a one-security index comprised of the most recently issued 3-year US Treasury note. The index is rebalanced monthly. In order to qualify for inclusion, a 3-year note must be auctioned on or before the third business day before the last business day of the month.

The ICE BofA 5-Year US Treasury Index is a one-security index comprised of the most recently issued 5-year US Treasury note. The index is rebalanced monthly. In order to qualify for inclusion, a 5-year note must be auctioned on or before the third business day before the last business day of the month.

The ICE BofA 1-3 US Year Treasury Index is an unmanaged index that tracks the performance of the direct sovereign debt of the U.S. Government having a maturity of at least one year and less than three years.

The ICE BofA 1-5 US Year Treasury Index is an unmanaged index that tracks the performance of the direct sovereign debt of the U.S. Government having a maturity of at least one year and less than five years.

Recent Developments

- Effective March 1, 2024 Insight Investment Management became the investment manager for the District's Long-Term Operating Fund and the Liquid Operating Monies, replacing Chandler Asset Management.
- During the quarter, \$15 million was distributed from the Long-Term Operating Fund and \$150 million was distributed from the Liquid Operating Monies.

Organizational Issues

— N/A

Fixed Income Market Snapshot

— Fixed income markets posted broad-based gains in 3Q25. The U.S. Treasury yield curve steepened modestly as the front end fell more sharply in anticipation of Fed cuts, while the long end shifted marginally lower but remained elevated. The Bloomberg US Aggregate Bond Index advanced 2.0% (+6.1% YTD) as yields declined.

Callan

Investment grade corporate bonds outperformed securitized (MBS, CMBS, ABS) on a like-duration basis as corporate option-adjusted spreads continued tightening and reached levels last seen in the pre-GFC period. Within leveraged finance, spreads also continued to grind tighter as the Bloomberg US High Yield Index rose 2.5% and the Morningstar LSTA Leveraged Loan Index advanced 1.8%, supported by strong CLO demand. The Bloomberg TIPS Index gained 2.1% (+6.9% YTD) as the 10-year breakeven increased and implied 10-year real yield declined. Municipals generated solid returns (Bloomberg Muni: +3.0%), aided by favorable technicals and strong demand.

Investment Manager Performance

- The Long-Term Operating Fund returned 1.3% in the third quarter, narrowly trailing the ICE Corporate/Government 1–5 Year Index by 2 bps, and in line with the Bloomberg Government/Credit 1–5 Year Index. The Fund ranked 86th percentile in the Callan Short Term Fixed Income peer group. Over the last year, the portfolio returned 4.4%, outperforming the ICE benchmark by 27 bps and the Bloomberg benchmark by 32 bps. The Fund ranked 85th percentile.
- The Liquid Operating Money rose 1.2% (net) over the quarter, outperforming the Citigroup 3-Month Treasury Bill Index return by 13 bps, and ranking 29th percentile in the Callan Money Market Funds peer group. Over the last year, the portfolio returned 4.6% (net), marginally ahead of the benchmark by 2 bps, and ranking in the 35th percentile.

U.S. EQUITIES

Another strong quarter for U.S. stocks

- The S&P 500 Index jumped 8.1% in 3Q25, supported by strong corporate earnings growth and guidance.
- 10 out of the 11 S&P sectors posted gains. Information Technology (+13%), Communication Services (+12%), and Consumer Discretionary (+10%) led the pack, supported by the continued strength of the AI ecosystem.
- Consumer Staples was down (-2%) after tough July and September results. Its typical defensive posturing, combined with softened consumer spending trends, caused it to struggle in a highly risk-on market environment.
- Small cap indices outperformed large cap indices, a reversal in performance patterns observed during 2Q25.
- Style leadership was mixed. Growth outperformed value in large cap while value slightly outpaced growth in small cap.

Strong risk on rally

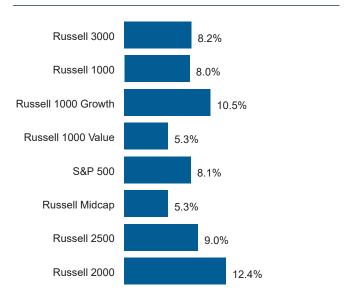

- Since the market bottom on 4/8, low quality stocks have led the markets. For example, in the Russell 2500 Growth Index, non-earners were up ~70% from 4/8 to the end of 3Q; during 3Q alone, non-earners were up over 25%. By comparison, positive earning stocks were up 35% and 8%, respectively.
- Speculative/retail investor momentum favored stocks within biopharma, cryptocurrency, and quantum computing.
- Many managers have zero exposure or an underweight to biopharma due to reticence around investing in binary outcomes or lack of in-house biopharma expertise.
 Cryptocurrency and quantum computing are viewed as areas that lack fundamental strength for long-term investing.

