HOW WE INSTALL

Sewer Pipes

Orange County Sanitation District

- 1 TRAFFIC CONTROL**
First step is to establish the work zone by setting up lane closures, traffic cones, kerls, etc. This helps provide a safe work area.
- 2 SEWER BYPASS**
A bypass system is installed to redirect the sewer flow to be able to replace the aged pipe while maintaining sewer service.
If pipe is installed in new alignment bypass is not required.
- 3 PIPE INSTALLATION**
After area is excavated, shored and prepared, the pipe is installed segment by segment (pipe segments vary in length based on size of the pipe).
- 4 MANHOLE CONSTRUCTION**
Once pipe is installed, the manholes are constructed to allow access in the future for maintenance and operation of the line.
- 5 STREET RESTORATION**
Repair of medians and curbs and gutters that may have been impacted. The last step is to pave and reslope the road back to its original condition.

STATE COLLEGE SEWER CONSTRUCTION ALERT

Brochure

Phase B of the Newhope Sewer Replacement Project

The Orange County Sanitation District (OCSD) is starting construction on State College Blvd. from just south of the 91 freeway to Orangewood Avenue in the City of Anaheim to replace four miles of sewer.

The work will be done in segments, please note the various time frames for each area highlighted on the map. Lane closures will be required for all work so we advise that you plan your commutes accordingly. Please refer to our website or the Construction Hotline for specific details.

*OCSD is a public agency that provides regional wastewater collection, treatment, and recycling services for approximately 2.6 million people in central and northwest Orange County.

Have Questions? Please Contact Our Community Liaison

ORANGE COUNTY SANITATION DISTRICT

FACT SHEET

STATE COLLEGE SEWER CONSTRUCTION

CONSTRUCTION
er Replacement Project)

Orange County Sanitation District
The Orange County Sanitation District (OCSD) is a public agency that provides wastewater collection, treatment, and recycling services for approximately 2.6 million people in central and northwest Orange County. OCSD operates two facilities—Reclamation Plant No. 1 in Fountain Valley and Treatment Plant No. 2 in Huntington Beach—and treats an average of 185 million gallons of wastewater each day.

What is this Project?
The project is replacing four miles of sewer on State College Blvd. from SR-91 to Orangewood Avenue in the City of Anaheim (see map on back side). This is a two-phase project, the first phase was completed in 2017 and replaced 3 miles of sewer in the Fullerton area.

Project Timing
Construction is anticipated to begin in summer 2018 and conclude in late 2020. Most work will take place Monday to Friday during day time hours, but some portions will require night and/or weekend work.

Why is the Project Needed?
The existing sewer line needs to be up-sized to a four-and-a-half foot diameter pipe to make an additional 9 million gallons of wastewater available for recycling and to abandon the Yorba Linda Pump Station.

Due to the size of the pipe, lane closures are necessary, which can result in traffic delays. We encourage you to plan accordingly and allow extra time when traveling in the area. There will also be noise and dust, mitigation measures are in place to minimize impact.

What Impacts Can be Anticipated?
There will be lane closures, noise and dust, so keep that in mind if you commute along State College Blvd. or if you're going to an Angels game or an event at the Honda Center.

Questions?
If you have any questions or want the most up-to-date information about the project, please contact our designated community liaison at the **Construction Hotline** at (657) 208-7900 (English/Spanish), or email us at constructionhotline@ocsd.com

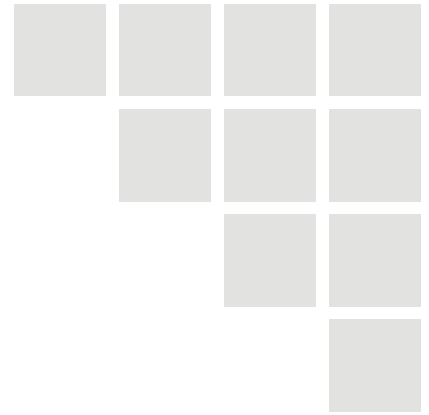

We encourage you to sign up to receive email notifications or text alerts about the project on our website at www.OCSd.com/StateCollege. We also invite you to visit the website frequently to stay up to date on specific project activities and follow us on social media @ocsewers.

