Consolidated Financial Reports For the Mid-Year Ended December 31, 2020

Included in this consolidated report are the following quarterly financial reports for the period ended December 31, 2020:

- **Mid-Year Budget Review:**

The Consolidated Financial Reports Section provides the Directors, staff, and the general public with a comprehensive overview of the financial results of the Sanitation District through the mid-year ended December 31, 2020.

Contained within the Consolidated Financial Reports is the budget-to-actual status of the Collections, Treatment and Disposal Operations, the Capital Improvement Program, Debt Service Outlays, and the Self-Insurance Program. Also included is a Capital Assets Schedule as of December 31, 2020. The chart below provides for a summary of these activities.

Various detail information can be found in this report. Below is a descriptive summary of these activities through December 31, 2020:

- a) Most major expense categories are anticipated to be at or below budget.
- b) Total revenues are at 53.7 percent of the \$479.2 million budget. Except for Intra District Sewer Use-IRWD, Capital Assessments-IRWD, Capital Facilities Capacity Charges, Interest Earnings, CIP Reimbursements, CNG Sales, Other Revenues, and Other Sales, most major revenue sources are currently tracking close to or exceeding revenue estimates. Overall, total revenues are projected to approximate budget at year-end. More detailed information on revenues is provided within Section 1 – Pages 4 through 6.

FY 2020-21 Mid-Year Financial Report

- c) **Collection, Treatment and Disposal Costs:**
As indicated within the Consolidated Financial Reports Section of this report, the net operating requirements through the mid-year of \$87.0 million is currently tracking at 49.9 percent of the \$174.3 million budget. In addition, net operating expenses have increased \$6.5 million or 8.1 percent in comparison with the same period last year. Overall, staff expects the total operating costs to remain at or slightly below budget throughout the remainder of the year. More detailed information on operating expenses is provided within Section 1 – Pages 1 through 4.

The total cost per million gallons is \$2,569 based on flows of 184 million gallons per day. This is \$29 per million gallons, or 1.1 percent higher than the budgeted cost per million gallons per day. A further description of these costs and benchmarking with other agencies is contained within Section 1 – Pages 7 through 9.

- d) The total projected capital outlay cash flow of the Capital Improvement Program (CIP) for FY 2020-21 has been revised to \$145.7 million, or 98.7 percent of the board approved cash outlay of \$147.6 million. The actual cash outlay spending through the mid-year is \$63.7 million, or 43.2 percent of the total budgeted outlay. More detailed information on the CIP budget review can be found in Section 1 – Page 10 and Section 3.

- **Mid-Year Treasurer’s Report**

This section reports on financial portfolio performance with respect to the Sanitation District’s funds. Both Long-Term and Liquid Operating Monies Portfolios are summarized. A performance summary table can be found on page 2 of this section. The report also contains information on the national economic outlook from the Sanitation District’s money manager, Chandler Asset Management (Chandler).

Chandler notes the Long-Term Portfolio quarterly return of 21 basis points outperformed the ICE BAML 1-5 Year US Corp/Govt Rated AAA-A Index return of 15 basis points, while the Liquid Operating Monies Portfolio quarterly return of 3 basis points matched the ICE BAML 3-Month US Treasury Bill Index return.

Chandler further notes that while they remain optimistic about the longer-term outlook, recent economic data suggests that the economy has lost momentum as virus cases have risen. They believe the near-term will remain challenging as the labor market remains under pressure and many regions have renewed business restrictions due to the virus. However, the passage of a new \$900 billion COVID-19 fiscal relief bill should help cushion the economy over the next few months, and they believe the incoming Presidential administration will have a keen focus on accelerating vaccine distribution and getting the economy back on track. While the vaccine rollout has gotten off to a slow start, they expect more widespread distribution of vaccines in the second and third quarter of 2021. They also expect

Executive Summary

the Fed's highly accommodative monetary policy framework will continue to provide support for the financial markets.

The Federal Open Market Committee (FOMC) kept monetary policy unchanged at their December meeting as expected, with the fed funds target rate in a range of 0.0% to 0.25%. The Fed intends to remain highly accommodative until their goals of maximum employment and higher inflation are achieved. The Fed's summary of economic projections continues to signal that the target fed funds rate will remain unchanged until at least 2023, as policymakers do not expect inflation to exceed 2.0% during that timeframe. Until the Fed has made substantial progress toward achieving their dual mandate of maximum employment and price stability, they have set a floor for monthly asset purchases of at least \$80 billion per month of Treasuries and \$40 billion per month of agency mortgage-backed securities. Notably, the Fed's outlook for GDP over the next few years was revised higher and the outlook for unemployment was revised lower compared with their previous forecasts in September, which suggests increased optimism. Nevertheless, the outlook remains uncertain and Fed Chair Powell indicated that the Fed would increase policy accommodation further if progress toward their dual mandate slows.

The Treasury yield curve steepened in December, due at least in part by favorable developments on the vaccine front and anticipation of improving economic activity in 2021. The yield on 2-year Treasuries was down slightly to 0.12% while the yield on 10-year Treasuries was up nearly eight basis point to 0.92%.

In 2020, Treasury yields declined but the curve steepened as short-term rates declined more than long-term rates. The 3-month T-bill yield was down 149 basis points, the 2-year Treasury yield was down 145 basis points, and the 10-Year Treasury yield was down 100 basis points, year-over-year.

The Consumer Price Index (CPI) was up 1.2% year-over-year in November, unchanged from October. Core CPI (CPI less food and energy) was up 1.6% year-over-year in November, also unchanged from October. The Personal Consumption Expenditures (PCE) index was up 1.1% year-over-year in November, versus up 1.2% year-over-year in October. Core PCE, which is the Fed's primary inflation gauge, was up 1.4% year-over-year in November, unchanged from October. Inflation remains below the Fed's target.

Economic Outlook

Increasing coronavirus case counts and the subsequent decrease in consumer mobility was poised to adversely impact the market and economic outlook in the fourth quarter of 2020. However, in early November markets received unambiguous positive news with the results of the clinical trial for the Pfizer BioNTech Vaccine being released and exhibiting a very high efficacy rate for the COVID-19 coronavirus. The timeline for a viable vaccine was consistent with market expectations however the high efficacy rate was viewed as "new news"

FY 2020-21 Mid-Year Financial Report

which changed sentiment and propelled risk assets higher. Markets began to aggressively position for the “reopening trade” as both investment grade and high yield credit spreads moved tighter, and equity market breadth improved materially with the small cap sector outperforming the large cap sector. Consistent with the improved global outlook correlated with the vaccine developments, the US dollar moved lower and Treasury yields moved moderately higher, with longer maturity yields moving higher at a faster pace as the Treasury curve began to steepen.

Political rhetoric related to the election and additional fiscal stimulus dominated the headlines throughout the quarter. Despite the almost daily back and forth between Congressional leadership, late in the quarter additional fiscal stimulus was finally passed, which should help to stabilize the economy as the vaccination process quickens in Q1 and Q2 of 2021. The incoming Biden administration is also expected to seek further fiscal support to enhance economic growth in 2021. Additionally, the Federal Reserve continues to provide strong support to the economic recovery despite the sunset of several liquidity tools implemented at the height of the crisis in March and April of 2020. The Chandler team does not have any immediate concerns about the expiration of the Fed backstops. In the event the market becomes dislocated again due to another exogenous shock to the economy they have a high level of confidence the US Treasury and Federal Reserve would work closely together to reimplement the tools to stabilize markets. The Federal Reserve also updated their Summary of Economic Projections in mid-December. The Fed continues to emphasize a willingness to keep policy highly stimulative until their dual mandate of full employment and stable prices is achieved. Notably, the Fed is looking for inflation to average 2% over the cycle and is expressing a willingness to tolerate inflation above the target for a period of time to make up for the shortfalls below the target over the past decade. Market based measure of inflation continue to price in a higher probability of the Fed meeting their inflation objective as the Ten Year TIP breakeven spread – a market based measure of longer term inflation expectations – increased to 1.99% as of December 31 compared to 1.63% at the end of September. The Chandler team expects the Fed Funds rate to remain at the zero lower bound for all of 2021 and is closely monitoring market based measures of inflation; the Ten Year TIP breakeven spread needs to trade in a consistent range of 2.30% to 2.60% for a period of time before Fed officials would consider altering their stance on the zero lower bound in Chandler’s view.

Economic data continues to recover from the shock to the system in March and April of 2020. However, many metrics will not fully recover until a large portion of the domestic population has achieved immunity from the coronavirus. Nonfarm payrolls were robust through the summer, but the rate of improvement slowed late in the year. The three month moving average on nonfarm payroll growth moved down to 283k in December compared to 1,321k as of September. The U3 unemployment rate is currently at 6.7%, after having topped out at 14.8% in April 2020 while the U6 Underemployment rate remains elevated at 11.7% compared to 22.9% in April. The manufacturing indices have been a bright spot, with the ISM

Executive Summary

Manufacturing Index reaching a YTD high in December at 60.7 with the ISM Non-Manufacturing Index most recent reading at 57.2. The consumer facing portion of the economy continues to face strong headwinds, however the Chandler team is confident substantial pent-up demand has the potential to propel the economy forward in the 2nd half of 2021. The current fiscal and monetary policy settings should continue to provide a constructive backdrop for asset prices in 2021 despite the secular changes to the economy due to the pandemic.

- **Mid-Year Certificates of Participation (COP) Report**

The report includes a summary of each outstanding debt issuance and a comparative chart illustrating the COP rate history.

Consolidated Financial Reports

Mid-Year Financial Report December 31, 2020

Financial Management is pleased to present the FY 2020-21 mid-year financial report. This report provides a comprehensive overview of the financial activities of the Sanitation District and reports on the status of all capital projects in progress. A summary of the sections contained within this report is provided below.

Operating Budget Review: This section reports on collection, treatment, and disposal net operating requirements.

At December 31, 2020, 49.9 percent, or \$87.0 million of the FY 2020-21 net operating budget of \$174.3 million has been expended. Net operating expenses increased from the same period last year by \$6.5 million, or 8.1 percent, mainly due to an increase of \$3.1 million in Repairs and Maintenance, \$2.5 million in Salaries and Benefits, \$1.0 million in Other Operating Supplies, \$802,000 in Operating Materials and Supplies, and \$609,000 in Utilities, partially offset by a decrease of \$640,000 in Contractual Services, \$294,000 in Professional Services, \$128,000 in Training and Meetings, and an increase of \$341,000 in indirect costs allocated out to capital projects. These and other variances that factor into this net increase in expenses are discussed in more detail below. **Overall, staff expects the total operating costs to remain at or slightly below budget throughout the remainder of the year.**

At December 31, 2020, 53.7 percent, or \$257.3 million of the FY 2020-21 budgeted total revenues of \$479.2 million has been recognized. Revenues increased from the same period last year by \$9.3 million, or 3.8 percent, mainly due to an increase of \$10.7 million in property taxes, \$4.9 million in Sludge Disposal-IRWD, \$1.5 million in Service Fees, \$1.4 million in CIP Reimbursements, \$404,000 in Intra District Sewer Use-IRWD, and \$361,000 in Other Revenues, offset primarily by a decrease of \$6.1 million in Interest Earnings, \$3.3 million in Capital Facilities Capacity Charges, \$266,000 in Capital Assessments-IRWD, \$121,000 in Wastehauler fees, \$102,000 in Other Sales, and \$100,000 in Permit Fees. These and other variances that factor into this net increase in revenues are discussed in more detail below. **Overall, staff expects the total revenues to be at or slightly below budget at the end of the fiscal year.**

Significant operating results as of December 31, 2020 include the following:

- **Salaries, Wages and Benefits – Personnel costs of \$51.9 million are on target at 50.9 percent of the budget through the mid-year of FY 2020-21.** The budget is based on a 5 percent vacancy factor, and staffing is 18 full-time equivalents (FTEs), or 2.8 percent below the total 639 FTEs approved in the FY 2020-21 budget. Salary and benefit costs are \$2.5 million or 5.1 percent higher than the \$49.4 million incurred in the same period last year, mainly due to an increase of \$1.7 million in salaries and wages resulting from cost of living adjustments included in the current Memorandums of Understanding for all employee bargaining units, and an increase

FY 2020-21 Mid-Year Financial Report

of \$514,000 in group insurance costs. **Net operating personnel costs are expected to approximate budget throughout the remainder of the year.**