Al continues to dominate

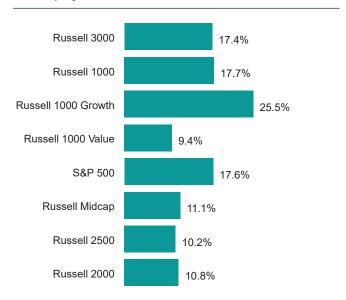

- Since the rollout of ChatGPT at the end of 2022, Al infrastructure spend in both the private and public sectors has increased exponentially.
- That increased spend—and subsequent investor enthusiasm
 exacerbates market concentration issues.

Services

GLOBAL EQUITIES

Lagged in 3Q but maintain YTD lead

Broad market

- Global ex-U.S. equities modestly underperformed the U.S. in 3Q25 but remained ahead year-to-date.
- Emerging markets led developed markets higher.
- Accommodative monetary policy in emerging markets, fiscal support in China, and a U.S.-Japan trade deal supported ex-U.S. performance.
- Global ex-U.S. small caps kept pace with global ex-U.S. large caps while U.S. small caps outpaced large cap.
- China was the clear leader, supported by government intervention and easing trade tensions with the U.S.

Growth vs. value

- Value outperformed growth in developed ex-U.S, markets while growth outperformed value in emerging markets.
- Technology companies, semiconductors, and European banks led markets while health care stocks were laggards.

U.S. dollar stabilizes after decline

 The U.S. dollar stabilized (+0.9%) after a sharp decline in the first half of the year (-10%), reducing the currency tailwind for non-U.S. markets.

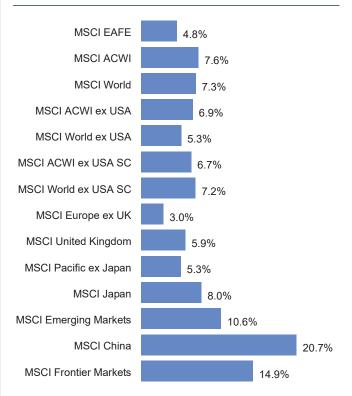

EAFE returns driven by Financials and Industrials

- Through the first three quarters, EAFE returns have been dominated by Financials and Industrials, accounting for 60% of the total index returns.
- This follows a trend from 2024, where those sectors added 5.5% to total returns, while the rest of the index fell 1.7%.
- For active EAFE investors, much of their performance can be explained by their weighting to these two sectors.

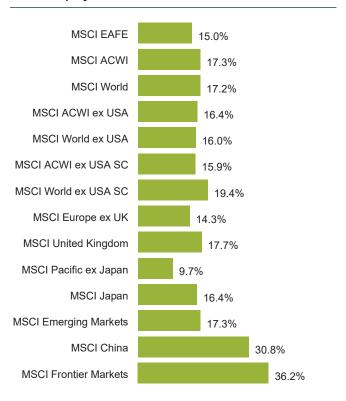

Impact of U.S. dollar weakness

- The dollar's weakness helped U.S. investors in the first half of the year, but that support faded in 3Q25.
- Since peaking in September 2022, the dollar's decline had created one of the largest three-year performance gaps in a decade between the MSCI EAFE Local Currency index and the U.S. dollar version.
- Although many investors still expect the dollar to weaken over time, near-term signals point the other way.
- For example, the euro-dollar exchange rate and the yield gap between U.S. and German two-year government bonds usually move together. That link broke earlier this year but has recently started to tighten again.

U.S. FIXED INCOME

The Fed cut rates; Aggregate gains 2.0%

Macro environment

- The Fed cut rates at the September meeting, with long-end rates moving higher, pricing in the potential for continued upward inflation pressures.
- Despite long-end upward movement post-meeting, yields eventually fell across the curve amid weakening economic sentiment.
- The yield curve steepened modestly, with the 2s/10s spreadwidening as much as 65 bps—before ending at 55 bps, up from 52 bps at the end of 2Q.

Performance and drivers

- The Bloomberg US Aggregate Bond Index rose 2.0%, supported by declining Treasury yields.
- IG corporates outperformed Treasuries amid continued spread tightening, as did securitized credit.
- High yield outperformed floating rate bank loans as yields declined.

Valuations

- Corporate credit spreads continue to grind tighter amid high demand from market participants.
- New issuance across both IG and HY ticked up in September after the typical summer lull.

Municipal bond yields declined during the quarter

- The AAA municipal yield curve moved lower as the Fed telegraphed a rate cut in September.
- The yield curve ended steeper as the front-end fell more sharply than the long-end. The AAA 2-year yield ended the guarter at 2.30%, while the 30-year ended at 4.30%.