OUTREACH

Construction

ORANGE COUNTY SANITATION DISTRICT

SLATER PUMP STATION

**CONSTRUCTION
ALERT**

24/7 bypass system in operation starting week of March 18 lasting approximately 2 weeks*

An area was excavated to install bypass risers over the top of existing force mains. The contractor is backfilling the excavated area with cement slurry.

The Slater Pump Station is critical to the conveyance of wastewater from local sewers to the regional wastewater treatment facilities in Fountain Valley and Huntington Beach. If the pump station is not operational 24 hours a day, there could be a sewer back up eventually leading to a spill.

Wastewater flows are pumped from the pump station to two force main pipelines. Over the past few months, weather permitting, a bypass system over each force main has been in construction. This system is needed in order to provide uninterrupted wastewater services either for routine maintenance or in case of an emergency.

For upcoming work, the pump station will be temporarily taken offline and the bypass system will be in operation with the use of bypass pumps prior to replacing critical equipment that are nearing the end of its useful life and in need of replacement.

Generators to power the bypass pumps are necessary and sound blankets will be utilized to mitigate noise. We are taking precautionary steps to minimize odors, but due to the nature of the work, you may still experience some temporary odors.

We appreciate your patience while this work takes place.

*Dates and times are subject to change due to operational factors or inclement weather.

If you would like additional information, please call our dedicated **Community Liaison** on the **Construction Hotline (714) 378-2965** or e-mail **ConstructionHotline@ocsd.com**

OUTREACH

Construction

ORANGE COUNTY SANITATION DISTRICT

NEWPORT BLVD. CONSTRUCTION ALERT

The Orange County Sanitation District (OCSD) will be working on Newport Boulevard near via Lido, between Short Street and Coast Highway for approximately the next 3 months.

What is this work?

A section of the regional sewer pipeline that transports wastewater generated from the Balboa Peninsula area of Newport Beach to the OCSD treatment facility in Huntington Beach will be rehabilitated.

Additional construction work is currently taking place north of Coast Highway between Hospital Road and Industrial Way.

What to expect?

Lane closures will be required and we advise you plan your commutes accordingly. There may be detours and some activities requiring overnight work, more info will be provided at www.OCSD.com/Newport as dates approach. Please visit the website or call the OCSD **Construction Hotline** at **(714) 378-2965** for specific details.

UPCOMING ACTIVITY

SHORT ST CLOSURE DETOUR MAP

Intermittent closures of Short St will occur throughout construction

- Short St at Newport Blvd will be closed – detour via Finley Ave
- Local access will be maintained
- Alley access behind Newport Blvd will be via Finley Ave only

WESTMINSTER FORCE MAIN PROJECT

Part of the Western Regional Sewers Program

BUSINESS REPLY MAIL

OCS&D
CONSTRUCTION OUTREACH
14000 S. TULSA AVE.
FOUNTAIN VALLEY, CA 92708-9914

WESTMINSTER BOULEVARD FORCE MAIN PROJECT OVERVIEW

What is this project?

This project will replace and reconstruct almost three miles of the existing force main system, consisting of two parallel sewer pipelines through the cities of Seal Beach and Westminster. A force main is a pipe used to move wastewater under pressure by use of a pump station. Force mains are necessary when gravity flow is not sufficient to move wastewater through a gravity line.

Why is the project needed?

The aging infrastructure is over 40 years old and nearing the end of its service life. This project is necessary to maintain a reliable and effective wastewater collection system. This project will extend the useful life of the sewer pipes another 40-50 years.

What can the community expect during construction?

OCS&D is working diligently on the project to ensure every possible measure is taken to minimize public impacts. There will be traffic restrictions reducing the number of travel lanes or requiring detours. Landscaped medians will be partially demolished during construction and will be restored to their original condition when the project is completed. Mitigation measures will be put in place to ensure compliance with City ordinances as well as to minimize the impacts to our neighbors.

Project location

Construction is anticipated to begin Spring 2018 and last 18 months.

