The Contractor shall work with the OC San Project Manager to develop the Work Plan along with a schedule for each major activity.

For each PEPS pump overhaul, the work will be broken down into two phases which includes:

- Phase (1) Pump Removal and Condition Assessment
- Phase (2) Pump Repairs, Reinstallation and Minor Field Repair Work.

After Phase (1) work, should it be discovered that the pump is not repairable, or the repair cost nears the replacement cost, the Contractor shall notify OC San. OC San may then request the Contractor to stop work. Contractor will only be paid for the Phase (1) work, and all parts must return to OC San.

If the pump is repairable, Contractor shall notify OC San Project Manager and state whether optional repair/replacement parts will be needed along with any other additional repairs. Any additional work must be approved by OC San Project Manager. Work shall not begin on Phase (2) unless first authorized in writing by the OC San Project Manager.

Phase (2) work will involve crane lifting of the pump and field work that requires confined space entry. Contractor shall provide lifting, personal protective equipment, safety submittals, and complete safety related tasks following the requirements outlined by the Contractor Safety Standards.