Sustained record pace of new issuance

 YTD issuance totaled \$437 billion, 15% higher than prior record-year levels.

Valuations tightened during the quarter

- Muni-to-Treasury ratios finished the quarter below historical averages, indicating diminished relative value for tax-exempt municipals versus Treasuries.
- Longer maturities remained the cheapest segment as the 30year Muni/Treasury ratio ended at roughly 90%.

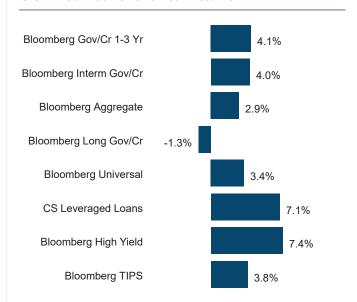

High yield trailed investment grade

 Brightline Rail's deferral of interest payments on its taxexempt bonds contributed to volatility in the high-yield municipal market during the quarter.

GLOBAL FIXED INCOME

U.S. dollar continues to weaken amid tariff uncertainty

Macro environment

- The ECB held rates steady at its September meeting as inflation remained in line with its medium-term goal. The ECB indicated it remains data-dependent, signaling readiness to adjust monetary policy meeting-by-meeting.
- The BOE cut rates in August but held steady in September, indicating policy is not on a pre-set path, much like the ECB.

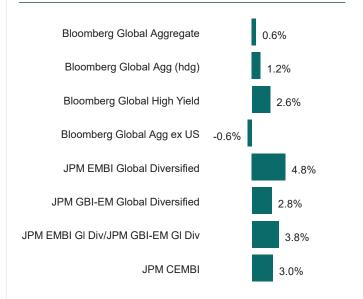

U.S. dollar strengthened slightly

- The U.S. dollar strengthened modestly amid reciprocal tariff postponements.
- The Bloomberg Global Aggregate ex US Hedged Index topped the unhedged version due to the stronger dollar.

Emerging market debt delivers another strong quarter

 The dollar's rise supported hedged currency EMD over unhedged EMD. Spread tightening has persisted across EMD segments amid the global hunt for value within credit.

Market Overview Active Management vs Index Returns

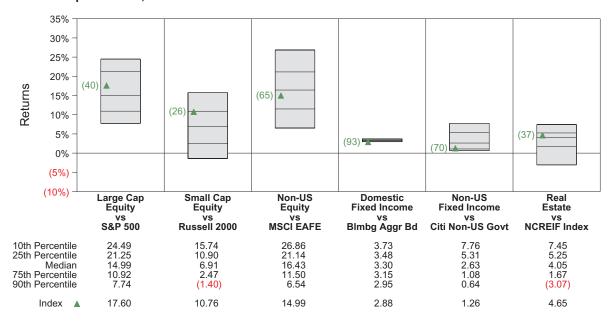

Market Overview

The charts below illustrate the range of returns across managers in Callan's Separate Account database over the most recent one quarter and one year time periods. The database is broken down by asset class to illustrate the difference in returns across those asset classes. An appropriate index is also shown for each asset class for comparison purposes. As an example, the first bar in the upper chart illustrates the range of returns for domestic equity managers over the last quarter. The triangle represents the S&P 500 return. The number next to the triangle represents the ranking of the S&P 500 in the Large Cap Equity manager database.

Range of Separate Account Manager Returns by Asset Class One Quarter Ended September 30, 2025

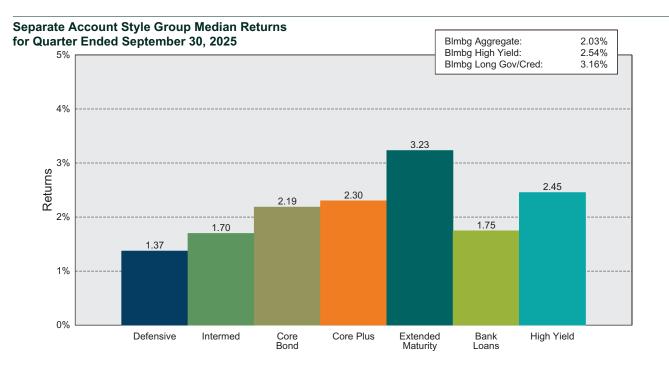

Range of Separate Account Manager Returns by Asset Class One Year Ended September 30, 2025