Stay informed

Visit the project website to learn more at www.OCS&D.com/westminster. This website will be more active as construction approaches.

Questions?

Contact the Construction Hotline 714.378.2965 or email ConstructionHotline@ocsd.com.

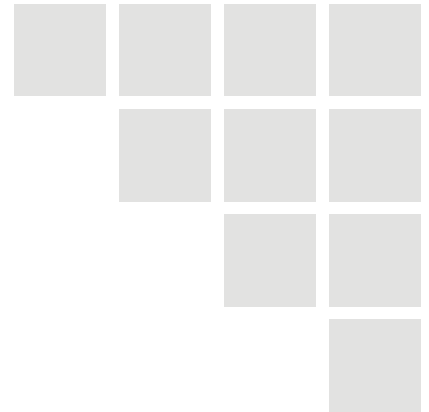

Please take our survey below. The construction duration can be affected by the allowable work hours. Advantages of long spans of work hours include efficiencies in overall construction work and shorter construction durations. Disadvantages include construction related traffic impacts. OCS&D is gathering information from the community to assist us as we design the important project, and we would like to hear from you.

OUTREACH

Construction

the neighborhood connection
published by the orange county sanitation district

(Vol. 1, No. 5) Spring 2019

DID SOMEONE SAY 30 MILLION GALLONS OF WATER?

equates to 45 Olympic Size Swimming Pools

We did! With the need for water in California growing, we must increase our local water supply and that is why the Groundwater Replenishment System (GWRS) is expanding. The GWRS facility in Fountain Valley is a joint project of the Orange County Water District (OCWD) and the Orange County Sanitation District (OCSD). It currently produces 100 million gallons of water per day for the people of Orange County. It is the world's largest water purification system for indirect potable reuse. In 2008, the facility started with an initial production rate of 70 million gallons a day (MGD), then in 2015, it expanded to 100 MGD, and is now moving towards the last phase of expansion which will give us a grand total of 130 MGD. This will provide enough water for one million people.

The GWRS takes highly treated wastewater from OCSD and puts it through a three-step advanced purification process. In order to produce 130 MGD of purified water, enough highly treated wastewater from OCSD is required for source water. The GWRS is already using all the water available at OCSD's Fountain Valley facility so water from the Huntington Beach plant must be accessed to complete the project's final expansion. This requires the construction and installation of facilities at OCSD's Huntington Beach plant as well as a conveyance system for the water to make the 3.5-mile journey to the GWRS facility in Fountain Valley. OCWD will begin construction of the facilities later this year (more to come in future newsletter issues).

This Orange County Sanitation District (OCSD) publication is to keep you, our neighbors, informed about construction activities at our Huntington Beach treatment facility (Plant No. 2).

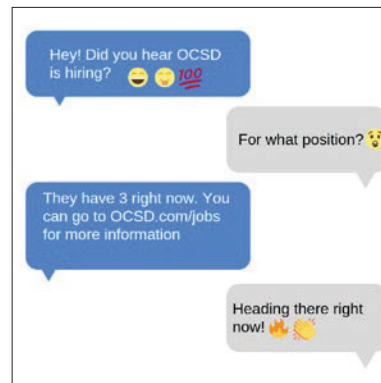

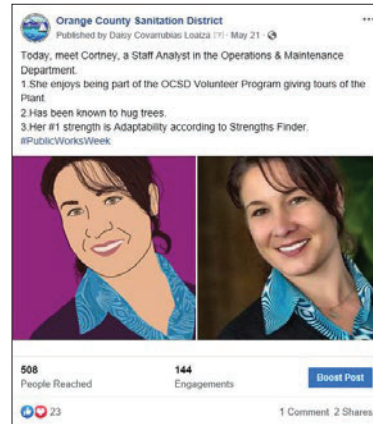

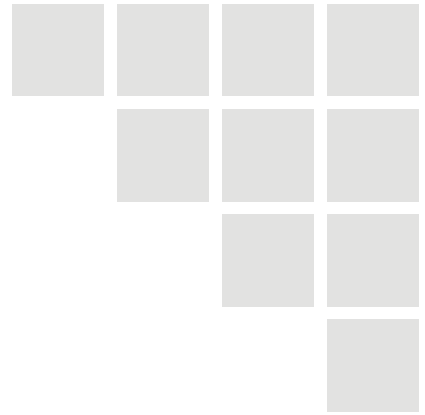

Over the next several years, OCSD's Capital Improvement Program is focusing on our infrastructure and maximizing resource recovery with many construction projects taking place at Plant No. 2.