- Administrative Expenses – **Administrative Expenses totaled \$1.0 million, or 51.2 percent of the \$2.0 million budget through December 31.** These costs are \$57,000, or 5.2 percent lower at December 31 in comparison with the prior year, mainly due to decreases of \$59,000 in purchases of small computer items including HP Elitebooks, \$33,000 in books and publications such as various engineering design standards and manuals of practice, and \$20,000 in Office Supplies, partially offset by an increase of \$40,000 in Minor Furniture & Fixtures for installation of additional cubicles and a warehouse shelving system. **It is anticipated that administrative costs will approximate budget at year-end.**
- Printing and Publication Expenses – **Printing and Publication Expenses totaled \$112,000, or 27.0 percent of the \$415,000 budget through December 31.** These costs are \$35,000, or 23.9 percent lower at December 31 in comparison with the prior year, due to the increased incorporation of paperless processes and reports in response to the COVID-19 pandemic. **Printing and publication costs are expected to be below budget at year-end.**
- Training and Meetings – **Training and meetings of \$184,000 are below target at 17.1 percent of the \$1.1 million budget through December 31.** This account is lower than the proportionate budget due to the timing and need for training throughout the year, and the limiting or canceling of in-person training and meetings in response to the COVID-19 pandemic. These costs have decreased over the same period last year by \$128,000, or 41.1 percent. **Total training and meeting costs are anticipated to be below budget at year-end.**
- Operating Materials and Supplies – **Operating materials and supplies of \$10.5 million is on target at 49.1 percent of the \$21.3 million budget through December 31.** Operating Materials and Supplies are higher than the prior year by \$802,000, or 8.3 percent, primarily due to an increase in Tools of \$294,000 for large purchases including portable samplers and smart sensor sewer covers, Odor Control of \$250,000 mostly due to the increase in unit price and usage of calcium nitrate, and Disinfection of \$145,000 for purchase of sodium hypochlorite (bleach). **Based on current processes, operating materials and supplies are anticipated to approximate budget at year-end.**
- Contractual Services – **Contractual services is below target at \$8.4 million, or 43.6 percent of the \$19.2 million budget through December 31.** Solids Removal costs, budgeted at \$12.4 million, comprise the majority of this expense category at \$5.8 million, or 47.0 percent of its budget at December 31. Contractual Services is lower by \$640,000, or 7.1 percent over the same period last year, due to the decrease of \$731,000 in Other Contractual Services as the result of a reduction in manhole rehabilitation, industrial cleaning, and digester assessment services, as well as costs reclassified to repairs and maintenance, and \$235,000 in Solids Removal costs due to reduced biosolids production attributable to the new

Consolidated Financial Reports

dewatering centrifuges. These decreases are partially offset by increases of \$166,000 in Janitorial costs attributable to additional cleaning services for COVID-19, \$66,000 in Oxygen for liquid oxygen and associated vaporization system maintenance, \$63,000 in Temporary Services as a result of position vacancies in the current period, and \$59,000 in Other Waste Disposal for hazardous waste packing, transportation, and disposal. County Service Fees totaled only \$11,000, or 2.2 percent of the \$489,000 budget through the mid-year as the preponderance of these fees are billed by the County in the fourth quarter. **Total contractual services costs are anticipated to approximate budget at year-end.**

- **Professional Services – Professional services costs totaled \$1.5 million, or 26.8 percent of the \$5.7 million budget through December 31.** Professional service costs, such as Legal, Audit & Accounting, Environmental Scientific Consulting, Industrial Hygiene Services, Labor Negotiation Services, and Other Professional Services, are proportionately low through December 31 due to a variety of factors such as timing of services and re-evaluation of need for services. These costs are \$294,000, or 16.1 percent lower at December 31 in comparison with the prior year, mainly due to a decrease of \$346,000 in Legal Services and \$60,000 in Software Program Consulting, offset by an increase of \$170,000 in Engineering Services. **It is anticipated that the costs for this category will be below budget at year-end.**
- **Research and Monitoring – Research and monitoring costs totaled \$842,000, or 64.5 percent of the \$1.3 million budget through December 31.** These costs are \$56,000, or 7.1 percent higher at December 31 in comparison with the prior year, due to increases of \$57,000 in Environmental Monitoring costs for ocean water quality analysis and \$25,000 in Research costs reflecting the higher annual contribution to Southern California Coastal Water Research Project, offset by a decrease of \$26,000 in Air Quality Monitoring costs for emissions testing. **Total research and monitoring costs are anticipated to approximate budget at year-end.**
- **Repairs and Maintenance – Repair and maintenance costs totaled \$15.5 million, or 54.7 percent of the \$28.4 million budget through December 31.** These costs are \$3.1 million, or 24.7 percent higher at December 31 in comparison with the prior year, mainly due to an increase in repair and maintenance services such as digester cleaning, mechanical rehabilitation of primary clarifier tanks, and information technology software maintenance. **It is anticipated that the costs for this category will approximate budget at year-end.**
- **Utilities – Utilities costs totaled \$5.1 million, or 60.5 percent of the \$8.4 million budget through December 31.** These costs are \$609,000, or 13.7 percent higher at December 31 in comparison with the prior year, primarily due to an increase of \$322,000 for Power, \$205,000 for Natural Gas, and \$106,000 for Water because of greater demand on these resources by the new biosolids dewatering centrifuges. In addition, utility costs for the mid-year are typically more than the proportionate budget due to increased summer electricity rates administered by Southern

FY 2020-21 Mid-Year Financial Report

California Edison in the first three months of the fiscal year. **It is anticipated that the costs will approximate or be slightly above budget at year-end.**

- Other Operating Supplies – **Other operating supplies costs totaled \$2.3 million, or 61.4 percent of the \$3.7 million budget through December 31.** Property and General Liability Insurance, budgeted at \$2.2 million, comprise the majority of this expense category at \$1.1 million. These costs are \$242,000, or 28.2 percent higher at December 31 in comparison with the prior year, primarily due to an increase in budgeted in-lieu premium charges to maintain recommended reserve balances. In addition, Regulatory Operating Fees is \$795,000 higher due to timing of payments for emission, equipment permit, and facility fees. **It is anticipated that other operating supplies costs will approximate budget at year-end.**
- Revenues – Service Fees and Property Taxes – **Through December 31, revenues from service fees are at \$168.4 million, or 56.5 percent of the \$298.1 million budget and property taxes are at \$58.3 million, or 58.4 percent of the \$99.9 million budget.** These items comprise the majority of the Sanitation District's revenues and are mostly collected by the County through the property tax roll and distributed to the Sanitation District throughout the year based on a set distribution schedule that begins in November of each year. The increase of \$1.5 million, or 0.9 percent in service fee revenue over the prior year is primarily due to the timing of receipts. The property tax revenue increase of \$10.7 million, or 22.6 percent over the prior year is a result of the timing of tax receipts, primarily related to redevelopment agencies, as well as growth in assessed property values. **These revenues are expected to approximate budget at year-end.**
- Revenues – Permit Fees – **Permit Fees are at \$6.2 million, or 48.6 percent of the \$12.8 million budget.** The revenues through the mid-year are lower than the same period last year by \$87,000, or 1.4 percent, largely in part to the impact COVID-19 had on these users' flow. Additionally, the number of permittees fluctuates from year to year as businesses establish or cease their operations. **Permit fees revenues are expected to approximate or below budget at year-end.**
- Revenues – Inter District Sewer Use – SAWPA and SBSB – **Inter District Sewer revenues-SAWPA and SBSB are at \$1.4 million, or 51.8 percent of the \$2.6 million budget.** This revenue is derived from charges to the Santa Ana Watershed Protection Agency (SAWPA) and Sunset Beach Sanitary District (SBSB) for treatment of flows. The revenues through the mid-year are higher than the same period last year by \$15,000, or 1.1 percent due to an increase in operation and maintenance charges based on flows received from these agencies. **These revenues are expected to approximate budget at year-end.**
- Revenues – Intra District Sewer Use – IRWD – **Intra District Sewer revenues-IRWD are at \$988,000, or 21.2 percent of the \$4.7 million budget.** This revenue is derived from charges to the Irvine Ranch Water District (IRWD) for treatment of flows. The revenues through the mid-year are higher than the same period last year by \$404,000, or 69.1 percent, mainly due to an increase of \$611,000 in operating

Consolidated Financial Reports

and maintenance charges to IRWD, resulting from a prior year adjustment. This increase in revenue is offset by an increase in allocated interest income of \$110,000 based on higher cash reserves held on behalf of this agency, and an increase of \$97,000 in property tax income allocated to IRWD. **These revenues are expected to be below budget at year-end.**

- Revenues – Sludge Disposal – IRWD – **Sludge Disposal-IRWD fees are at \$9.4 million, or 154.1 percent of the \$6.1 million budget.** This revenue is for the handling, treatment, and disposal of solids derived from flows discharged by IRWD to the Sanitation District. The revenues through the mid-year are higher than the same period last year by \$4.9 million, or 109.4 percent, mainly due to increased quarterly estimated billings for solids received from IRWD through the mid-year, and the timing of prior fiscal year estimates adjusted to actual. The budget reflects the anticipated completion of IRWD solids processing facilities that would cease solids to the Sanitation District's line by the end of the second quarter. **It is anticipated that IRWD sludge disposal revenues will exceed budget at year-end.**
- Revenues – Capital Assessments – IRWD – **Capital Assessments-IRWD are at \$1.3 million, or 24.5 percent of the \$5.2 million budget.** The revenues through the mid-year are lower than the same period last year by \$266,000, or 17.3 percent, mainly due to a decrease in joint capital costs allocable to IRWD. **It is estimated that IRWD capital assessments revenues will be below budget at year-end.**
- Revenues – Capital Facilities Capacity Charges (CFCC) – **CFCC are at \$4.4 million, or 21.8 percent of the \$20.1 million budget.** The revenues through the mid-year are lower than the same period last year by \$3.3 million, or 42.6 percent, due to decreases in connection fees collected from cities and supplemental capital facilities capacity charges assessed to industrial dischargers, largely due to impacts from COVID-19. **These revenues are expected to be below budget at year-end.**
- Revenues – Interest Earnings – **Interest Earnings are at \$3.1 million, or 23.5 percent of the \$13.2 million budget.** The revenues through the mid-year are lower than the same period last year by \$6.1 million, or 66.2 percent due to lower yields earned on securities held in investment portfolios. **It is estimated that interest earnings will be below budget at year-end.**
- Revenues – CIP Reimbursements – **CIP Reimbursements are at \$2.1 million, or 17.9 percent of the \$11.6 million budget.** This revenue is \$1.4 million, or 215.3 percent higher than the same period last year and is due to timing of reimbursements for construction projects, such as the budgeted \$5.4 million from Orange County Water District (OCWD) for P2-122 Headworks Modifications at Plant 2 for GWRS Final Expansion and \$3.4 million from OCWD for J-117B Outfall Low Flow Pump Station. **These revenues are expected to approximate or be below budget at year-end.**
- Revenues – Wastehauler – **Wastehauler revenues are at \$381,000, or 50.8 percent of the \$750,000 budget.** This revenue is derived from fees charged to

FY 2020-21 Mid-Year Financial Report

wastehaulers, allowing them to dump waste into the Sanitation District's system. The revenues through the mid-year are lower than the same period last year by \$121,000, or 24.2 percent due to a decrease in waste dumping. **These revenues are expected to approximate budget at year-end.**

- Revenues – CNG Sales – **CNG Sales revenues are at \$107,000, or 26.9 percent of the \$400,000 budget.** This revenue is derived from public sales at the Sanitation District's Compressed Natural Gas (CNG) fueling station. The revenues through the mid-year are lower than the same period last year by \$26,000, or 19.6 percent, presumably attributed to the decrease in commuting brought about by COVID-19. **These revenues are expected to be below budget at year-end.**
- Revenues – Rents & Leases – **Rents & Leases revenues are at \$352,000, or 58.7 percent of the \$600,000 budget.** The revenues through the mid-year are lower than the same period last year by \$22,000, or 5.8 percent due to less rent received as tenants have moved out of the properties acquired for construction of the new headquarters building. **These revenues are expected to approximate budget at year-end.**
- Revenues – Other – **Other revenues are at \$827,000, or 33.3 percent of the \$2.5 million budget.** These revenues are \$361,000, or 77.6 percent higher than the same period last year, primarily due to timing of receipts for non-operating revenues such as civil penalties and interest, procurement card rebates and settlements, and investigative cost reimbursements. **These revenues are expected to approximate or be below budget at year-end.**

Consolidated Financial Reports

Comparison of Mid-Year Cost per Million Gallon Results with Budget Last Five Years

As demonstrated in the preceding graph for the current and each of the last four fiscal years, the cost per million gallons at the end of the mid-year has been between 1.1 percent higher and 8.2 percent lower than the annual budget. The FY 2020-21 mid-year cost per million gallons of \$2,569 is 1.1 percent higher when compared with this year's budget. The increase in cost per million gallons of \$236 from the previous year is primarily due to an increase in operating expenses, which are 8.1 percent higher than the same period last year, and a decrease in flows, which are 1.8 percent lower than the same period last year. Staff believes that overall operating costs will be at or slightly below budget at year-end.