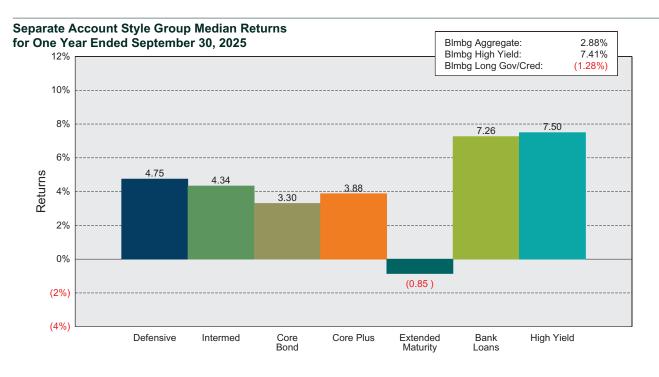

Domestic Fixed Income Active Management Overview

Fixed income markets posted broad-based gains in 3Q25. The U.S. Treasury yield curve steepened modestly as the front end fell more sharply in anticipation of Fed cuts, while the long end shifted marginally lower but remained elevated. The Bloomberg US Aggregate Bond Index advanced 2.0% (+6.1% YTD) as yields declined. Investment grade corporate bonds outperformed securitized (MBS, CMBS, ABS) on a like-duration basis as corporate option-adjusted spreads continued tightening and reached levels last seen in the pre-GFC period. Within leveraged finance, spreads also continued to grind tighter as the Bloomberg US High Yield Index rose 2.5% and the Morningstar LSTA Leveraged Loan Index advanced 1.8%, supported by strong CLO demand. The Bloomberg TIPS Index gained 2.1% (+6.9% YTD) as the 10-year breakeven increased and implied 10-year real yield declined.

Investment Manager Asset Allocation

The table below contrasts the distribution of assets across the Fund's investment managers as of September 30, 2025, with the distribution as of June 30, 2025. The change in asset distribution is broken down into the dollar change due to Net New Investment and the dollar change due to Investment Return.

Long Term Operating Fund Period Ended September 30, 2025

Investment Philosophy

Insight 1-5 Year strategy seeks to capitalize on market inefficiencies, use multiple sources of alpha and make diverse bets in an effort to achieve superior total return versus the Barclays Capital Aggregate Index over a full market cycle on an absolute and risk-adjusted basis. We employ a disciplined team structure that relies on fundamental proprietary analysis and research to identify individual securities with the greatest capital appreciation potential. We customize every portfolio to meet each client's return objectives, liquidity needs, and risk tolerance. We emphasize diversification across sectors, industries, issuers and credit quality. Under most circumstances, we limit our duration exposure to within a range of +/-15% versus the benchmark. We add value for our clients' portfolios by using a disciplined team structure that relies on fundamental, proprietary research analysis to identify individual securities with the greatest capital appreciation potential. Assets were transferred in kind to Insight on 3/1/2024. Performance from 12/1/2014 to 3/1/2024 represents Chandler. Previous performance reflects PIMCO.

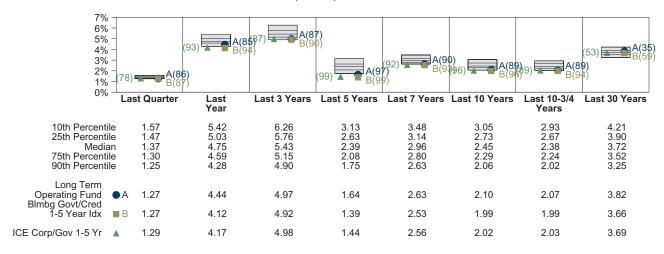

Quarterly Summary and Highlights

- Long Term Operating Fund's portfolio posted a 1.27% return for the quarter placing it in the 86 percentile of the Callan Short Term Fixed Income group for the quarter and in the 85 percentile for the last year.
- Long Term Operating Fund's portfolio underperformed the ICE Corp/Gov 1-5 Yr by 0.02% for the quarter and outperformed the ICE Corp/Gov 1-5 Yr for the year by 0.27%.

Risk/Reward Statistics

The risk statistics used in this report examine performance characteristics of a manager or a portfolio relative to a benchmark (market indicator) which assumes to represent overall movements in the asset class being considered. The main unit of analysis is the excess return, which is the portfolio return minus the return on a risk free asset (3 month T-Bill).

Alpha measures a portfolio's return in excess of the market return adjusted for risk. It is a measure of the manager's contribution to performance with reference to security selection. A positive alpha indicates that a portfolio was positively rewarded for the residual risk which was taken for that level of market exposure.

Beta measures the sensitivity of rates of portfolio returns to movements in the market index. A portfolio's beta measures the expected change in return per 1% change in the return on the market. If a beta of a portfolio is 1.5, a 1 percent increase in the return on the market will result, on average, in a 1.5 percent increase in the return on the portfolio. The converse would also be true.