What 2 Flush

So, let's keep our wastewater flowing and our oceans clean. Educate yourself and others. Know What 2 Flush and what to put down the drain. Protect our sewers and environment!

It's simple, the toilet is only meant to flush the three P's—
pee,
poop
and paper

Do you know what should go down the drain that is sewer safe?

Orange County Sanitation District

It be flushed down the sink. The best way to get rid of food post what you can and wipe or scrape the remnants in the a drain screen in your sink to catch any remaining bits of ou wash the dishes. Use your garbage disposal sparingly. e drain as a dump will have unforeseen consequences of sewer lines and possible backups in your home.

is and Grease (FOG)
ever be poured down the sink or garbage disposal. FOG the interior surface of the sewer pipes, hardens over time mally may cause sewage to backup and lead to a sewage our home or on our streets. Running hot water as you grease down the drain will not help either. Many people are that pouring hot water and detergent down the drain ks up grease temporarily. The best way to get rid of FOG ; cool/harden, mix it with other absorbent materials, place g or container and then throw it in the trash.

ems to make its way past the plug. Hair will catch and filter items and is very difficult to get out of piping once it keep hair from going into the pipes by using a fine drain catch hair in your bathtub and shower and dispose of it in the trash.

grounds & eggshells
If properly disposed of in the trash. Never put them in the garbage disposal. Crushed eggshells and coffee grounds can also be used for making garden compost.

Household hazardous materials
such as motor oil, pesticides, paint and solvents should never be poured down the drain. All of these are highly toxic and will cause long term damage to the environment. Dispose of these items by contacting the nearest household hazardous waste collection center where these and other household items can be dropped off. If there is just a little unused paint left, put the can in a safe place (inaccessible to children, pets, or ignition sources) and remove the lid so the remaining contents can dry out. Once the contents have dried out, replace the lid and dispose of the can in the trash or recycler.

to clog. The trash is the place for these items.

Brochure

Kitty Litter
(especially clay kitty litter) will sooner or later clog your pipes, even the ones that claim to be "flushable." Far more problematic is Toxoplasmosis, a parasite found in cat waste that is harmful to marine biology. It's better to keep your cat waste out of wastewater and just put it in the trash.

Condoms & Dental Floss
both cause more problems than you'd imagine. They don't biodegrade and can cause pipes to clog.

COMES OUT OF THE FAUCET.

The toilet is not the only drain that people are using to get rid of unwanted waste; people are also known to use the kitchen sink as a trash can. Since the invention of the garbage disposal, which claims to grind even the hard stuff such as small bones and fruit peels, people have turned the sink drain into a common destination for kitchen waste. Again, as long as it fits, people throw it or pour it down the drain. Letting trash flow and go down the kitchen sink (or any other drain in the house) may cause pipes to clog and eventually lead to sewage spills that harm the environment. Here is a list of the most common things that people dump into their sinks instead of disposing of them properly:

Do you know what should go down the drain, that is sewer safe?

It's simple, the toilet is only meant to flush the **three Ps**—pee, poop and paper.

It's the only thing going down the toilet.
From flushable wipes, medications and sanitary products to flushing these types of items down the toilet causes home e you flush) and most importantly can have a huge impact

It's the only thing going down the drain is what comes out of
ate yourself and others. **Know What 2 Flush and what** nt.

GUIDING PRIORITIES

- Seek funds for OCS D projects through grants, appropriations, or other means;
- Maintain local control over governance of special districts and other local entities;
- Oppose redundant regulatory requirements;
- Support legislative regulatory streamlining that promotes public health and the environment.

@OCsewers

ORANGE COUNTY SANITATION DISTRICT

**2019 LEGISLATIVE PRIORITIES
KEY MESSAGE CARD**

STATE

Secure funding for infrastructure, collection improvements and renewable energy at the Fountain Valley Plant No. 1 and Huntington Beach Plant No. 2.