The total cost per million gallons at December 31 is \$2,569 based on flows of 184 million gallons per day. This is \$29 per million gallons, or 1.1 percent higher than the budgeted cost per million gallons of \$2,540. There is an inverse relationship between the amount of flows and the cost per unit of collection, treatment, and disposal. Consequently, the higher cost per million gallons is due to flows of 184 million gallons per day being 2.1 percent less than the budgeted flow of 188 million gallons per day, partially offset by net expenses being 0.2 percent lower than the proportionate budget through December 31.

More detailed information on operating revenues, costs, and related information is provided within Section 2.

FY 2020-21 Mid-Year Financial Report

Following are data tables showing the last five years of Single Family Residential User Fees (SFR) and the cost per million gallons (MG) to collect, treat, and dispose of wastewater for the Orange County Sanitation District (OC San) and similar agencies. The agencies used in the tables were determined to be those that most closely resembled OC San in terms of services provided and treatment levels. The summaries demonstrate that OC San's SFR and cost per MG are each one of the lowest in their respective groups.

Benchmark Study Five-Year Single Family Residential Rate

Agency	Rates as of July					Notes
	2016 SFR	2017 SFR	2018 SFR	2019 SFR	2020 SFR	
San Francisco	\$ 842	\$ 937	\$ 988	\$ 1,076	\$ 1,169

Notes:

- (1) - Data is for the typical SFR customer rate.
- (2) - Data represents the usage of 10 hundred cubic feet per unit.
- (3) - Data represents the minimum SFR rate not including flow.
- (4) - Data represents the base sewer fee plus the average usage of 9 hundred cubic feet per month.
- (5) - Data represents the Average Service Charge Rates for the prior fiscal year.

Legend for Service Provided and Treatment Level:

B - Agency operates both collection and treatment facilities

T - Agency provides treatment services but not collection

2 - Advanced primary or primary with some secondary treatment

3 - Secondary treatment

4 - Advanced secondary or secondary with some tertiary treatment

Notes:

(1) - In FY19-20, agency updated data for FY16-17 and after to include administrative costs.

(2) - FY17-18 influent flow has not been reduced by the amount of sludge discharged to the sewers from DCTWRP and LAGWRP.

(3) - FY18-19 operating expense decreased \$1.1 million.

(4) - FY18-19 operating expense decreased \$36.4 million; \$30.4 million due to an adjustment to the agency's Other Post Employment Benefit Plan (OPEB) - Transition to CalPers Health Insurance.

(5) - In FY19-20, agency updated FY18-19 CAFR treatment cost.

N/A - Not currently available.

FY 2020-21 Mid-Year Financial Report

Capital Outlay Review:

As depicted by the preceding chart, Capital Outlays totaled \$63.7 million, or 43.2 percent of the capital outlay cash flow budget for FY 2020-21 as of December 31, 2020. Costs are slightly lower than the proportionate budget through the mid-year as some projects are still in the design phase or have experienced various delays or deferrals. Examples as of December 31 are Headworks Rehabilitation at Plant 1, which has a budget of \$9.4 million but actual costs of \$618,000, Rehabilitation of Western Regional Sewers, which has a budget of \$5.7 million but actual costs of \$215,000, and Ocean Outfall System Rehabilitation, which has a budget of \$26.1 million but actual costs of \$9.6 million. **Overall, the capital outlay costs of the capital improvement program are expected to approximate \$145.7 million, or 98.7 percent of the capital outlay cash flow budget at year-end.**

More detailed information on the capital improvement program is provided within Section 3.

Capital Assets Schedule and Debt Service Budget Review: Section 4 is the Capital Assets Schedule and Debt Service Section. This section shows the cost value of the Sanitation District's capital facilities at December 31, 2020, as well as the debt service costs resulting from the need to provide funding for the construction of capital facilities.

The majority of principal payments on debt issues are due in February during the third quarter of each fiscal year. As of December 31, 2020, no principal payments have been made through the end of the mid-year. Total principal payments are expected to approximate budget at year-end. Interest costs are expensed ratably throughout the fiscal year. Interest expense is anticipated to approximate budget at year-end.

Consolidated Financial Reports

Self-Insurance Budget Reviews: Section 5 is the Self-Insurance Section. Through December 31, the Self-Insurance Fund revenues totaled \$1.4 million, or 67.2 percent of the budget, while expenses are \$1.3 million, or 46.3 percent of the budget.

Separate fund accounting is used for recording the revenue and expenses incurred in managing these liability claims. The revenues to these funds represent charges to operating divisions. Expenses to these funds include actual claims paid, claims administration, and excess loss policies.

FY 2020-21 Mid-Year Financial Report

Summary of Capital Improvement Construction Requirements - Project Life For the Six Months Ended December 31, 2020

	Approved Project Budget	June 30, 2020 Accumulated Cost	Current Year Projected Cost	Total Projected Cost at June 30, 2021	Remaining Future Budget
Collection System Improvement Projects					
Collections Facilities					
Santa Ana Trunk Sewer Rehabilitation	54,620,000	-	-	-	54,620,000
Greenville-Sullivan Trunk Improvements	48,600,000	-	-	-	48,600,000
Taft Branch Capacity Improvements	14,000,000	56,207	103,600	159,807	13,840,193
Newhope - Placentia Trunk Grade Separation Replacement	4,300,000	4,201,046	-	4,201,046	98,954
Newhope-Placentia Trunk Replacement	112,000,000	84,639,453	17,147,300	101,786,753	10,213,247
Yorba Linda Dosing Station Installation	14,080,000	-	-	-	14,080,000
Beach Relief / Knott / Miller Holder Trunk Rehabilitation	35,132,000	-	-	-	35,132,000
Westminster Blvd Force Main Replacement	44,000,000	11,848,266	14,659,600	26,507,866	17,492,134
Rehabilitation of Western Regional Sewers	70,000,000	18,006,959	1,574,900	19,581,859	50,418,141
Interstate 405 Widening Project Impacts on OC San Sewers	250,000	120,181	24,600	144,781	105,219
Seal Beach Pump Station Replacement	78,900,000	1,227,409	2,589,700	3,817,109	75,082,891
Los Alamitos Sub-Trunk Extension	84,124,000	-	-	-	84,124,000
Crystal Cove Pump Station Rehabilitation	13,200,000	-	-	-	13,200,000
Bay Bridge Pump Station Replacement	74,000,000	1,105,544	4,350,000	5,455,544	68,544,456
Newport Beach Pump Station Pressurization Improvements	4,300,000	118,338	203,100	321,438	3,978,562
District 6 Trunk Sewer Relief	7,250,000	7,154,952	6,000	7,160,952	89,048
MacArthur Pump Station Rehabilitation	9,800,000	-	-	-	9,800,000
Main Street Pump Station Rehabilitation	39,450,000	-	-	-	39,450,000
Gisler Red-Hill Interceptor & Baker Force Main Rehabilitation	21,000,000	75,383	1,084,600	1,159,983	19,840,017
MacArthur Force Main Improvement	2,468,000	-	30,000	30,000	2,438,000
North Trunk Improvements	9,200,000	-	-	-	9,200,000
Edinger Pump Station Replacement	10,153,000	-	-	-	10,153,000
Slater Pump Station Rehabilitation	26,622,000	-	-	-	26,622,000
Small Construction Projects Program - Collections	10,103,000	4,753,104	1,043,300	5,796,404	4,306,596
Operations & Maintenance Capital Program - Collections	623,000	153,952	144,800	298,752	324,248
Planning Studies Program - Collections	4,259,000	3,480,009	381,700	3,861,709	397,291
Research Program - Collections	154,000	46,250	-	46,250	107,750
SARI Rock Stabilizers Removal	4,860,000	3,699,556	20,300	3,719,856	1,140,144
Sunflower and Red Hill Interceptor Repairs	4,700,000	218,182	288,600	506,782	4,193,218
Total Collection System Improvement Projects	802,148,000	140,904,791	43,652,100	184,556,891	617,591,109

Capital Improvement Program Budget Review

Summary of Capital Improvement Construction Requirements - Project Life For the Six Months Ended December 31, 2020

	Approved Project Budget	June 30, 2020 Accumulated Cost	Current Year Projected Cost	Total Projected Cost at June 30, 2021	Remaining Future Budget
Treatment & Disposal Projects					
Headworks					
Headworks Rehabilitation at Plant 1	406,000,000	29,367,809	2,959,200	32,327,009	373,672,991
Headworks Modifications at P2 for GWRS Final Expansion	32,000,000	8,077,454	7,630,600	15,708,054	16,291,946
Subtotal - Headworks	438,000,000	37,445,263	10,589,800	48,035,063	389,964,937
Primary Treatment					
Primary Sedimentation Basins 3-5 Replacement at Plant 1	117,700,000	523,034	400	523,434	117,176,566
Primary Sedimentation Basins 6-31 Reliability Improv at P1	10,100,000	945,035	837,500	1,782,535	8,317,465
Primary Treatment Rehabilitation at Plant 2	237,000,000	28,788,870	6,241,100	35,029,970	201,970,030
B/C-Side Primary Clarifiers Rehabilitation at Plant 2	279,842,000	-	-	-	279,842,000
Subtotal - Primary Treatment	644,642,000	30,256,939	7,079,000	37,335,939	607,306,061
Secondary Treatment					
Return Activated Sludge Piping Replacement at Plant 1	10,300,000	4,038,731	5,113,200	9,151,931	1,148,069
Return Activated Sludge Piping Replacement at Plant 2	10,800,000	2,029,755	3,898,000	5,927,755	4,872,245
Activated Sludge Aeration Basin Rehabilitation at Plant 2	65,600,000	-	-	-	65,600,000
Subtotal - Secondary Treatment	86,700,000	6,068,486	9,011,200	15,079,686	71,620,314
Solids Handling & Digestion					
Sludge Dewatering and Odor Control at Plant 1	197,000,000	195,780,280	454,700	196,234,980	765,020
Digester Ferric Chloride Piping Replacement at Plant 1	1,360,000	124,687	230,500	355,187	1,004,813
Sludge Dewatering and Odor Control at Plant 2	90,477,000	85,102,044	1,427,900	86,529,944	3,947,056
Interim Food Waste Receiving Facility	6,300,000	1,289,539	133,200	1,422,739	4,877,261
TPAD Digester Facility at Plant 2	455,000,000	503,810	7,859,600	8,363,410	446,636,590
Digester P, Q, R, and S Replacement	165,900,000	-	-	-	165,900,000
Digesters Rehabilitation at Plant No. 2	40,632,000	-	-	-	40,632,000
Subtotal - Solids Handling & Digestion	956,669,000	282,800,360	10,105,900	292,906,260	663,762,740
Ocean Outfall Systems					
Ocean Outfall System Rehabilitation	166,000,000	58,201,457	21,507,500	79,708,957	86,291,043
Sodium Bisulfite Station Rehabilitation at Plant 2	3,834,000	-	101,900	101,900	3,732,100
Subtotal - Ocean Outfall Systems	169,834,000	58,201,457	21,609,400	79,810,857	90,023,143
Utility Systems					
Electrical Power Distribution System Improvements	26,500,000	388,036	1,369,500	1,757,536	24,742,464
Digester Gas Facilities Rehabilitation	173,000,000	8,304,560	4,784,400	13,088,960	159,911,040
Natural Gas Pipelines Replacement at Plants 1 and 2	1,610,000	471,007	1,126,400	1,597,407	12,593
Central Generation Engine Overhauls at Plants 1 and 2	26,000,000	-	75,100	75,100	25,924,900
Power Building Structural Seismic Improv at Plants 1 & 2	7,080,000	-	-	-	7,080,000

STAFF REPORT

Mid-Year Treasurer's Report
For the Period Ended December 31, 2020

SUMMARY

Section 17.0 of the Orange County Sanitation District's (Sanitation District) Investment Policy includes quarterly reporting requirements for the Sanitation District's two investment portfolios. These two funds, the "Liquid Operating Monies," and the "Long-Term Operating Monies" are managed by Chandler Asset Management, the Sanitation District's external money manager.

The ongoing monitoring of the Sanitation District's investment program by staff and Callan Associates, the Sanitation District's independent investment advisor, indicates that the Sanitation District's investments are in compliance with the Sanitation District's adopted Investment Policy and the California Government Code, and that overall performance has tracked with benchmark indices. In addition, sufficient liquidity and anticipated revenues are available for the Sanitation District to meet budgeted expenditures for the next six months. The Sanitation District portfolios do not include any reverse repurchase agreements or derivative securities.