Downside Risk stems from the desire to differentiate between "good risk" (upside volatility) and "bad risk" (downside volatility). Whereas standard deviation punishes both upside and downside volatility, downside risk measures only the standard deviation of returns below the target. Returns above the target are assigned a deviation of zero. Both the frequency and magnitude of underperformance affect the amount of downside risk.

Excess Return Ratio is a measure of risk adjusted relative return. This ratio captures the amount of active management performance (value added relative to an index) per unit of active management risk (tracking error against the index.) It is calculated by dividing the manager's annualized cumulative excess return relative to the index by the standard deviation of the individual quarterly excess returns. The Excess Return Ratio can be interpreted as the manager's active risk/reward tradeoff for diverging from the index when the index is mandated to be the "riskless" market position.

Information Ratio measures the manager's market risk-adjusted excess return per unit of residual risk relative to a benchmark. It is computed by dividing alpha by the residual risk over a given time period. Assuming all other factors being equal, managers with lower residual risk achieve higher values in the information ratio. Managers with higher information ratios will add value relative to the benchmark more reliably and consistently.

R-Squared indicates the extent to which the variability of the portfolio returns are explained by market action. It can also be thought of as measuring the diversification relative to the appropriate benchmark. An r-squared value of .75 indicates that 75% of the fluctuation in a portfolio return is explained by market action. An r-squared of 1.0 indicates that a portfolio's returns are entirely related to the market and it is not influenced by other factors. An r-squared of zero indicates that no relationship exists between the portfolio's return and the market.

Relative Standard Deviation is a simple measure of a manager's risk (volatility) relative to a benchmark. It is calculated by dividing the manager's standard deviation of returns by the benchmark's standard deviation of returns. A relative standard deviation of 1.20, for example, means the manager has exhibited 20% more risk than the benchmark over that time period. A ratio of .80 would imply 20% less risk. This ratio is especially useful when analyzing the risk of investment grade fixed-income products where actual historical durations are not available. By using this relative risk measure over rolling time periods one can illustrate the "implied" historical duration patterns of the portfolio versus the benchmark.

Residual Portfolio Risk is the unsystematic risk of a fund, the portion of the total risk unique to the fund (manager) itself and not related to the overall market. This reflects the "bets" which the manager places in that particular asset market. These bets may reflect emphasis in particular sectors, maturities (for bonds), or other issue specific factors which the manager considers a good investment opportunity. Diversification of the portfolio will reduce or eliminate the residual risk of that portfolio.

Risk/Reward Statistics

Rising Declining Periods refer to the sub-asset class cycles vis-a-vis the broader asset class. This is determined by evaluating the cumulative relative sub-asset class index performance to that of the broader asset class index. For example, to determine the Growth Style cycle, the S&P 500 Growth Index (sub-asset class) performance is compared to that of the S&P 500 Index (broader asset class).

Sharpe Ratio is a commonly used measure of risk-adjusted return. It is calculated by subtracting the "risk-free" return (usually 3 Month Treasury Bill) from the portfolio return and dividing the resulting "excess return" by the portfolio's risk level (standard deviation). The result is a measure of return gained per unit of risk taken.

Sortino Ratio is a downside risk-adjusted measure of value-added. It measures excess return over a benchmark divided by downside risk. The natural appeal is that it identifies value-added per unit of truly bad risk. The danger of interpretation, however, lies in these two areas: (1) the statistical significance of the denominator, and (2) its reliance on the persistence of skewness in return distributions.

Standard Deviation is a statistical measure of portfolio risk. It reflects the average deviation of the observations from their sample mean. Standard deviation is used as an estimate of risk since it measures how wide the range of returns typically is. The wider the typical range of returns, the higher the standard deviation of returns, and the higher the portfolio risk. If returns are normally distributed (ie. has a bell shaped curve distribution) then approximately 2/3 of the returns would occur within plus or minus one standard deviation from the sample mean.

Total Portfolio Risk is a measure of the volatility of the quarterly excess returns of an asset. Total risk is composed of two measures of risk: market (non-diversifiable or systematic) risk and residual (diversifiable or unsystematic) risk. The purpose of portfolio diversification is to reduce the residual risk of the portfolio.

Tracking Error is a statistical measure of a portfolio's risk relative to an index. It reflects the standard deviation of a portfolio's individual quarterly or monthly returns from the index's returns. Typically, the lower the Tracking Error, the more "index-like" the portfolio.

Treynor Ratio represents the portfolio's average excess return over a specified period divided by the beta relative to its benchmark over that same period. This measure reflects the reward over the risk-free rate relative to the systematic risk assumed.

Note: Alpha, Total Risk, and Residual Risk are annualized.