Support legislation or regulations that **restrict the use of microplastics or wipes** and the disposal into the sewer system.

Work with legislators to ensure that unrealistic regulations are not placed on wastewater treatment facilities.

FEDERAL

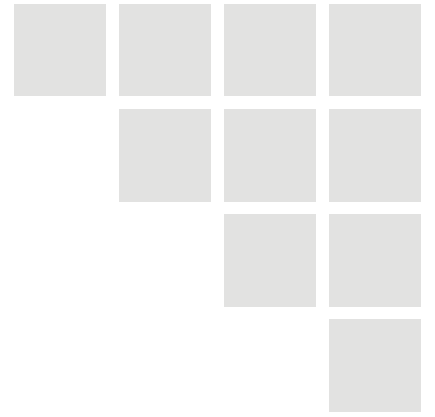

Advocate for federal water infrastructure funding including State Revolving Fund and the Water Infrastructure Improvements for the Nation (WIIN) Act.

Work with the Administration and Congress to advance permitting processes including 10-year National Pollutant Discharge Elimination System (NPDES) permits.

- **Promote restoration of federal deductibility of state and local tax payments** and oppose elimination or restriction on the use or availability of tax-exempt financing for public infrastructure.

Employee Communications

Employee Bi-Monthly Newsletter

the digester
ORANGE COUNTY SANITATION DISTRICT
NOVEMBER 2018

Thanking our Veterans
We would like to thank all of our OCSD employees and retirees who have or are currently serving our great nation.
This month, we will have a poster out in the Lobby of Plant No. 1 and Plant No. 2 with photos of our employees in the service. Make sure you check it out!

P2 night shift - Operations Center Kitchen

Clever Communication
What Works Best in Today's Dynamic World
November 14
2:30 p.m. - 3:30 p.m.
Plant No. 2 Operations Center Training Room
In this interactive session, participants will learn what it takes to **communicate effectively** and confidently in today's dynamic world.
The presentation covers:
• What makes the greatest impression during a conversation;
• The power of non-verbal cues;
• What your eye contact is telling others about you; and how it impacts those around you;
• **And more!**
*Please register through Cornerstone.

Did you know?
Pouring fats, oils and grease (FOG) down your drain can lead to **backups and sewer spills**. Your kitchen drain is generally only an inch and a half in diameter and can be easily clogged by grease and other solid food waste that goes down the sink or waste disposal unit. Please remember during this holiday season, **the drain is not a dump!** Share the message.