ADDITIONAL INFORMATION

Performance Reports

The Quarterly Strategy Review, prepared by Chandler Asset Management, and the Investment Measurement Service Quarterly Review, prepared by Callan Associates, is attached for reference. Also attached are Long-Term and Liquid Operating Monies Summary of Performance Data and Portfolio Statistics charts that depict the performance results, estimated yield and duration, credit quality, and sector diversification of the Sanitation District portfolios, as of December 31, 2020. The Liquid Operating Monies portfolio, with an average maturity of 120 days, consists entirely of high quality fixed income investments consistent with the Sanitation District's investment policy.

Portfolio Performance Summary

The following table presents a performance summary of the Sanitation District portfolios as compared to their benchmarks as of December 31, 2020.

Mr. Lorenzo Tyner
Assistant General Manager
Director of Finance and Administrative Services
Orange County Sanitation District
10844 Ellis Avenue
Fountain Valley CA 92708-7018

Dear Lorenzo,

Bond Market Recap

While we remain optimistic about the longer-term outlook, recent economic data suggests that the economy has lost momentum as virus cases have risen. We believe the near-term will remain challenging as the labor market remains under pressure and many regions have renewed business restrictions due to the virus. However, the passage of a new \$900 billion COVID-19 fiscal relief bill should help cushion the economy over the next few months, and we believe the incoming Presidential administration will have a keen focus on accelerating vaccine distribution and getting the economy back on track. While the vaccine rollout has gotten off to a slow start, we expect more widespread distribution of vaccines in the second and third quarter of 2021. We also expect the Fed's highly accommodative monetary policy framework will continue to provide support for the financial markets.

The Federal Open Market Committee (FOMC) kept monetary policy unchanged at their December meeting as expected, with the fed funds target rate in a range of 0.0% to 0.25%. The Fed intends to remain highly accommodative until their goals of maximum employment and higher inflation are achieved. The Fed's summary of economic projections continues to signal that the target fed funds rate will remain unchanged until at least 2023, as policymakers do not expect inflation to exceed 2.0% during that timeframe. Until the Fed has made substantial progress toward achieving their dual mandate of maximum employment and price stability, they have set a floor for monthly asset purchases of at least \$80 billion per month of Treasuries and \$40 billion per month of agency mortgage-backed securities. Notably, the Fed's outlook for GDP over the next few years was revised higher and the outlook for unemployment was revised lower compared with their previous forecasts in September, which suggests increased optimism. Nevertheless, the outlook remains uncertain and Fed Chair Powell indicated that the Fed would increase policy accommodation further if progress toward their dual mandate slows.

The Treasury yield curve steepened in December, due at least in part by favorable developments on the vaccine front and anticipation of improving economic activity in 2021. The yield on 2-year Treasuries was down slightly to 0.12% while the yield on 10-year Treasuries was up nearly eight basis point to 0.92%.

In 2020, Treasury yields declined but the curve steepened as short-term rates declined more than long-term rates. The 3-month T-bill yield was down 149 basis points, the 2-year Treasury yield was down 145 basis points, and the 10-Year Treasury yield was down 100 basis points, year-over-year.

Consumer Prices

The Consumer Price Index (CPI) was up 1.2% year-over-year in November, unchanged from October. Core CPI (CPI less food and energy) was up 1.6% year-over-year in November, also unchanged from October. The Personal Consumption Expenditures (PCE) index was up 1.1% year-over-year in November, versus up 1.2% year-over-year in October. Core PCE, which is the Fed's primary inflation gauge, was up 1.4% year-over-year in November, unchanged from October. Inflation remains below the Fed's target.

Retail Sales

Consumer spending trends softened in November. On a year-over-year basis, retail sales were up 4.1% in November versus 5.5% in October. On a month-over-month basis, retail sales declined 1.1% in November, with broad-based declines in many categories on a seasonally adjusted basis. Excluding vehicles and gas, retail sales fell 0.8% in November, following a 0.1% decline in October. Notably, retail sales make up roughly one third of the personal consumption expenditures component of US gross domestic product (GDP), while services revenue comprises roughly two thirds. Spending on services has been hit particularly hard by the pandemic and lagged the pick-up in overall third quarter GDP. While retail sales remain higher on a year-over-year basis, we believe this has been partially boosted by the contraction in spending on services.

Labor Market

U.S. nonfarm payrolls declined by 140,000 in December. It was the first monthly decline in nonfarm payrolls since April of last year and came in well below expectations for a 50,000 gain. The monthly decline was led by the leisure and hospitality sector which experienced a 498,000 net decline in payrolls in December, along with modest declines in government jobs and education and health services. The unemployment rate was unchanged in December at 6.7% and has improved significantly from the peak of 14.8% last April. Nevertheless, more than 10.7 million people remain unemployed. Workers who classified themselves as employed but absent from work in December continued to understate the unemployment rate by about 0.6%. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons, remained high but declined to 11.7% in December from 12.0% in November. The labor participation rate was unchanged at 61.5% in December and remains well below pre-pandemic levels.

Housing Starts

Total housing starts increased 1.2% in November to an annual pace of 1,547,000. Single family starts inched up 0.4% to a very strong annualized rate of 1,186,000, while multi-family starts increased 4.0% to an annualized rate of 361,000. On a year-over-year basis, total housing starts were up 12.8% in November, driven by growth in single-family starts. Meanwhile, permits were up 6.2% on a month-over-month basis in November, to an annualized rate of 1,639,000 (the strongest rate since 2006).

Performance Attribution

Long-Term Portfolio

The portfolio generated a positive absolute and relative return during the quarter of 0.21% compared to the 0.15% return of the ICE Bank of America Merrill Lynch 1-5 Year US Corporate and Government AAA-A Index. The overweight to the Agency sector compared to the benchmark aided the performance of the portfolio. The out of benchmark exposure to the Asset Backed sector was also beneficial as spreads in the Agency, Asset Backed and Corporate sectors all rallied during the quarter. The Corporate allocation was a modest detractor from performance per the attribution model due to the underlying mix of securities. The OC San portfolio has an up in quality bias within the underlying Corporate holdings in the portfolio and the lower quality portions of the benchmark experienced greater spread compression during the quarter. The Chandler team will continue to optimize the structure of the portfolio and underlying mix of securities to deliver consistent, stable investment returns over the coming quarters.

Multiple securities were purchased across the Treasury, Agency, Supranational, Certificate of Deposit and Corporate sectors of the allocation. The purchased securities ranged in maturity from February 2021 to December 2025. Two securities were sold, several matured, and \$31 million was contributed into the portfolio to facilitate the new holdings. The sector allocation was relatively stable. The Supranational exposure increased due to the Chandler team participating in a new issue deal in the sector while the ABS allocation contracted due to the pay down of principal and interest during the quarter. The duration of the portfolio contracted to 2.44 compared to 2.52 at the end of the prior quarter. The large cash contribution late in the year contributed to the shortening of the duration of the portfolio. The Chandler team will be working to keep the duration close to the benchmark duration in coming quarters.

Liquid Portfolio

Many securities were purchase across the Treasury, Agency, and Certificate of Deposit sectors to keep the portfolio positioned consistent with the strategy and to spend down the \$97 million contribution late in December. The purchased securities ranged in maturity between January 2021 to July 2021. Multiple securities also matured during the quarter. The sector allocation was relatively stable. The Treasury allocation increased to 81.2% of the portfolio due to the large contribution late in the year when liquidity in other investment vehicles was lacking. The duration of the portfolio was stable ending the quarter at 0.33 compared to 0.32 at the end of September.

Economic Outlook

Increasing coronavirus case counts and the subsequent decrease in consumer mobility was poised to adversely impact the market and economic outlook in the fourth quarter of 2020. However, in early November markets received unambiguous positive news with the results of the clinical trial for the Pfizer BioNTech Vaccine being released and exhibiting a very high efficacy rate for the COVID-19 coronavirus. The timeline for a viable vaccine was consistent with market expectations however the high efficacy rate was viewed as “new news” which changed sentiment and propelled risk assets higher. Markets began to aggressively position for the “reopening trade” as both investment grade and high yield credit spreads moved tighter, and equity market breadth improved materially with the small cap sector outperforming the large cap sector. Consistent with the improved global outlook correlated with the vaccine developments, the US dollar moved lower and Treasury yields moved moderately higher, with longer maturity yields moving higher at a faster pace as the Treasury curve began to steepen.

Political rhetoric related to the election and additional fiscal stimulus dominated the headlines throughout the quarter. Despite the almost daily back and forth between Congressional leadership, late in the quarter additional fiscal stimulus was finally passed, which should help to stabilize the economy as the vaccination process quickens in Q1 and Q2 of 2021. The incoming Biden administration is also expected to seek further fiscal support to enhance economic growth in 2021. Additionally, the Federal Reserve continues to provide strong support to the economic recovery despite the sunset of several liquidity tools implemented at the height of the crisis in March and April of 2020. The Chandler team does not have any immediate concerns about the expiration of the Fed backstops. In the event the market becomes dislocated again due to another exogenous shock to the economy we have a high level of confidence the US Treasury and Federal Reserve would work closely together to reimplement the tools to stabilize markets. The Federal Reserve also updated their Summary of Economic Projections in mid-December. The Fed continues to emphasize a willingness to keep policy highly stimulative until their dual mandate of full employment and stable prices is achieved. Notably, the Fed is looking for inflation to average 2% over the cycle and is expressing a willingness to tolerate inflation above the target for a period of time to make up for the shortfalls below the target over the past decade. Market based measure of inflation continue to price in a higher probability of the Fed meeting their inflation objective as the Ten Year TIP breakeven spread – a market based measure of longer term inflation expectations – increased to 1.99% as of December 31 compared to 1.63% at the end of September. The Chandler team expects the Fed Funds rate to remain at the zero lower bound for all of 2021 and is closely monitoring market based measures of inflation; the Ten Year TIP breakeven spread needs to trade in a consistent range of 2.30% to 2.60% for a period of time before Fed officials would consider altering their stance on the zero lower bound in Chandler’s view.

Economic data continues to recover from the shock to the system in March and April of 2020. However, many metrics will not fully recover until a large portion of the domestic population has achieved immunity from the coronavirus. Nonfarm payrolls were robust through the summer, but the rate of improvement slowed late in the year. The three month moving average on nonfarm payroll growth moved down to 283k in December compared to 1,321k as of September. The U3 unemployment rate is currently at 6.7%, after having topped out at 14.8% in April 2020 while the U6 Underemployment rate remains elevated at 11.7% compared to 22.9% in April. The manufacturing indices have been a bright spot, with the ISM Manufacturing Index reaching a YTD high in December at 60.7 with the ISM Non-Manufacturing Index most recent reading at 57.2. The consumer facing portion of the economy continues to face strong headwinds, however the Chandler team is confident substantial pent-up demand has the potential to propel the economy forward in the 2nd half of 2021. The current fiscal and monetary policy settings should continue to provide a constructive backdrop for asset prices in 2021 despite the secular changes to the economy due to the pandemic.

Strategy

Strategy highlights for the Long-Term Portfolio in coming months:

- Focus on positioning the portfolio with a term structure and asset allocation that will benefit the performance as the domestic economy gradually reopens through the course of 2021 with the distribution of vaccines to combat the COVID-19 coronavirus.
 - Utilize the new issue market in the Corporate and ABS sector to increase exposure.
 - Remain opportunistic and patient in adding risk exposure to the portfolio as valuations at year-end were full.
 - Selectively increase exposure to the Supranational sector while it is trading at a relative value discount to the Agency sector.
- Monetary policy is poised to remain at the zero lower bound for all of 2021. The Chandler team anticipates keeping the duration of the portfolio consistent with the benchmark during the coming quarters.

Strategy highlights for the Liquidity Portfolio in coming months:

- Continue to ladder the Treasury and Agency exposure to coincide with forecasted liquidity needs.
- Opportunistically add Corporate, Negotiable CD and Commercial Paper exposure to the portfolio where the additional spread compensation versus like maturity Treasury notes is attractive.
- Maintain a dedicated exposure to the Treasury sector on an ongoing basis to ensure ample liquidity in the portfolio for unexpected cash flow needs.