Fixed Income Portfolio Characteristics

All Portfolio Characteristics are derived by first calculating the characteristics for each security, and then calculating the market value weighted average of these values for the portfolio.

Allocation by Sector - Sector allocation is one of the tools which managers often use to add value without impacting the duration of the portfolio. The sector weights exhibit can be used to contrast a portfolio's weights with those of the index to identify any significant sector bets.

Average Coupon - The average coupon is the market value weighted average coupon of all securities in the portfolio. The total portfolio coupon payments per year are divided by the total portfolio par value.

Average Moody's Rating for Total Portfolio - A measure of the credit quality as determined by the individual security ratings. The ratings for each security, from Moody's Investor Service, are compiled into a composite rating for the whole portfolio. Quality symbols range from Aaa+ (highest investment quality - lowest credit risk) to C (lowest investment quality - highest credit risk).

Average Option Adjusted (Effective) Convexity - Convexity is a measure of the portfolio's exposure to interest rate risk. It is a measure of how much the duration of the portfolio will change given a change in interest rates. Generally, securities with negative convexities are considered to be risky in that changes in interest rates will result in disadvantageous changes in duration. When a security's duration changes it indicates that the stream of expected future cash-flows has changed, generally having a significant impact on the value of the security. The option adjusted convexity for each security in the portfolio is calculated using models developed by Lehman Brothers and Salomon Brothers which determine the expected stream of cash-flows for the security based on various interest rate scenarios. Expected cash-flows take into account any put or call options embedded in the security, any expected sinking-fund paydowns or any expected mortgage principal prepayments.

Average Option Adjusted (Effective) Duration - Duration is one measure of the portfolio's exposure to interest rate risk. Generally, the higher a portfolio's duration, the more that its value will change in response to interest rate changes. The option adjusted duration for each security in the portfolio is calculated using models developed by Lehman Brothers and Salomon Brothers which determine the expected stream of cash-flows for the security based on various interest rate scenarios. Expected cash-flows take into account any put or call options embedded in the security, any expected sinking-fund paydowns or any expected mortgage principal prepayments.

Average Price - The average price is equal to the portfolio market value divided by the number of securities in the portfolio. Portfolios with an average price above par will tend to generate more current income than those with an average price below par.

Average Years to Expected Maturity - This is a measure of the market-value-weighted average of the years to expected maturity across all of the securities in the portfolio. Expected years to maturity takes into account any put or call options embedded in the security, any expected sinking-fund paydowns or any expected mortgage principal prepayments.

Average Years to Stated Maturity - The average years to stated maturity is the market value weighted average time to stated maturity for all securities in the portfolio. This measure does not take into account imbedded options, sinking fund paydowns, or prepayments.

Current Yield - The current yield is the current annual income generated by the total portfolio market value. It is equal to the total portfolio coupon payments per year divided by the current total portfolio market value.

Fixed Income Portfolio Characteristics

Duration Dispersion - Duration dispersion is the market-value weighted standard deviation of the portfolio's individual security durations around the total portfolio duration. The higher the dispersion, the more variable the security durations relative to the total portfolio duration ("barbellness"), and the smaller the dispersion, the more concentrated the holdings' durations around the overall portfolio's ("bulletness"). The purpose of this statistic is to gauge the "bulletness" or "barbellness" of a portfolio relative to its total duration and to that of its benchmark index.

Effective Yield - The effective yield is the actual total annualized return that would be realized if all securities in the portfolio were held to their expected maturities. Effective yield is calculated as the internal rate of return, using the current market value and all expected future interest and principal cash flows. This measure incorporates sinking fund paydowns, expected mortgage principal prepayments, and the exercise of any "in-the-money" imbedded put or call options.

Weighted Average Life - The weighted average life of a security is the weighted average time to payment of all remaining principal. It is calculated by multiplying each expected future principal payment amount by the time left to the payment. This amount is then divided by the total amount of principal remaining. Weighted average life is commonly used as a measure of the investment life for pass-through security types for comparison to non-pass-through securities.

Callan

Quarterly List as of September 30, 2025

List of Callan's Investment Manager Clients

Confidential - For Callan Client Use Only

Callan takes its fiduciary and disclosure responsibilities to clients very seriously. We recognize that there are numerous potential conflicts of interest encountered in the investment consulting industry, and that it is our responsibility to manage those conflicts effectively and in the best interest of our clients. At Callan, we employ a robust process to identify, manage, monitor, and disclose potential conflicts on an ongoing basis.

