

OC San's 2025 Sewer System Management Plan (SSMP)

Presented by:

Lan Wiborg, Director of
Environmental Services

Administration Committee
April 9, 2025

OC SAN
ORANGE COUNTY SANITATION DISTRICT

1

Sewer System Management Plan (SSMP)

- SSMP describes how the agency will operate and maintain their collection system to reduce occurrence of sanitary sewer overflows.
- All public agencies that own or operate sanitary sewer systems must develop and implement a SSMP.

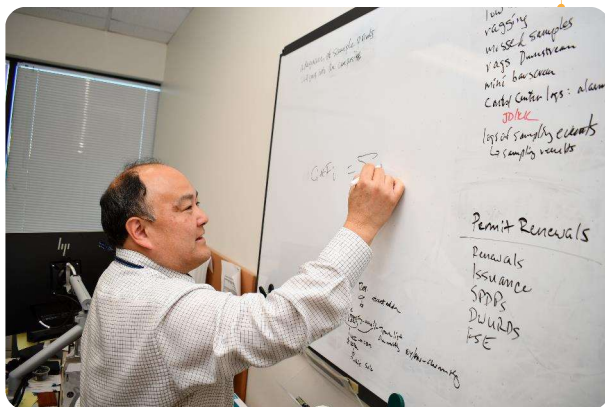

2

2

SSMP Update

- Sanitary Sewer System Waste Discharge Requirement (WDR) Order (2022 Order).
- Update OC San's current 2021 SSMP to comply with the 2022 Order.

3

3

SSMP Update

How did OC San update the SSMP?

- OC San hired an independent third party to conduct a comprehensive review to ensure that the 2025 SSMP complies with the 2022 Order and reflects OC San's current practices.
- Staff from multiple departments collaborated to incorporate the recommendations from the independent third-party review into the 2025 SSMP.

4

Updates to SSMP

Updates

- Terminologies
- Audit schedule and SSMP recertification schedule
- References to sections, documents, and staffing
- WDR requirements for each section per the 2022 Order
- Removed outdated program descriptions

Additions

- Description of CCTV program
- Equipment inventory
- Scheduling and prioritization practices
- Root control program
- Description of inter-agency coordination
- Procedures for prompt notification and response to a spill
- Language for annual review and assessment of the effectiveness of the Spill Emergency Response Plan