Compliance Issues

Orange County Sanitation District Long Term

Assets managed by Chandler Asset Management are in full compliance with state law and with the investment policy

Category	Standard	Comment
Treasury Issues	10% minimum; 5 years max maturity	Complies*
U.S. Agencies	20% max per agency of the U.S. Government, which does not provide the full faith and credit of the U.S. government; 5 years max maturity	Complies
Supranational Obligations	"AA" rated or better by a NRSRO; 30% maximum; 5 years max maturity; U.S. dollar denominated senior unsecured unsubordinated obligations issued or unconditionally guaranteed by the International Bank for Reconstruction and Development ("IBRD"), the International Finance Corporation ("IFC") or the Inter-American Development Bank ("IADB")	Complies
Corporate Medium Term Notes	"A" rated or better long term debt by a NRSRO; 30% maximum; 5% max issuer; 5 years max maturity; Issued by corporations organized and operating within the U.S. or issued by depository institutions licensed by the U.S. or any state and operating within the U.S.	Complies
Municipal Securities	"A" rated or higher by a NRSRO; Taxable or tax-exempt municipal bonds issued by any of the 50 states; 10% maximum; 5% max issuer; 5 years max maturity	Complies
Mortgage-Backed Securities/ Collateralized Mortgage Obligations/ Asset-Backed Securities	"AA" rated or better by a NRSRO; 20% maximum (combined MBS/CMO/ABS); 5% max issuer (except U.S. government or its agencies); 5 years max maturity	Complies*

Statement of Transactions by Transaction Date

Transaction Date	Transaction Description	Income	Principal	Cost	Realized Gains/Losses
------------------	-------------------------	--------	-----------	------	-----------------------

No Transactions This Period

Cumulative realized capital gain and loss position from 12/31/2019 for securities held in principal of account:

Short Term: 80,464.87 * Long Term: 0.00 *

* The above gain and loss position does not include transactions where tax cost information is incomplete or unavailable.

The Bank of New York Mellon may utilize subsidiaries and affiliates to provide services and certain products to the Account. Subsidiaries and affiliates may be compensated for their services and products.

The value of securities set forth on this Account Statement are determined by The Bank of New York Mellon for Corporate Trust on the basis of market prices and information obtained by The Bank of New York Mellon from unaffiliated third parties (including independent pricing vendors) ("third party pricing services"). The Bank of New York Mellon has not verified such market values or information and makes no assurances as to the accuracy or correctness of such market values or information or that the market values set forth on this Account Statement reflect the value of the securities that can be realized upon the sale of such securities. In addition, the market values for securities set forth in this Account Statement may differ from the market prices and information for the same securities used by other business units of The Bank of New York Mellon or its subsidiaries or affiliates based upon market prices and information received from other third party pricing services utilized by such other business units. Corporate Trust does not compare its market values with those used by, or reconcile different market values used by, other business units of The Bank of New York Mellon or its subsidiaries or its affiliates. The Bank of New York Mellon shall not be liable for any loss, damage or expense incurred as a result of or arising from or related to the market values or information provided by third party pricing services or the differences in market prices or information provided by other third party pricing services.

Recent Developments

- During the quarter, \$31.0 million was contributed to the Long Term Operating Fund and \$97.0 million was contributed to the Liquid Operating Monies.

Organizational Issues

- N/A

Fixed Income Market Snapshot

- U.S. Treasury yields rose steadily over the course of 4Q; the 10-year U.S. Treasury yield closed the quarter at 0.93%, up 24 basis points from Sept. 30, but off sharply from the year-end level of 1.92%. TIPS (Bloomberg Barclays US TIPS: +1.6%) strongly outperformed nominal U.S. Treasuries for the quarter as 10-year breakeven spreads widened from 163 bps to 199 bps. The Bloomberg Barclays US Aggregate Bond Index gained 0.7%, bringing its 2020 gain to 7.5%. Corporates strongly outperformed U.S. Treasuries for the quarter and the year (Bloomberg Barclays US Treasury: -0.8%; +8.0%; Bloomberg Barclays US Corporate: +3.0%; +9.9%) in

spite of record 2020 issuance. High yield corporates (Bloomberg Barclays High Yield: +6.5%; +7.1%) outperformed investment grade for the quarter but trailed for the year. High yield default rates (6.2% y-o-y as of December) continued to trend higher but are expected to peak far below levels reached in the Global Financial Crisis. Separately, municipal bonds (Bloomberg Barclays Muni Bond Index: +1.8%; +5.2%) outperformed U.S. Treasuries for the quarter but trailed for the year.

Manager Performance

- The Long Term Operating Fund generated a 0.21% return in the fourth quarter, which trailed the 0.37% return of the ML U.S. 1-5 Corp/Gov Index. Over the trailing one-year period, the Long Term Operating Fund gained 4.42%, which trailed the benchmark return of 4.65%. The manager ranked in the bottom quartile among the Callan Short Term Fixed Income peer group in the fourth quarter, but is above median over the trailing year. The fund ranks above median over all trailing periods longer than one year.
- Credit spreads tightened in the fourth quarter, particularly among lower-quality credit, which led to modest underperformance for Chandler's more conservatively positioned portfolio relative to the benchmark. The fund's out-of-benchmark exposure to asset-backed securities, continued to outperform the overall index. Sector allocation remained relatively stable during the quarter. The portfolio had less than 30% invested in credit (21%) and less than the permitted 20% invested in the combination of asset-backed securities (4%), commercial mortgage backed securities (0%), and CMOs (0%) as of December 30, 2021 (see page 20).
- The Liquid Operating Portfolio declined 0.02% (after fees) in the fourth quarter, trailing the Citigroup 3-Month Treasury Bill Index's return of 0.02% by four basis points. Over the trailing year, the fund gained 0.69%, which outpaced the benchmark by 11 basis points.

Cordially,

Alex Ford
Vice President

Capital Market Review

U.S. EQUITY

Record highs in 2020

The S&P 500 Index hit a record high in 4Q20. The Index was up 12.1% for the quarter, bringing the 2020 gain to 18.4%.

- Since its March low, the S&P is up over 70%, with all sectors posting increases greater than 40%.
- 4Q winner: Energy (+28%), but down 34% for the year
- Top 2020 sector: Technology with 44% gain (+12% in 4Q)
- Pandemic has cast a pall over certain sectors while rewarding others: online retail soared 69% in 2020, while hotels/cruise lines, airlines, and retail REITs dropped ~30%.
- Apple, Microsoft, Amazon, Facebook, and Alphabet made up 22% of S&P 500 market cap at year-end, and for 2020, accounted for 12.1% of 18.4% Index return.

Anti-momentum rally

- In 4Q, value outperformed growth across the cap spectrum driven by vaccine progress, political clarity, and further stimulus. For the year, however, value trails growth by a significant margin due to Tech's outperformance.
- Fueled by the prospect of an economic recovery, small cap outperformed large in 4Q but was even on the year. Small value was the best performer for the quarter, but 2020 gain is a mere 4.6%.
- 4Q experienced a shift in YTD 2020 trends, attributed to expectations of broader economic recovery from the vaccine roll-out and the presidential election outcome.
- Cyclical sectors such as Energy, Financials, Industrials, and Materials outperformed during the quarter.
- Although stocks with the highest P/E's significantly outperformed for the year, the trend shifted after the vaccine announcement and stocks with zero earnings estimates or P/E's less than 10 shot up.

GLOBAL/GLOBAL EX-U.S. EQUITY

Vaccine rollouts extend and expand risk-on rally

- Prospects of global economic recovery propelled by COVID-19 vaccination fueled double-digit returns broadly across developed and emerging markets.
- Expectations of reverting back to normal economic activity by late 2021 enabled risk assets to thrive.
- Emerging markets outperformed developed markets, led by Latam—specifically Brazil.
- Small cap outperformed large as business confidence improved with news of vaccination.

Market rotates to cyclicals

- Positive outlook on reflation trade stoked Energy, Materials, and Financials to drive the market.
- Beta and volatility led factor performance due to market rotation.

U.S. dollar vs. other currencies

- U.S. dollar continued to lose ground as appetite for risk increased with the expectation that a path to global economic recovery is on the horizon.

Growth vs. value

- Value topped growth as sentiment shifted to cyclical sectors.

4Q20 belonged to value; does it have staying power?

- COVID-19 benefited value as the quarter brought news of successful vaccines.
- Financials, Travel, and Energy rebounded
- MSCI World Growth (+12.4%) trailed MSCI World Value (+15.2%) over the three-month period.
- Even with this divergence of style in 4Q20, growth still outpaced value globally by over 35% for the full year.

Potential tailwinds for value

- Higher interest rates on the heels of potentially higher inflation with government stimulus and businesses reopening
- Continued rebound of discretionary spending in areas neglected in 2020 as markets reopen: lodging, travel

The good news

- Recent dollar weakness supports emerging markets.
- Could continue in 2021—wider U.S. fiscal deficit plus stronger emerging market currencies on the heels of higher growth

Global Equity: Quarterly Returns

Global Equity: One-Year Returns

Source: MSCI

U.S. FIXED INCOME

Treasury yields rose

- The 10-year U.S. Treasury yield closed 4Q20 at 0.93%, up 24 bps from 3Q20 but off from the year-end level of 1.92%.
- TIPS outperformed nominal U.S. Treasuries as 10-year breakeven spreads widened from 163 bps to 199 bps.
- No rate hikes are expected until at least 2023.

Bloomberg Barclays Aggregate gained slightly

- Corporate credit outperformed treasuries as investors continued to hunt for yield.
- Corporate credit ended the year up 9.9% despite record issuance in 2020.

High yield bonds gained on the quarter as rally extended

- High yield bonds outperformed IG in 4Q, returning 6.5%, but trailed IG for the year.
- Leveraged loans gained 3.8% as demand remained strong to finish the year.

Munis boosted by favorable supply/demand dynamics

- Municipals outperformed Treasuries for the quarter, but remained down for the year.
- Tax-exempt issuance was muted amid strong demand.
- Lower quality outperformed for the quarter; however, higher quality outperformed for the year.

U.S. credit attractive to non-U.S. investors

- Central banks globally are adopting a “lower for longer” mindset toward rates.
- 89% of positive yields globally are in the U.S., spurring demand for U.S. corporate credit.
- Lower LIBOR rates have decreased currency hedging costs; combined with a steep Treasury curve, that makes U.S. credit attractive to non-U.S. investors.

Implications of U.S. rates rising in 4Q

- U.S. Treasury rates rose in 4Q, most notably in the intermediate and long portions of the yield curve.
- As Democrats won both seats in the Georgia run-off, greater fiscal stimulus is likely. This may lead to further steepening of the yield curve and increased inflation expectations.
- A rising rate environment opens opportunities for floating-rate securities like leveraged loans, and makes securities with shorter durations such as securitized credit more attractive.

GLOBAL FIXED INCOME

Global fixed income rose amid monetary backdrop

- Low rates and asset purchase programs continued to prop up the global bond market.
- Broad-based U.S. dollar weakness resulting from continued confidence in risk assets dampened hedged returns as the USD lost 4.27% versus the euro, 5.43% versus the British pound, and 2.02% versus the yen.

Emerging market debt ended the year positive

- Emerging market debt indices gained in 4Q20, finishing the year in positive territory amid a global search for yield and renewed growth expectations.
- U.S. dollar-denominated index (EMBI Global Diversified) underperformed local currency emerging market debt as U.S. rates rose; returns were mixed across the 70+ constituents.
- Local currency index (GBI-EM Global Diversified) was up significantly, with broad-based gains across constituents.

Active Management Overview

Market Overview

Active Management vs Index Returns

Market Overview

The charts below illustrate the range of returns across managers in Callan's Separate Account database over the most recent one quarter and one year time periods. The database is broken down by asset class to illustrate the difference in returns across those asset classes. An appropriate index is also shown for each asset class for comparison purposes. As an example, the first bar in the upper chart illustrates the range of returns for domestic equity managers over the last quarter. The triangle represents the S&P 500 return. The number next to the triangle represents the ranking of the S&P 500 in the Large Cap Equity manager database.

Range of Separate Account Manager Returns by Asset Class One Quarter Ended December 31, 2020

Range of Separate Account Manager Returns by Asset Class One Year Ended December 31, 2020

Domestic Fixed Income Active Management Overview

U.S. Treasury yields rose steadily over the course of 4Q; the 10-year U.S. Treasury yield closed the quarter at 0.93%, up 24 basis points from Sept. 30, but off sharply from the year-end level of 1.92%. TIPS (Bloomberg Barclays US TIPS: +1.6%) strongly outperformed nominal U.S. Treasuries for the quarter as 10-year breakeven spreads widened from 163 bps to 199 bps. The Bloomberg Barclays US Aggregate Bond Index gained 0.7%, bringing its 2020 gain to 7.5%. Investment grade corporates strongly outperformed U.S. Treasuries for the quarter and the year (Bloomberg Barclays US Treasury: -0.8%; +8.0%; Bloomberg Barclays US Corporate: +3.0%; +9.9%) in spite of record 2020 issuance. High yield corporates (Bloomberg Barclays High Yield: +6.5%; +7.1%) outperformed investment grade for the quarter but trailed for the year. High yield default rates (6.2% y-o-y as of December) continued to trend higher but are expected to peak far below levels reached in the Global Financial Crisis.