The list below is an important component of our conflicts management and disclosure process. It identifies those investment managers that pay Callan fees for educational, consulting, software, database, or reporting products and services. We update the list quarterly because we believe that our fund sponsor clients should know the investment managers that do business with Callan, particularly those investment manager clients that the fund sponsor clients may be using or considering using. Please note that if an investment manager receives a product or service on a complimentary basis (e.g., attending an educational event), they are not included in the list below. Callan is committed to ensuring that we do not consider an investment manager's business relationship with Callan, or lack thereof, in performing evaluations for or making suggestions or recommendations to its other clients. Please refer to Callan's ADV Part 2A for a more detailed description of the services and products that Callan makes available to investment manager clients through our Institutional Consulting Group, Independent Adviser Group, and Fund Sponsor Consulting Group. Due to the complex corporate and organizational ownership structures of many investment management firms, parent and affiliate firm relationships are not indicated on our list.

Fund sponsor clients may request a copy of the most currently available list at any time. Fund sponsor clients may also request specific information regarding the fees paid to Callan by particular fund manager clients. Per company policy, information requests regarding fees are handled exclusively by Callan's Compliance department.

Important Disclosures

Information contained in this document may include confidential, trade secret and/or proprietary information of Callan and the client. It is incumbent upon the user to maintain such information in strict confidence. Neither this document nor any specific information contained herein is to be used other than by the intended recipient for its intended purpose.

The content of this document is particular to the client and should not be relied upon by any other individual or entity. There can be no assurance that the performance of any account or investment will be comparable to the performance information presented in this document.

Certain information herein has been compiled by Callan from a variety of sources believed to be reliable but for which Callan has not necessarily verified for accuracy or completeness. Information contained herein may not be current. Callan has no obligation to bring current the information contained herein.

Callan's performance, market value, and, if applicable, liability calculations are inherently estimates based on data available at the time each calculation is performed and may later be determined to be incorrect or require subsequent material adjustment due to many variables including, but not limited to, reliance on third party data, differences in calculation methodology, presence of illiquid assets, the timing and magnitude of unrecognized cash flows, and other data/assumptions needed to prepare such estimated calculations. In no event should the performance measurement and reporting services provided by Callan be used in the calculation, deliberation, policy determination, or any other action of the client as it pertains to determining amounts, timing or activity of contribution levels or funding amounts, rebalancing activity, benefit payments, distribution amounts, and/or performance-based fee amounts, unless the client understands and accepts the inherent limitations of Callan's estimated performance, market value, and liability calculations.

Callan's performance measurement service reports estimated returns for a portfolio and compares them against relevant benchmarks and peer groups, as appropriate; such service may also report on historical portfolio holdings, comparing them to holdings of relevant benchmarks and peer groups, as appropriate ("portfolio holdings analysis"). To the extent that Callan's reports include a portfolio holdings analysis, Callan relies entirely on holdings, pricing, characteristics, and risk data provided by third parties including custodian banks, record keepers, pricing services, index providers, and investment managers. Callan reports the performance and holdings data as received and does not attempt to audit or verify the holdings data. Callan is not responsible for the accuracy or completeness of the performance or holdings data received from third parties and such data may not have been verified for accuracy or completeness.

Callan's performance measurement service may report on illiquid asset classes, including, but not limited to, private real estate, private equity, private credit, hedge funds and infrastructure. The final valuation reports, which Callan receives from third parties, for of these types of asset classes may not be available at the time a Callan performance report is issued. As a result, the estimated returns and market values reported for these illiquid asset classes, as well as for any composites including these illiquid asset classes, including any total fund composite prepared, may not reflect final data, and therefore may be subject to revision in future quarters.

The content of this document may consist of statements of opinion, which are made as of the date they are expressed and are not statements of fact. The opinions expressed herein may change based upon changes in economic, market, financial and political conditions and other factors. Callan has no obligation to bring current the opinions expressed herein.

The information contained herein may include forward-looking statements regarding future results. The forward-looking statements herein: (i) are best estimations consistent with the information available as of the date hereof and (ii) involve known and unknown risks and uncertainties. Actual results may vary, perhaps materially, from the future results projected in this document. Undue reliance should not be placed on forward-looking statements.

Callan is not responsible for reviewing the risks of individual securities or the compliance/non-compliance of individual security holdings with a client's investment policy guidelines.

This document should not be construed as legal or tax advice on any matter. You should consult with legal and tax advisers before applying any of this information to your particular situation.

Reference to, or inclusion in this document of, any product, service or entity should not necessarily be construed as recommendation, approval, or endorsement or such product, service or entity by Callan. This document is provided in connection with Callan's consulting services and should not be viewed as an advertisement of Callan, or of the strategies or products discussed or referenced herein.

The issues considered and risks highlighted herein are not comprehensive and other risks may exist that the user of this document may deem material regarding the enclosed information. Please see any applicable full performance report or annual communication for other important disclosures.

