<b>AB 638</b>	<b>C. Rodriguez [D]</b>	The Stormwater Resource Planning Act authorizes one or more public agencies to develop a stormwater resource plan that meets certain standards to address the capture of stormwater, as defined, and dry weather runoff, as defined. The act requires the State Water Resources Control Board, by July 1, 2016, to establish guidance for purposes of the act. This bill would require the board, by June 1, 2026, to establish guidance for stormwater capture and reuse for the irrigation of urban public lands, as defined. The bill would require the guidance to include, but not be limited to, the use of captured stormwater for irrigation to offset the use of potable water, as specified, and criteria including, among other things, pathogens and pathogen indicators and total suspended solids. <b>SB 31</b>	<b>McNerney [D]</b>	The Water Recycling Law generally provides for the use of recycled water. Current law requires any person who, without regard to intent or negligence, causes or permits an unauthorized discharge of 50,000 gallons or more of recycled water in or on any waters of the state to immediately notify the appropriate regional water board. This bill would, for the purposes of the above provision, redefine "recycled water" and provide that water discharged from a decorative body of water during storm events is not to be considered an unauthorized discharge if recycled water was used to restore levels due to evaporation.