Manager Analysis

Long Term Operating Fund Period Ended December 31, 2020

Investment Philosophy

Chandler Asset Management's Short Term Bond strategy is driven by quantitative models and focuses on active duration management, sector selection and term structure. The strategy seeks to achieve consistent above-benchmark returns with low volatility relative to the style's performance benchmark. The firm has a unique focus on high quality fixed income management, and places risk control as a higher objective than return. Assets were transferred in kind to Chandler on 12/1/2014. Previous performance reflects PIMCO.

Quarterly Summary and Highlights

- Long Term Operating Fund's portfolio posted a 0.21% return for the quarter placing it in the 87 percentile of the Callan Short Term Fixed Income group for the quarter and in the 35 percentile for the last year.
- Long Term Operating Fund's portfolio underperformed the ML:Corp/Gov 1-5 Yr by 0.15% for the quarter and underperformed the ML:Corp/Gov 1-5 Yr for the year by 0.23%.

Education

Founded in 1994, the "Callan College" offers educational sessions for industry professionals involved in the investment decision-making process.

Introduction to Investments—Virtual

April 13-15, 2021

This program familiarizes institutional investor trustees and staff and asset management advisers with basic investment theory, terminology, and practices. It is held over three days with virtual modules of 2.5-3 hours. This course is designed for individuals with less than two years of experience with asset-management oversight and/or support responsibilities. Tuition is \$950 per person and includes instruction and digital materials.

Additional information including registration can be found at: callan.com/events/april-intro-college-virtual/

Introduction to Investments—In Person

July 14-15, 2021, in San Francisco

This program familiarizes institutional investor trustees and staff and asset management advisers with basic investment theory, terminology, and practices. It lasts one-and-a-half days and is designed for individuals with less than two years of experience with asset-management oversight and/or support responsibilities. Tuition is \$2,350 per person and includes instruction, all materials, breakfast and lunch on each day, and dinner on the first evening with the instructors.

Additional information including dates and registration can be found at: callan.com/events/july-intro-college/

"Research is the foundation of all we do at Callan, and sharing our best thinking with the investment community is our way of helping to foster dialogue to raise the bar across the industry."

Greg Allen, CEO and Chief Research Officer

Risk/Reward Statistics

The risk statistics used in this report examine performance characteristics of a manager or a portfolio relative to a benchmark (market indicator) which assumes to represent overall movements in the asset class being considered. The main unit of analysis is the excess return, which is the portfolio return minus the return on a risk free asset (3 month T-Bill).

Alpha measures a portfolio's return in excess of the market return adjusted for risk. It is a measure of the manager's contribution to performance with reference to security selection. A positive alpha indicates that a portfolio was positively rewarded for the residual risk which was taken for that level of market exposure.

Beta measures the sensitivity of rates of portfolio returns to movements in the market index. A portfolio's beta measures the expected change in return per 1% change in the return on the market. If a beta of a portfolio is 1.5, a 1 percent increase in the return on the market will result, on average, in a 1.5 percent increase in the return on the portfolio. The converse would also be true.

Downside Risk stems from the desire to differentiate between "good risk" (upside volatility) and "bad risk" (downside volatility). Whereas standard deviation punishes both upside and downside volatility, downside risk measures only the standard deviation of returns below the target. Returns above the target are assigned a deviation of zero. Both the frequency and magnitude of underperformance affect the amount of downside risk.

Excess Return Ratio is a measure of risk adjusted relative return. This ratio captures the amount of active management performance (value added relative to an index) per unit of active management risk (tracking error against the index.) It is calculated by dividing the manager's annualized cumulative excess return relative to the index by the standard deviation of the individual quarterly excess returns. The Excess Return Ratio can be interpreted as the manager's active risk/reward tradeoff for diverging from the index when the index is mandated to be the "riskless" market position.

Information Ratio measures the manager's market risk-adjusted excess return per unit of residual risk relative to a benchmark. It is computed by dividing alpha by the residual risk over a given time period. Assuming all other factors being equal, managers with lower residual risk achieve higher values in the information ratio. Managers with higher information ratios will add value relative to the benchmark more reliably and consistently.

R-Squared indicates the extent to which the variability of the portfolio returns are explained by market action. It can also be thought of as measuring the diversification relative to the appropriate benchmark. An r-squared value of .75 indicates that 75% of the fluctuation in a portfolio return is explained by market action. An r-squared of 1.0 indicates that a portfolio's returns are entirely related to the market and it is not influenced by other factors. An r-squared of zero indicates that no relationship exists between the portfolio's return and the market.

Relative Standard Deviation is a simple measure of a manager's risk (volatility) relative to a benchmark. It is calculated by dividing the manager's standard deviation of returns by the benchmark's standard deviation of returns. A relative standard deviation of 1.20, for example, means the manager has exhibited 20% more risk than the benchmark over that time period. A ratio of .80 would imply 20% less risk. This ratio is especially useful when analyzing the risk of investment grade fixed-income products where actual historical durations are not available. By using this relative risk measure over rolling time periods one can illustrate the "implied" historical duration patterns of the portfolio versus the benchmark.

Residual Portfolio Risk is the unsystematic risk of a fund, the portion of the total risk unique to the fund (manager) itself and not related to the overall market. This reflects the "bets" which the manager places in that particular asset market. These bets may reflect emphasis in particular sectors, maturities (for bonds), or other issue specific factors which the manager considers a good investment opportunity. Diversification of the portfolio will reduce or eliminate the residual risk of that portfolio.

Risk/Reward Statistics

Rising Declining Periods refer to the sub-asset class cycles vis-a-vis the broader asset class. This is determined by evaluating the cumulative relative sub-asset class index performance to that of the broader asset class index. For example, to determine the Growth Style cycle, the S&P 500 Growth Index (sub-asset class) performance is compared to that of the S&P 500 Index (broader asset class).

Sharpe Ratio is a commonly used measure of risk-adjusted return. It is calculated by subtracting the "risk-free" return (usually 3 Month Treasury Bill) from the portfolio return and dividing the resulting "excess return" by the portfolio's risk level (standard deviation). The result is a measure of return gained per unit of risk taken.

Sortino Ratio is a downside risk-adjusted measure of value-added. It measures excess return over a benchmark divided by downside risk. The natural appeal is that it identifies value-added per unit of truly bad risk. The danger of interpretation, however, lies in these two areas: (1) the statistical significance of the denominator, and (2) its reliance on the persistence of skewness in return distributions.

Standard Deviation is a statistical measure of portfolio risk. It reflects the average deviation of the observations from their sample mean. Standard deviation is used as an estimate of risk since it measures how wide the range of returns typically is. The wider the typical range of returns, the higher the standard deviation of returns, and the higher the portfolio risk. If returns are normally distributed (ie. has a bell shaped curve distribution) then approximately 2/3 of the returns would occur within plus or minus one standard deviation from the sample mean.

Total Portfolio Risk is a measure of the volatility of the quarterly excess returns of an asset. Total risk is composed of two measures of risk: market (non-diversifiable or systematic) risk and residual (diversifiable or unsystematic) risk. The purpose of portfolio diversification is to reduce the residual risk of the portfolio.

Tracking Error is a statistical measure of a portfolio's risk relative to an index. It reflects the standard deviation of a portfolio's individual quarterly or monthly returns from the index's returns. Typically, the lower the Tracking Error, the more "index-like" the portfolio.

Treynor Ratio represents the portfolio's average excess return over a specified period divided by the beta relative to its benchmark over that same period. This measure reflects the reward over the risk-free rate relative to the systematic risk assumed.

Note: Alpha, Total Risk, and Residual Risk are annualized.

Fixed Income Portfolio Characteristics

All Portfolio Characteristics are derived by first calculating the characteristics for each security, and then calculating the market value weighted average of these values for the portfolio.

Allocation by Sector - Sector allocation is one of the tools which managers often use to add value without impacting the duration of the portfolio. The sector weights exhibit can be used to contrast a portfolio's weights with those of the index to identify any significant sector bets.

Average Coupon - The average coupon is the market value weighted average coupon of all securities in the portfolio. The total portfolio coupon payments per year are divided by the total portfolio par value.

Average Moody's Rating for Total Portfolio - A measure of the credit quality as determined by the individual security ratings. The ratings for each security, from Moody's Investor Service, are compiled into a composite rating for the whole portfolio. Quality symbols range from Aaa+ (highest investment quality - lowest credit risk) to C (lowest investment quality - highest credit risk).

Average Option Adjusted (Effective) Convexity - Convexity is a measure of the portfolio's exposure to interest rate risk. It is a measure of how much the duration of the portfolio will change given a change in interest rates. Generally, securities with negative convexities are considered to be risky in that changes in interest rates will result in disadvantageous changes in duration. When a security's duration changes it indicates that the stream of expected future cash-flows has changed, generally having a significant impact on the value of the security. The option adjusted convexity for each security in the portfolio is calculated using models developed by Lehman Brothers and Salomon Brothers which determine the expected stream of cash-flows for the security based on various interest rate scenarios. Expected cash-flows take into account any put or call options embedded in the security, any expected sinking-fund paydowns or any expected mortgage principal prepayments.

Average Option Adjusted (Effective) Duration - Duration is one measure of the portfolio's exposure to interest rate risk. Generally, the higher a portfolio's duration, the more that its value will change in response to interest rate changes. The option adjusted duration for each security in the portfolio is calculated using models developed by Lehman Brothers and Salomon Brothers which determine the expected stream of cash-flows for the security based on various interest rate scenarios. Expected cash-flows take into account any put or call options embedded in the security, any expected sinking-fund paydowns or any expected mortgage principal prepayments.

Average Price - The average price is equal to the portfolio market value divided by the number of securities in the portfolio. Portfolios with an average price above par will tend to generate more current income than those with an average price below par.

Average Years to Expected Maturity - This is a measure of the market-value-weighted average of the years to expected maturity across all of the securities in the portfolio. Expected years to maturity takes into account any put or call options embedded in the security, any expected sinking-fund paydowns or any expected mortgage principal prepayments.

Average Years to Stated Maturity - The average years to stated maturity is the market value weighted average time to stated maturity for all securities in the portfolio. This measure does not take into account imbedded options, sinking fund paydowns, or prepayments.

Current Yield - The current yield is the current annual income generated by the total portfolio market value. It is equal to the total portfolio coupon payments per year divided by the current total portfolio market value.

Fixed Income Portfolio Characteristics

Duration Dispersion - Duration dispersion is the market-value weighted standard deviation of the portfolio's individual security durations around the total portfolio duration. The higher the dispersion, the more variable the security durations relative to the total portfolio duration ("barbellness"), and the smaller the dispersion, the more concentrated the holdings' durations around the overall portfolio's ("bulletness"). The purpose of this statistic is to gauge the "bulletness" or "barbellness" of a portfolio relative to its total duration and to that of its benchmark index.

Effective Yield - The effective yield is the actual total annualized return that would be realized if all securities in the portfolio were held to their expected maturities. Effective yield is calculated as the internal rate of return, using the current market value and all expected future interest and principal cash flows. This measure incorporates sinking fund paydowns, expected mortgage principal prepayments, and the exercise of any "in-the-money" imbedded put or call options.

Weighted Average Life - The weighted average life of a security is the weighted average time to payment of all remaining principal. It is calculated by multiplying each expected future principal payment amount by the time left to the payment. This amount is then divided by the total amount of principal remaining. Weighted average life is commonly used as a measure of the investment life for pass-through security types for comparison to non-pass-through securities.