Unless Callan has been specifically engaged to do so, Callan does not conduct background checks or in-depth due diligence of the operations of any investment manager search candidate or investment vehicle, as may be typically performed in an operational due diligence evaluation assignment and in no event does Callan conduct due diligence beyond what is described in its report to the client.

Any decision made on the basis of this document is sole responsibility of the client, as the intended recipient, and it is incumbent upon the client to make an independent determination of the suitability and consequences of such a decision.

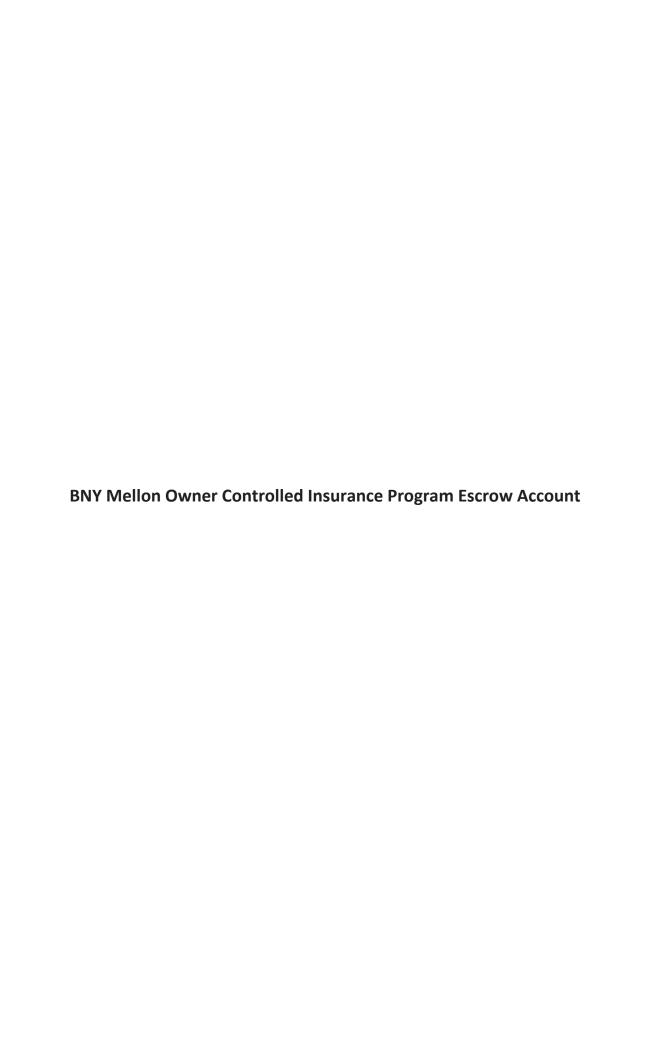

Callan undertakes no obligation to update the information contained herein except as specifically requested by the client.

Past performance is no guarantee of future results.

The Bank of New York Mellon may utilize subsidiaries and affiliates to provide services and certain products to the Account. Subsidiaries and affiliates may be compensated for their services and products.

The value of securities set forth on this Account Statement are determined by The Bank of New York Mellon for Corporate Trust on the basis of market prices and information obtained by The Bank of New York Mellon from unaffiliated third parties (including independent pricing vendors) ("third party pricing services"). The Bank of New York Mellon has not verified such market values or information and makes no assurances as to the accuracy or correctness of such market values or information or that the market values set forth on this Account Statement reflect the value of the securities that can be realized upon the sale of such securities. In addition, the market values for securities set forth in this Account Statement may differ from the market prices and information for the same securities used by other business units of The Bank of New York Mellon or its subsidiaries or affiliates based upon market prices and information received from other third party pricing services utilized by such other business units. Corporate Trust does not compare its market values with those used by, or reconcile different market values used by, other business units of The Bank of New York Mellon or its subsidiaries or its affiliates. The Bank of New York Mellon shall not be liable for any loss, damage or expense incurred as a result of or arising from or related to the market values or information provided by third party pricing services or the differences in market prices or information provided by other third party pricing services.

^{*} The above gain and loss position does not include transactions where tax cost information is incomplete or unavailable.

Investment Objective

Source

OC SAN B1

Individual account based on Moderate - Strategic Blend. The dual goals of the Moderate Strategy are growth of principal and income. It is expected that dividend and interest income will comprise a significant portion of total return, although growth through capital appreciation is equally important. The portfolio will be allocated between equity and fixed income investments.

Individual account based on Balanced - Strategic Blend. The dual goals of the Balanced Strategy are growth of principal and income. While dividend and interest income are an important component of the objective's total return, it is expected that capital appreciation will comprise a larger portion of the total return. The portfolio will be allocated between equity and fixed income investments.