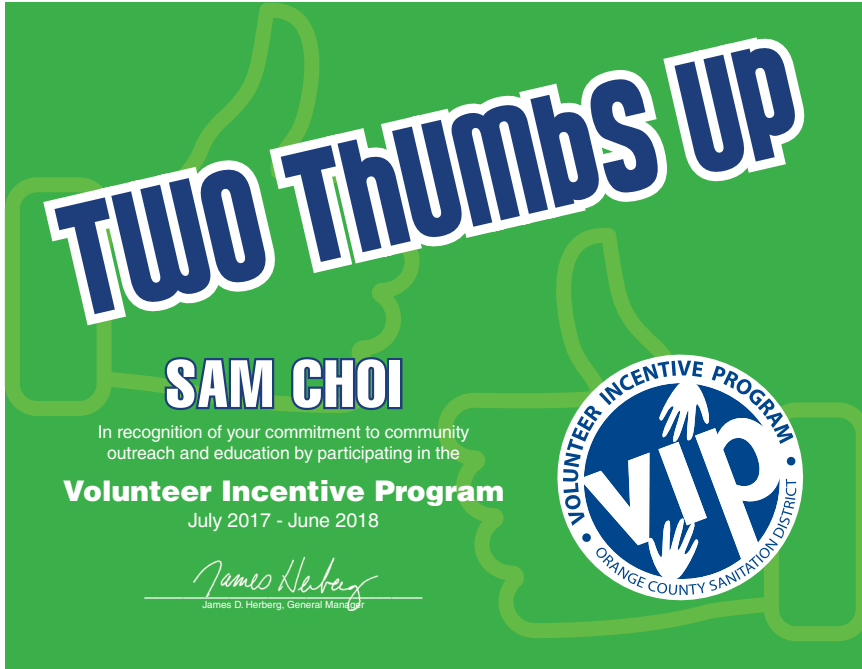

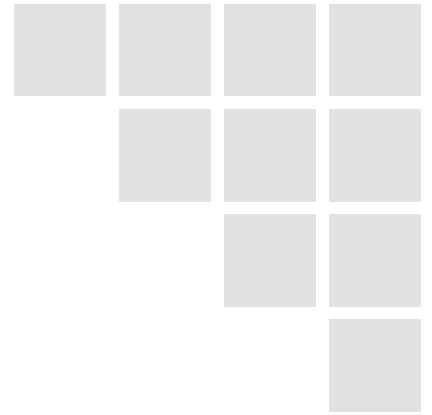

Dates to Remember
Nov. 4 - Daylight Savings (fall back)
Nov. 6 - Election Day
Nov. 12 - Veteran's Day (OCSD Holiday)
Nov. 22 & 23 - Thanksgiving break (OCSD Holiday)

Please be sure to obtain supervisor approval for all events and presentations during work hours.

Programs Home Page

VOLUNTEER INCENTIVE PROGRAM

Purpose
The Volunteer Incentive Program (VIP) seeks to recognize and reward employees for contributing their time and efforts as volunteers in support of OCSD's community outreach activities such as plant tours, speakers' bureaus, and community events.

How to sign up?

1. Contact the Public Relations Office to obtain a volunteer registration form. Complete and return to OCSD.
2. Write the date, time, hour and address of the activity on the form.
3. You MUST have your supervisor's written approval before attending the activity. This is necessary to ensure that the activity being undertaken is safe.

How does it work?
Points will be awarded to you and added to the total points earned. Points will be awarded to you based on the number of hours you volunteer. Points will be awarded to you based on the number of hours you volunteer. Points will be awarded to you based on the number of hours you volunteer.

Point System
All hours volunteered will make an employee eligible for a reward. Points will be awarded to you based on the number of hours you volunteer. Points will be awarded to you based on the number of hours you volunteer.

3 points Coffee Mug
5 points Shovel
10 points Car Sun Shade or Trash Container
15 points Laundry Bag
20 points OCSD Baseball Hat or Wind-Up Flash Hat
25 points Beach Towel
30 points Emergency Kit
35 points Probe Light
40 points Coffee Mug

Awards Luncheon
All employees who accumulate a minimum of four points will be invited to a special luncheon and awards ceremony. There will be awards in the presence of the public.

■ **Volunteer of the Year Award** (once a year)
■ **Special Award** (as warranted)
■ **Division of the Year Award** (once a year)

Core Awards Page

SERVICE AWARDS PROGRAM

Purpose
Service Awards recognize employees for their commitment and dedication to OCSD for milestone years of service (e.g., five, ten, fifteen).

Who is eligible?
All OCSD employees are eligible except interns.

How it works?
Every five years of consecutive and uninterrupted employment are recognized with a certificate of recognition acknowledging an employee's tenure with OCSD. Human Resources will coordinate with the direct supervisor of the employee being recognized as their milestone tenure is reached. The supervisor will be responsible for presenting the award trophy or certificate depending on the preference of the employee. Service awards will be presented to eligible employees during the calendar year in which the milestone is attained.

Service Awards include:

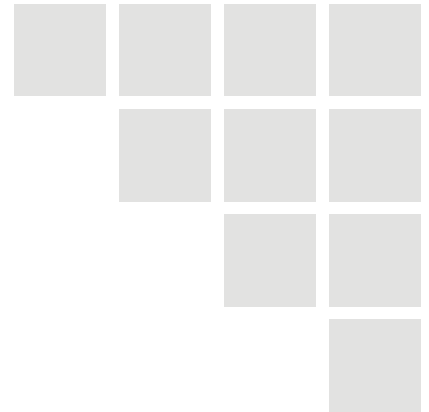

- Choice of a non-monetary reward from an approved catalogue with cash value, which increases based on years of service.
- Commendation letter from the General Manager.
- Agency-wide recognition in the employee newsletter.*
- Service milestones of 20 or more years of service may be recognized at an OCSD Board meeting.*
- Service milestones of 25 or more years of service may be featured in an article in The Pipeline.*

*With employee consent.