Section 1 | Economic Update

Economic Update

- Recent economic data suggests that the economy has lost momentum as virus cases have risen. We anticipated that economic data would soften during the winter months, and believe the near-term outlook remains challenging as the labor market remains under pressure and many regions have renewed business restrictions due to the virus. However, the passage of a new \$900 billion COVID-19 fiscal relief bill should help cushion the economy over the next few months, and we believe the incoming Presidential administration will have a keen focus on getting the economy back on track. We also remain very optimistic about progress on vaccines. A limited number of vaccine doses have already been distributed, and we expect more widespread distribution in the second and third quarter of 2021. We believe the distribution of vaccines and therapeutics will help fuel the economic recovery later this year. We also expect the Fed's highly accommodative monetary policy framework will continue to provide support for the financial markets.
- The Federal Open Market Committee (FOMC) kept monetary policy unchanged at their December meeting as expected, with the fed funds target rate in a range of 0.0% to 0.25%. The Fed intends to remain highly accommodative until their goals of maximum employment and higher inflation are achieved. The Fed's summary of economic projections continues to signal that the target fed funds rate will remain unchanged until at least 2023, as policymakers do not expect inflation to exceed 2.0% during that timeframe. Until the Fed has made substantial progress toward achieving their dual mandate of maximum employment and price stability, they have set a floor for monthly asset purchases of at least \$80 billion per month of Treasuries and \$40 billion per month of agency mortgage-backed securities. Notably, the Fed's outlook for GDP over the next few years was revised higher and the outlook for unemployment was revised lower compared with their previous forecasts in September, which suggests increased optimism. Nevertheless, the outlook remains uncertain and Fed Chair Powell indicated that the Fed would increase policy accommodation further if progress toward their dual mandate slows.
- In 2020, the yield on 2-year Treasuries was down 145 basis points to 0.12% and the yield on 10-year Treasuries was down about 100 basis points to 0.91%. The yield curve steepened modestly in December and month-to-date the yield curve has continued to steepen, likely due in part to favorable developments on the vaccine front. Month-to-date, the yield on 2-year Treasuries is little changed but the yield on 10-year Treasuries is up about 20 basis points. We believe the Treasury yield curve is poised to steepen modestly further in 2021 as the economy reopens, driven by an increase in longer-term rates as the front end of the curve is likely to remain anchored near 0.0%.

Employment

Source: US Department of Labor

Source: US Department of Labor

U.S. nonfarm payrolls declined by 140,000 in December. It was the first monthly decline in nonfarm payrolls since April of last year and came in well below expectations for a 50,000 gain. The monthly decline was led by the leisure and hospitality sector which experienced a 498,000 net decline in payrolls in December, along with modest declines in government jobs and education and health services. The unemployment rate was unchanged in December at 6.7% and has improved significantly from the peak of 14.8% last April. Nevertheless, more than 10.7 million people remain unemployed. Workers who classified themselves as employed but absent from work in December continued to understate the unemployment rate by about 0.6%. The U-6 underemployment rate, which includes those who are marginally attached to the labor force and employed part time for economic reasons, remained high but declined to 11.7% in December from 12.0% in November. The labor participation rate was unchanged at 61.5% in December and remains well below pre-pandemic levels.

Initial Claims for Unemployment

Initial Claims For Unemployment October 02, 2020 - January 01, 2021

Source: US Department of Labor

In the most recent week, the number of initial jobless claims decreased to 787,000 compared to 790,000 in the prior week. The level of continuing unemployment claims (where the data is lagged by one week) decreased to about 5.1 million from roughly 5.2 million in the prior week. Although jobless claims have declined from the early stage of the pandemic, they have remained well above the 2019 average of 1.7 million. Given the resurgence of the virus and renewed lockdown measures, we believe the labor market is likely to remain under pressure over the near term.

Inflation

Consumer Price Index (CPI)

Source: US Department of Labor

Personal Consumption Expenditures (PCE)

Source: US Department of Commerce

The Consumer Price Index (CPI) was up 1.2% year-over-year in November, unchanged from October. Core CPI (CPI less food and energy) was up 1.6% year-over-year in November, also unchanged from October. The Personal Consumption Expenditures (PCE) index was up 1.1% year-over-year in November, versus up 1.2% year-over-year in October. Core PCE, which is the Fed's primary inflation gauge, was up 1.4% year-over-year in November, unchanged from October. Inflation remains below the Fed's target.

Consumer

Source: US Department of Commerce

Source: The Conference Board

Consumer spending trends softened in November. On a year-over-year basis, retail sales were up 4.1% in November versus 5.5% in October. On a month-over-month basis, retail sales declined 1.1% in November, with broad-based declines in many categories on a seasonally adjusted basis. Excluding vehicles and gas, retail sales fell 0.8% in November, following a 0.1% decline in October. Notably, retail sales makes up roughly one third of the personal consumption expenditures component of US gross domestic product (GDP), while services revenue comprises roughly two thirds. Spending on services has been hit particularly hard by the pandemic and lagged the pick-up in overall third quarter GDP. While retail sales remain higher on a year-over-year basis, we believe this has been partially boosted by the contraction in spending on services. The Consumer Confidence index declined to 88.6 in December from 92.9 in November. The index is well below pre-pandemic levels at the start of this year.

Economic Activity

Leading Economic Indicators (LEI)

Source: The Conference Board

Chicago Fed National Activity Index (CFNAI)

Source: Federal Reserve Bank of Chicago

The Conference Board’s Leading Economic Index (LEI) rose 0.6% in November (following a 0.8% increase in October) but remained down 2.2% year-over-year. According to the Conference Board, a decelerating pace of improvement in the LEI in recent months suggests that economic growth has moderated heading into 2021. Furthermore, the Conference Board warns of potential downside risks to economic growth from a second wave of the virus and high unemployment. The Chicago Fed National Activity Index (CFNAI) declined to 0.27 in November from 1.01 in October. On a 3-month moving average basis, the CFNAI declined to 0.56 in November from 0.85 in October. The index slipped on a one month and 3-month basis, but a positive index reading corresponds to above trend growth.

Housing

Source: US Department of Commerce

Source: S&P

Total housing starts increased 1.2% in November to an annual pace of 1,547,000. Single family starts inched up 0.4% to a very strong annualized rate of 1,186,000, while multi-family starts increased 4.0% to an annualized rate of 361,000. On a year-over-year basis, total housing starts were up 12.8% in November, driven by growth in single-family starts. Meanwhile, permits were up 6.2% on a month-over-month basis in November, to an annualized rate of 1,639,000 (the strongest rate since 2006). According to the Case-Shiller 20-City home price index, home prices were up 7.9% year-over-year in October versus up 6.6% year-over-year in September. The housing market has been an area of strength during the pandemic. Very low mortgage rates, solid stock market performance, and a meaningful shift toward working from home are providing strong tailwinds for the housing sector.

Manufacturing

Source: Institute for Supply Management

Source: Federal Reserve

The Institute for Supply Management (ISM) manufacturing index increased to 60.7 in December from 57.5 in November. Readings above 50.0 are indicative of expansion in the manufacturing sector. We believe a weakening US dollar has been supportive of the US manufacturing sector throughout the pandemic. The Industrial Production index was down 5.5% year-over-year in November, versus down 5.0% in October. On a month-over-month basis, the Industrial Production index increased 0.4% in November, following a 0.9% increase in October. Capacity Utilization increased to 73.3% in November from 73.0% in October, but remains well below the long-run average of 79.8%. Overall manufacturing conditions have improved since the deep contraction in activity earlier this year, but industrial production remains lower on a year-over-year basis.

Gross Domestic Product (GDP)

Components of GDP	12/19	3/20	6/20	9/20
Personal Consumption Expenditures	1.1%	-4.8%	-24.0%	25.4%
Gross Private Domestic Investment	-0.6%	-1.6%	-8.8%	12.0%
Net Exports and Imports	1.5%	1.1%	0.6%	-3.2%
Federal Government Expenditures	0.3%	0.1%	1.2%	-0.4%
State and Local (Consumption and Gross Investment)	0.2%	0.1%	-0.4%	-0.4%
Total	2.4%	-5.0%	-31.4%	33.4%

Source: US Department of Commerce

Gross Domestic Product (GDP)

Source: US Department of Commerce

According to the third estimate, real US gross domestic product (GDP) grew at an annualized rate of 33.4% in the third quarter (up slightly from the advance and second estimates), following a 31.4% annualized decline in the second quarter. Third quarter GDP growth was by far the largest annualized gain on record but followed the largest annualized decline in GDP on record in the second quarter. Personal consumption expenditures rebounded in the third quarter and was by far the biggest contributor to third quarter GDP growth. The consensus estimate for fourth quarter 2020 GDP growth is 4.6%. The consensus forecast for US gross domestic product growth in 2021 is 4.0%, following an expected 3.5% decline in 2020.

Federal Reserve

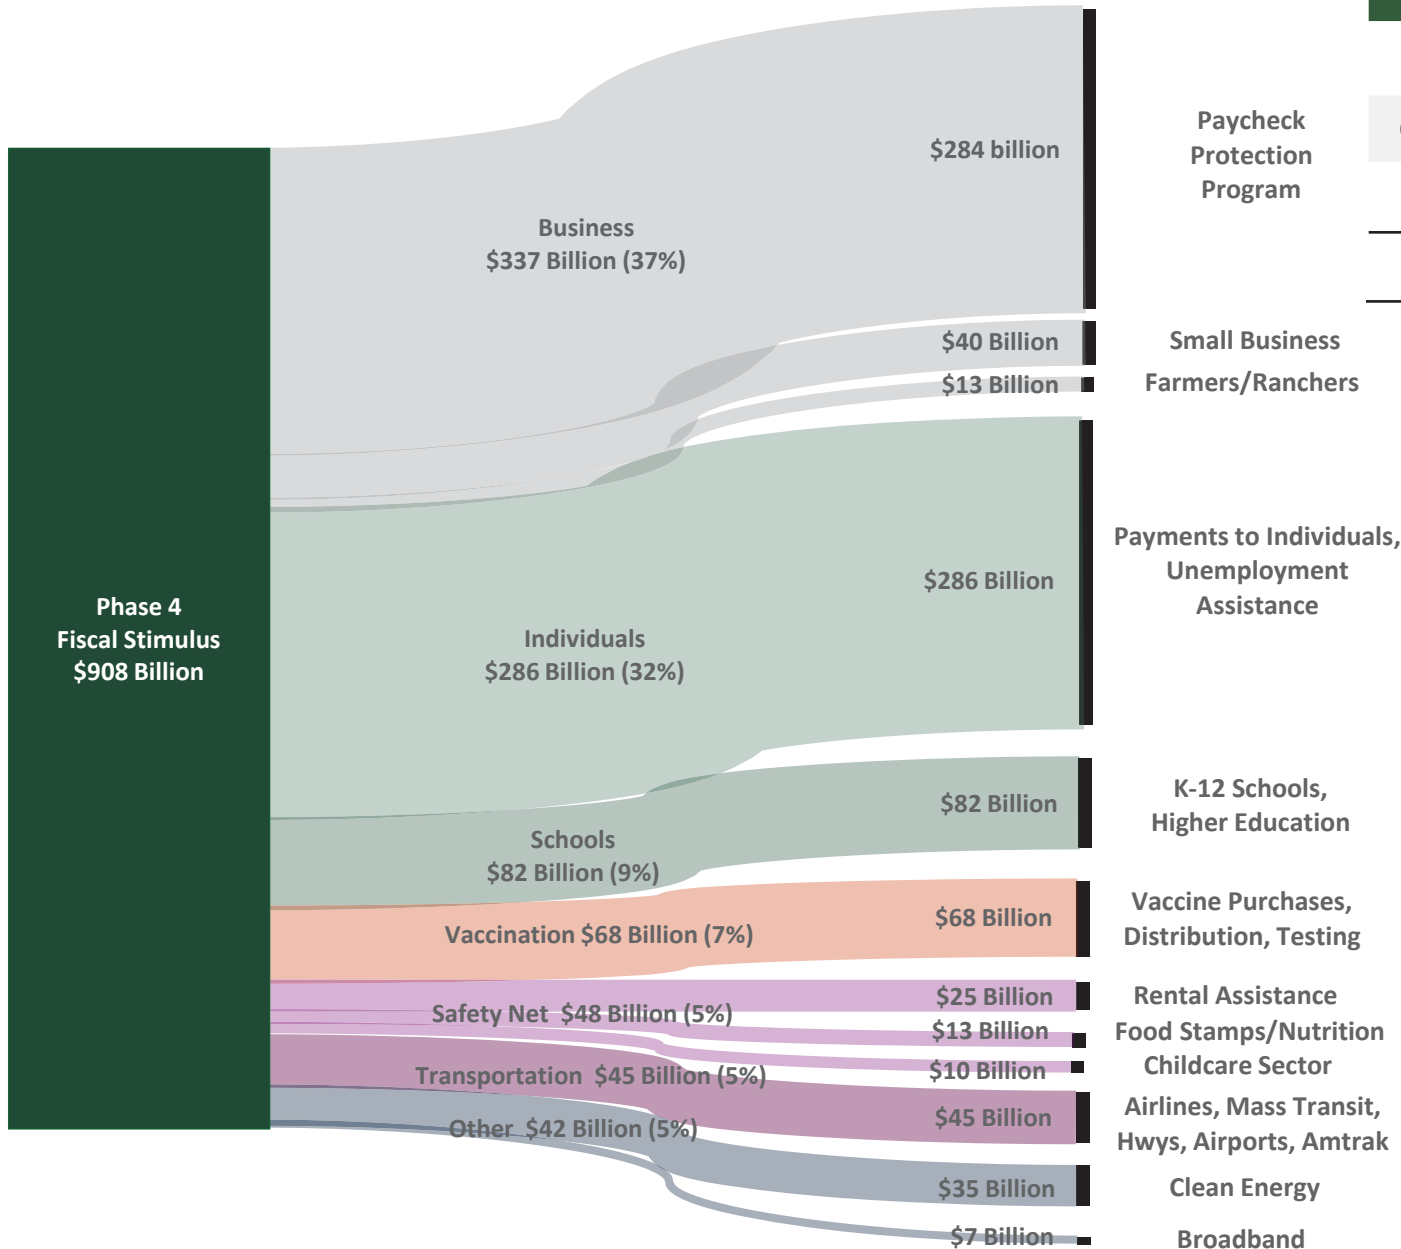

Source: Federal Reserve

Source: Bloomberg

The Fed has taken a wide range of aggressive actions to help stabilize and provide liquidity to the financial markets. The Fed has lowered the fed funds target rate to a range of 0.0%-0.25% and continues to purchase Treasury and agency mortgage-backed securities to support smooth market functioning. Earlier this year, policymakers reinstated the Commercial Paper Funding Facility and Money Market Mutual Fund Liquidity Facility. The Fed also established the Primary Market Corporate Credit Facility, Secondary Market Corporate Credit Facility, Term Asset-Backed Securities Loan Facility, Paycheck Protection Program Liquidity Facility, Main Street Lending Facility, and Municipal Liquidity Facility. The Fed has also provided short-term funding through large-scale repo operations and lowered the reserve requirement for depository institutions. Notably, many of the Fed's lending facilities are set to expire at the end of this year, including the Fed's corporate credit, asset-backed securities, municipal lending, and Main Street Lending programs. The Fed will return the unused funds currently earmarked for those facilities to the Treasury.

\$3.6 Trillion Stimulus And Counting

Fiscal Package	Amount
CARES Act	\$2.23 Trillion
Coronavirus Relief Bill	\$484 Billion
Phase 4 Stimulus	\$908 Billion
Total So Far	\$3.6 Trillion

Source: U.S. Congress

Bond Yields

US Treasury Note Yields

Source: Bloomberg

US Treasury Yield Curve

Source: Bloomberg

Treasury yields were much lower on a year-over-year basis at 2020 year-end. The 3-month T-bill yield was down 149 basis points, the 2-year Treasury yield was down 145 basis points, and the 10-Year Treasury yield was down 100 basis points, year-over-year. Yields declined precipitously in March 2020, with the Fed cutting rates by a total of 150 basis points and a flight to safe-haven assets driving down yields across the curve. The Fed has signaled plans to keep the front end of the Treasury yield curve anchored near zero for at least the next few years.

Section 2 | Account Profile

Investment Objectives

The investment objectives of the Orange County Sanitation District are first, to provide safety of principal to ensure the preservation of capital in the overall portfolio; second, to provide sufficient liquidity to meet all operating requirements; and third, to earn a commensurate rate of return consistent with the constraints imposed by the safety and liquidity objectives.

Chandler Asset Management Performance Objective

Liquid Operating Monies – will be compared to the 3-month T-Bill rate and operate with a maximum maturity of one year. Long-Term Operating Monies – will be compared to the ICE BAML 1-5 Year Corporate Government Rated AAA – A Index.

Strategy

In order to achieve these objectives, the portfolio invests in high quality fixed income securities consistent with the investment policy and California Government Code.

Orange County Sanitation District Long Term

Assets managed by Chandler Asset Management are in full compliance with state law and with the investment policy

Category	Standard	Comment
Treasury Issues	10% minimum; 5 years max maturity	Complies*

Multiple securities were purchased across the Treasury, Agency, Supranational, Certificate of Deposit and Corporate sectors of the allocation. The purchased securities ranged in maturity from February 2021 to December 2025. Two securities were sold, several matured, and \$31 million was contributed into the portfolio to facilitate the new holdings.

Sector Distribution

As of December 31, 2020

Orange County Sanitation District Long Term

December 31, 2020

September 30, 2020

The sector allocation was relatively stable. The Supranational exposure increased due to the Chandler team participating in a new issue deal in the sector while the ABS allocation contracted due to the pay down of principal and interest during the quarter.

As of December 31, 2020

2020 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by IDC, an independent pricing source. In the event IDC does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S&P, Moody's and Fitch respectively.

ICE BAML 3-Month US Treasury Bill Index

The ICE BAML US 3-Month Treasury Bill Index is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. The issue selected at each month-end rebalancing is the outstanding Treasury Bill that matures closest to, but not beyond, three months from the rebalancing date. (Index: GOO1. Please visit www.mlindex.ml.com for more information)

ICE BAML 1-5 Yr US Corp/Govt Rated AAA-A Index

The ICE BAML US Issuers 1-5 Year AAA-A US Corporate & Government Index tracks the performance of US dollar denominated investment grade debt publicly issued in the US domestic market, including US Treasury, US agency, foreign government, supranational and corporate securities. Qualifying securities must be issued from US issuers and be rated AAA through A3 (based on an average of Moody's, S&P and Fitch). In addition, qualifying securities must have at least one year remaining term to final maturity and less than five years remaining term to final maturity, at least 18 months to final maturity at point of issuance, a fixed coupon schedule and a minimum amount outstanding of \$1 billion for US Treasuries and \$250 million for all other securities. (Index: BV10. Please visit www.mlindex.ml.com for more information)

ICE BAML US 1-5 Yr US Corp/Govt Rated AAA-BBB Index

The ICE BAML 1-5 Year US Corporate & Government Index tracks the performance of US dollar denominated investment grade debt publicly issued in the US domestic market, including US Treasury, US agency, foreign government, supranational and corporate securities. Qualifying securities must have an investment grade rating (based on an average of Moody's, S&P and Fitch). In addition, qualifying securities must have at least one year remaining term to final maturity and less than five years remaining term to final maturity, at least 18 months to final maturity at point of issuance, a fixed coupon schedule and a minimum amount outstanding of \$1 billion for US Treasuries and \$250 million for all other securities. (Index: BVA0. Please visit www.mlindex.ml.com for more information)

Rating Agency Comparisons

A summary of investment grade ratings are listed below. More complete descriptions of Moody's and Standard & Poor's ratings are included in the following pages.

Quality/Grade	Moody's	Standard & Poor's	Fitch
Best Quality	Aaa	AAA	AAA
High Quality	Aa1 Aa2 Aa3	AA+ AA AA-	AA+ AA AA-
Upper Medium Grade	A1 A2 A3	A+ A A-	A+ A A-
Medium Grade	Baa1 Baa2 Baa3	BBB+ BBB BBB-	BBB+ BBB BBB1

Moody's - Investment Grade

"Aaa" - Bonds rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk. Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

"Aa" - Bonds which are rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in Aaa securities.

"A" - Bonds which are rated A possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment sometime in the future.

"Baa" - Bonds which are rated Baa are considered as medium grade obligations; i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Bonds in the Aa, A, and Baa are also assigned "1", "2", or "3" based on the strength of the issue within each category. Accordingly, "A1" would be the strongest group of A securities and "A3" would be the weakest A securities.

Ba, B, Caa, Ca, and C - Bonds that possess one of these ratings provide questionable protection of interest and principal ("Ba" indicates some speculative elements; "B" indicates a general lack of characteristics of desirable investment; "Caa" represents a poor standing; "Ca" represents obligations which are speculative in a high degree; and "C" represents the lowest rated class of bonds). "Caa", "Ca" and "C" bonds may be in default.

Standard and Poor's - Investment Grade

AAA - Debt rated "AAA" has the highest rating assigned by S&P. Capacity to pay interest and repay principal is extremely strong.

AA - Debt rated "AA" has a very strong capacity to pay interest and repay principal and differs from the highest rated issues only in small degree.

A - Debt rated "A" has a strong capacity to pay interest and repay principal although it is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.

BBB - Debt rated "BBB" is regarded as having an adequate capacity to pay interest and repay principal. Whereas it normally exhibits adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal for debt in this category than in higher rated categories.

Standard and Poor's - Speculative Grade Rating

Debt rated "BB", "B", "CCC", "CC" and "C" is regarded as having predominantly speculative characteristics with respect to capacity to pay interest and repay principal. "BB" indicates the least degree of speculation and "C" the highest. While such debt will likely have some quality and protective characteristics these are outweighed by major uncertainties or major exposures to adverse conditions.

BB - Debt rated "BB" has less near-term vulnerability to default than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to inadequate capacity to meet timely interest and principal payments. The "BB" rating category is also used for debt subordinated to senior debt that is assigned an actual or implied "BBB" rating.

B - Debt rated "B" has a greater vulnerability to default but currently has the capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions will likely impair capacity or willingness to pay interest and repay principal. The "B" rating category is also used for debt subordinated to senior debt that is assigned an actual or implied "BB" or "BB" rating.

CCC - Debt rated "CCC" has a currently identifiable vulnerability to default, and is dependent upon favorable business, financial, and economic conditions to meet timely payment of interest and repayment of principal. In the event of adverse business, financial, or economic conditions, it is not likely to have the capacity to pay interest and repay principal. The "CCC" rating category is also used for debt subordinated to senior debt that is assigned an actual or implied "B" or "B" rating.

CC - The rating "CC" typically is applied to debt subordinated to senior debt that is assigned an actual or implied "CCC" debt rating.

C - The rating "C" typically is applied to debt subordinated to senior debt which is assigned an actual or implied "CCC" debt rating. The "C" rating may be used to cover a situation where a bankruptcy petition has been filed, but debt service payments are continued.

CI - The rating "CI" is reserved for income bonds on which no interest is being paid.

D - Debt rated "D" is in payment default. The "D" rating category is used when interest payments or principal payments are not made on the date due even if the applicable grace period has not expired, unless S&P believes that such payments will be made during such grace period. The "D" rating also will be used upon the filing of a bankruptcy petition if debt service payments are jeopardized.

Plus (+) or Minus (-) - The ratings from "AA" to "CCC" may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

NR - Indicates no rating has been requested, that there is insufficient information on which to base a rating, or that S&P does not rate a particular type of obligation as a matter of policy.

STAFF REPORT

Mid-Year Certificates of Participation (COP) Report for the Period Ended December 31, 2020

Summary

The Orange County Sanitation District (Sanitation District) began issuing Certificates of Participation (COPs) in 1990. These COPs were a part of our long-term financing plan that included both variable interest rate and traditional fixed rate borrowing. Following are the current outstanding debt issues of the Sanitation District:

In May 2010, the Sanitation District issued \$80 million of fixed rate BABs, Series 2010A at a true interest cost of 3.68 percent for the issue.

In December 2010, the Sanitation District issued \$157 million of fixed rate BABs, Series 2010C at a true interest cost of 4.11 percent for the issue.

In October 2011, the Sanitation District issued \$147.595 million of fixed rate COPs, Series 2011A refunding a portion of the Series 2000 variable rate debt and a portion of the Series 2003 fixed rate debt. The true interest cost for the issue is 2.61 percent.

In March 2012, the Sanitation District issued \$100.645 million of fixed rate COPs, Series 2012A refunding the Series 2003 fixed rate debt. The true interest cost for the issue is 3.54 percent.

In August 2012, the Sanitation District issued \$66.395 million of fixed rate COPs, Series 2012B refunding the Series 2000 variable rate debt. The true interest cost for the issue is 1.50 percent.

With the issuance of Series 2012B, there remains no variable interest rate COPs at the Sanitation District.

In August 2014, the Sanitation District issued \$85.09 million of fixed rate COPs, Series 2014A, refunding a portion of Series 2007B debt. The true interest cost for the issue is 2.34 percent.

In February 2015, the Sanitation District issued \$127.51 million of fixed rate COPs, Series 2015A, refunding \$152.99 million of the Series 2007B debt. The true interest cost for the issue is 3.30 percent.

In March 2016, the Sanitation District issued \$145.88 million of fixed rate CANs, Series 2016A, refunding \$162.78 million of the Series 2009A fixed rate debt. The true interest cost for the issue is 3.02 percent.

In February 2017, the Sanitation District issued \$66.37 million of fixed rate COPs, Series 2017A, refunding \$91.885 million of the Series 2007A debt. The true interest cost for the issue is 2.55 percent.

In November 2018, the Sanitation District issued \$102.2 million of fixed rate CANs, Series 2018A, refunding the Series 2016B CANs. The true interest cost for the issue is 2.02 percent.

Additional Information

The graph entitled, "COP Rate History Report," shows the various fixed interest rates of the Sanitation District's ten debt issues.