EMPLOYEE WELLNESS PROGRAM

How it works?
The Employee Wellness Program offers a variety of events and services that help enrich employee health and well-being.

Who is eligible?
All OCSD employees are eligible. Interns are ineligible for onsite gym membership, flu shots, and health classes.

TYPES OF WELLNESS ACTIVITIES

<p>Annual Health Fair OCSD offers annual interactive Health Fairs at Plant Nos. 1 and 2, during which employees can gain health education and learn about their benefits by interacting and engaging with health insurance providers and other vendors offering health-related products and services. Health screenings are also available. Participants who attend the events may have a chance to win prizes and receive giveaways.</p>	<p>Flu Shots Employees may obtain flu shots annually at the Health Fair at no cost. Flu shots may also be provided outside of the Health Fair during flu season.</p>
<p>Health Education A variety of onsite seminars and classes are offered throughout the year to provide health and wellness education, tips, and lifestyle advice to employees. Classes and seminars will be advertised to employees as they come up throughout the year.</p>	<p>Wellness Events OCSD hosts a variety of wellness activities for interested employees to participate in, including American Red Cross blood drives, early detection health screenings, and walking events. Events will be advertised to employees as they come up throughout the year.</p>
<p>Onsite Gyms An onsite gym is available for employees at Plant Nos. 1 and 2 at a nominal membership fee in accordance with Policy 5.A Employee Participation in Athletic and Recreational Activities on Off-Duty Time. Click here for membership and waiver form.</p>	<p>Walking Paths Walking paths are available at Plant Nos. 1 and 2 and interested employees may utilize them during breaks and lunch periods. Safety vests are required. Click here to view Walking path maps.</p>

Employee Wellness Page

SAFETY RECOGNITION PROGRAM

Recognition Categories

"On the Spot"
Employee(s) may be recognized under this category as follows:

- Positively contributing to the safety and health of OCSD and its employees or by demonstrating safety accomplishments;
- Working safely;
- Wearing the appropriate Personal Protective Equipment (PPE);
- Raising safety concerns to the supervisor;
- E-mailing supervisors and co-workers to provide warning of hazardous areas;
- Volunteering to give safety talks/meetings;
- Going outside their scope of duties to ensure the safety of others at the District;
- Providing and implementing ideas to further improve the safety of the work area;
- Serving as a role model in safety to others; and
- Any other positive contributions that are safety and health related.

Individual Recognition
Employee(s) may be recognized under this category as follows:

- Identifying and mitigating new hazards that have not been previously addressed;
- Submitting CMM3 safety service requests to improve safety. All CMM3 safety service requests shall include specific information describing how to mitigate the safety hazard in sufficient detail to address the safety improvement.

Group Recognition
Groups may be recognized under this category as follows:

- Division(s) that complete the calendar year without a recordable or lost time injury;
- Division having the greatest safety record improvement based upon recordable and lost time improvement from the previous year.

POLICY

ONSITE CATALOG

ONLINE CATALOG

More Information
Risk Management has added an additional source of incentive items to augment the District-logged items that are currently available. The vendor, CA Star, has different levels of items that employees can redeem their safety coins for when they choose. If employees wish to use this vendor they should contact Karen Landgrave in Risk Management. The number of coins that are redeemed will determine the level of incentive that employees can choose. Below is a list showing the number of coins needed for each Category. Coining options only go up to 1. Employees can redeem up to 25 coins per fiscal year.

Award Type #	Catalog	# of Coins
100000000001	A Catalog	3
100000000002	B Catalog	3
100000000003	C Catalog	4
100000000004	D Catalog	6
100000000005	E Catalog	6
100000000006	F Catalog	7
100000000007	G Catalog	8
100000000008	H Catalog	10
